

Sri Lanka Labour Force Survey

Quarterly Report

2nd Quarter - 2021

QUARTERLY REPORT OF THE SRI LANKA LABOUR FORCE SURVEY

Quarterly Report – 2021

Second Quarter

DEPARTMENT OF CENSUS & STATISTICS

Ministry of Economic Policies and Plan Implementation

ISBN 978 – 624 – 5919 – 37 – 6

Preface

Department of Census and Statistics has a long history of conducting the Labour Force Survey (LFS) in Sri Lanka. For instance, before 1990 this survey was conducted at every five yearly time intervals and from 1990 onward it was conducted as a regular survey to provide quarterly and annual labour force indicators. Labour Force Surveys provide various labour force indicators including employment and unemployment status of the country. Specially the survey provides necessary information to compile GDP and other important economic indicators of the country.

Various improvements were incorporated into the LFS during past period without breaking its core concepts and definitions which were used since 1990. In 2006, new modules were added to the LFS to capture the information on computer literacy, household economic activities and informal sector employment. The structure of the LFS questionnaire which was used during 2006-2012 was revised in 2013 with new improvements for concepts and classifications used. It is important to note that in 2013 the definition of working age population was revised from age ten and above population to age fifteen and above population.

In 2016, published labour force estimates from 2011 to 2015 were revised according to the population estimates of the Census of Population and Housing which was conducted in 2012. This revision was done along with the international best practices.

Another major achievement for data collection for LFS was taken place in 2017 with the introduction of Computer Assisted Data Collection (CAPI) using tablet computers. Before 2017 enumerators used paper based method and used survey questionnaires to record the answers given by the respondents. A known probability sampling technique is used to select the sample and the annual labour force indicators are compiled using 25,750 housing units covering the entire country. The enumerators who are permanent officers of the Department visited each of these randomly selected housing units to collect the information with a great effort. The field work of the survey for the second quarter 2021 was done in the month of April, May and June in year 2021. This report is based on the data collected in quarterly sample of 6,440 housing units.

I hope the information in this report is very valuable and useful to make evidence based decisions for various users to identify the issues as well as the changes in the labour market of Sri Lanka.

*Mr. P.M.P. Anura Kumara
Director General of Census & Statistics*

Acknowledgements

This report is the hundred and nineteenth in the series of the Quarterly Labour Force Survey which was commenced from the first quarter of 1990 and is being continued by the Department of Census and Statistics.

Planning and execution of the survey was done by the staff of the Sample Surveys Division under the guidance of Ms. K.M.D.S.D.Karunaratne, Additional Director General (Statistics) and Ms. K.A.Sajeewa Kodikara, Director (Statistics) and under the direction of Ms. E.A.A.P.Egodawatte, Mr. W.Gnanathilaka and Ms. M.D.D.D.Deepawansa, Deputy Directors, Sample Surveys Division.

The survey activities were organized and supervised by Ms. H.M.D.Sepalika, Mr. A.K.D.C.N.S.Karunaratna, Mr. T.D.M.S.D.Perera, Ms. U.S.Dilrukshi, Mr. K.T.Sureskumar, Ms. M.W.L.C.M.Chandrarathne, Ms. M.M.G.D.Manamperi, Ms. P.D.Nanayakkara, Ms. R.P.M.Subhashini and Mr. H.M.S.C.Bandara, Statisticians, of the Sample Surveys Division.

The computer data processing and final tabulations were done by Mr. A.M.A.E.Atapattu and Ms. A.N.Ekanayake Statistical Officers of the Sample Surveys Division, under the supervision of Mr. T.D.M.S.D.Perera, Statistician. The Statistical Officers, Statistical Assistants, Development Officers, Information and Communication Technology Assistants and Data Entry Operators/ Coding Clerks of the Sample Survey Division are acknowledged for their valuable contribution during the whole survey process.

The Information & Communication Technology Division, under the direction of Ms. I.A.M.Fernando, Additional Director General (ICT) and under the supervision of Mr. P.M.R.Fernando, Director (ICT) and Mr. W.H.P.N.Weerasiri, Director (ICT), were responsible for implementing CAPI methodology and preparation of data collection and computer edits programmes. Developing of sample selection programme and its related computer software was done by Mr. K.M.R.Wickramasinghe, Deputy Director (ICT).

This publication was organized and prepared by Mr. T.D.M.S.D.Perera, Statistician, Sample Surveys Division, assisted by Mr. A.M.A.E.Atapattu and Ms. A.N.Ekanayake Statistical Officers, under the guidance of Ms. K.A.Sajeewa Kodikara, Director (Statistics) and Mr. W.Gnanathilaka, Deputy Director (Statistics), Sample Surveys Division.

District staff of the Department who worked on the survey deserves a special word of thanks. The Deputy Directors/ Senior Statisticians/ Statisticians supervised the survey and field Statistical Officers, worked hard at the data collection stage, to make this survey a success. Printing of the report was done by the staff of Printing Division, under the supervision of Mr. M.L.K.P.Kumara, Statistician and under the direction of Ms. U.V.Jayakody, Director (Statistics).

Finally, I wish to express my appreciation to all the respondents of the survey for their valuable cooperation.

Figure 1 : Distribution of Economically active/Inactive population- Second quarter - 2021

Sri Lanka Labour Force Survey (LFS) is designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. LFS has been conducted quarterly, since the first quarter of 1990.

This report contains labour force, employment and unemployment statistics for the second quarter 2021 based on the data collected in April, May and June in 2021 covering the whole country.

Labour Force

(Economically Active Population)

Table 1 : Economically active population by gender and sector – Second Quarter 2021

Sector	Economically active population					
	Total	%	Male	%	Female	%
Sri Lanka	8,514,766	100.0	5,722,184	67.2	2,792,581	32.8
Urban	1,355,533	100.0	936,917	69.1	418,617	30.9
Rural	6,741,191	100.0	4,544,783	67.4	2,196,408	32.6
Estate	418,041	100.0	240,485	57.5	177,557	42.5

Table 2 : Economically inactive population by gender and sector – Second Quarter 2021

Sector	Economically inactive population					
	Total	%	Male	%	Female	%
Sri Lanka	8,577,357	100.0	2,320,910	27.1	6,256,447	72.9
Urban	1,554,084	100.0	439,804	28.3	1,114,281	71.7
Rural	6,712,710	100.0	1,783,555	26.6	4,929,155	73.4
Estate	310,563	100.0	97,552	31.4	213,011	68.6

Table 3 : LFPR by gender and year - All Island

Year	Total	Male	Female
2016	54.1	75.1	36.0
2017	54.1	74.5	36.6
2018	51.8	73.0	33.6
2019	52.3	73.0	34.5
2020	50.6	71.9	32.0
2019 Q2	52.6	73.4	34.6
2020 Q2	50.2	71.7	31.6
2021 Q1	50.9	71.7	33.4
2021 Q2	49.8	71.1	30.9

Table 3 provides the information on LFPRs since year 2016. Referring the Table 3, it is important to note that, male participation to the labour force is always higher than that of female.

Considering the Table 4, the distribution of LFPR by age group and by gender depicts high male participation compared to female in all age groups. The highest participation rates for male is reported from age group 40 – 44 years (95.5%), while that for female are reported from 30 – 34 and 45 – 49 age groups (45.1%).

Labour Force

This is the currently economically active population. Which is the number of persons (age 15 years & above) who are employed or unemployed during the reference one week period.

Labour force participation rate (LFPR)

Labour force population expressed as a percentage of the population, age 15 years and over, defined as LFPR.

According to the Table 1, the estimated economically active population is about 8.5 million in the second quarter 2021. Of which 67.2 percent are males and 32.8 percent are females. The economically inactive population is about 8.6 million. Out of the economically inactive population 27.1 percent are males and 72.9 percent are females. (Table 2).

Table 4 : LFPR by age group and gender - Second Quarter 2021

Age group (Years)	Total	Male	Female
Sri Lanka	49.8	71.1	30.9
15 - 19	8.5	13.0	3.8
20 - 24	45.9	61.0	31.9
25 - 29	66.9	89.8	44.7
30 - 34	68.8	95.1	45.1
35 - 39	65.3	94.6	41.8
40 - 44	67.8	95.5	42.5
45 - 49	68.6	94.7	45.1
50 - 54	66.7	94.6	42.5
55 - 59	59.9	88.0	36.6
60+	29.0	47.6	13.3

Definition of 'Employed'

Persons, who worked at least one hour during the reference period, as paid employees, employers, own account workers or contributing family workers are said to be employed. This also includes persons with a job but not at work during the reference period.

Reference Period :

Previous week of the survey week

The Employment Rate

The proportion of employed population to the total labour force.

Figure 2 : Distribution of employed population by employment status and Agriculture/Non-Agriculture sector - Second quarter 2021

Employment ...

*Table 5 : Distribution of Employed population by main industry
(Second quarter 2020 – Second quarter 2021)*

(%)	100.0	27.8	25.3	46.9

Table 5 shows the percentage distribution of employed population by main industry from second quarter 2020 to second quarter 2021. During second quarter of 2021, the total number of employed persons in Sri Lanka is estimated as about 8.1 million. Of which, about 46.9 percent engaged in Service sector, 27.8 percent in Agriculture sector and 25.3 percent in Industry sector. In the second quarter of 2021, there is an increase in employed persons in Agriculture and Service sectors compared to the second quarter of 2020.

Table 6 : Distribution of employed population by employment status in Agriculture and Non-Agriculture sectors – Second quarter 2021

		Male	Female
Sri Lanka	100.0	100.0	100.0
Agriculture	27.8	25.8	32.1
Industry	25.3	27.4	20.8
Services	46.9	46.8	47.1

Main industry categories and sub sectors**Agriculture**

1. Agriculture Forestry and Fishery (A)

Industries

1. Mining & Quarrying (B)
2. Manufacturing (C)
3. Construction, Electricity, gas, steam and air conditioning supply, Water supply, sewerage, waste management and remediation activities (D, E,F)

Services

1. Wholesale and retail trade, repair of motor vehicles and motor cycles (G)
2. Transportation and storage (H)
3. Accommodation and food services activities (I)
4. Information and communication (J)
5. Financial and insurance activities (K)
6. Professional, scientific and technical activities (M)
7. Administrative and support service activities (N)
8. Public administration and defense compulsory social security (O)
9. Education (P)
10. Human health and social work activities (Q)
11. Other service activities (S)
12. Activities of households as employers; undifferentiated goods and services - producing activities of households for own use (T)
13. Real estate activities (L) Arts, entertainment and recreation (R) Activities of extra territorial organizations & bodies (U)

Majority of the workforce are private sector employees followed by own account workers (Table 6) .

Table 7 depicts the percentage distribution of male and female employed population by main industry sectors. Highest employment share is in service sector and this is true for both male & female, while the lowest shares is for industry sector. Among employed females 32.1 percent is in agriculture sector while this share is 25.8 percent for males.

Unemployment ...

Figure 3 : Unemployment rates and its 95% confidence intervals (2018Q2 - 2021Q2)

¹**Sampling error** : When a sample, rather than the entire population, is surveyed, estimates differ from the true values of population they represent. This difference, or sampling error, occurs by chance, and its variability is measured by the sampling error of the estimate.

For more details, please refer the explanatory note given under the labour force link in the DCS website; www.statistics.gov.lk

Table 8: Number of Unemployed and Unemployment rate by age group and gender – Second quarter 2021

Age group (Years)	Unemployment Rate (%)			
	Sri Lanka	Sri Lanka	Gender	
	Number		Male	Female
Sri Lanka	432,463	5.1	3.8	7.7
15–24	242,768	30.0	24.9	39.8
25–29	80,678	9.2	5.4	16.5
Over 30	109,017	1.6	1.1	2.5

These figures are to be treated with caution as the corresponding CV (Coefficient of variation) values are high.

As can be seen from Table 8, overall unemployment rate reported for female is 7.7 percent and it is 3.8 percent for male. Youth unemployment rate (age 15 – 24 years) corresponding to the second quarter 2021 is 30.0 percent and that is the highest reported unemployment rate among all age groups. Further the unemployment rates for males and females are 24.9 and 39.8 percent respectively for age group 15 – 24.

The survey results further reveals that the unemployment among females is higher than that of males, in all age groups. Youth and female unemployment contribute more to the overall unemployment of the country.

Table 9: Number of Unemployed and Unemployment rate by level of education – Second quarter 2021

Level of Education	Unemployment Rate (%)			
	Sri Lanka	Sri Lanka	Gender	
	Number		Male	Female
Sri Lanka	432,463	5.1	3.8	7.7
Below GCE O/L	128,126	2.6	2.3	3.6
GCE O/L	109,964	7.2	6.4	9.4
GCE A/L & above	194,374	9.1	6.1	12.5

The highest unemployment rate is reported from the G.C.E. (A/L) and above group which is 9.1 percent. Corresponding percentages are 6.1 percent and 12.5 percent for males and females respectively. Female unemployment rates are higher than those of males in all levels of education.

Survey results further shows that the problem of unemployment is more acute in the case of educated females than educated males, which was observed consistently over the results of previous survey rounds as well.

Definition of 'Unemployed'

Persons available and/or looking for work, and who did not work and taken steps to find a job during last four weeks and ready to accept a job given a work opportunity within next two weeks are said to be unemployed.

The Unemployment Rate

The proportion of unemployed population to the total labour force.

Figure 4: Unemployment rate by age group and gender – Second quarter 2021

Figure 5: Unemployment rate by level of education and gender – Second quarter 2021

Special Statistical Appendix

EXPLANATORY NOTES

Coverage

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

This quarterly survey of households is conducted through a scientifically selected sample designed to represent the civilian non-institutional population. Respondents are interviewed to obtain information about the employment status etc. of each member of the household 15 years of age and older.

The field work of the survey is done during the third week of each month, Monday through Sunday. This is known as the "survey week". The inquiry relates to activity or status are referred in the preceding week of the survey week; referred to as the "reference week".

The concepts and definitions underlying labour force data are as follows.

Concepts & Definitions

1. **Labour force:** The labour force is composed of the economically active population 15 years of age and over.
2. **The Economically Active Population:** is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. **Employed:** Persons, who during the reference period, worked as paid employees, employers, own account workers (self employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. **Unemployed:** Persons who are seeking and available for work, but had no employment during the reference period.
5. **Currently Economically Active:** A person who was employed or unemployed during the current reference period is considered to be currently economically active.
6. **Not in the Labour Force (not economically active):** Persons who were neither working nor available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full – time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and Usual definitions apply.
7. **Criteria for classification of underemployment:** In order to classify an employed persons as visibly underemployed,

*Explanatory Notes (Page 2)**(i) If the person has worked less than the normal duration in his/her main activity*

In Sri Lanka scenario, 35 hours per week is taken as the cut-off point applicable to all workers, except government teachers. As in practice, though teachers do have a normal duration of work which is below the general cut-off point, they should be on a full time schedule according to the nature of their job. Further, those who do have a secondary job or those who are employers, were considered as having worked the normal duration in their respective activity.

Therefore, if the person has worked less than the normal duration in his/her activity (as described above), then the person is further questioned to ascertain whether he/She is prepared and available for further work if provided. Such persons are considered underemployed in their respective employment.

(ii) If the person has worked more than the normal duration in his/her activity

If the person has worked even more than 35 hours as usually, but he has worked less than 35 hours actually in the reference period, only due to the off season or bad weather, such persons were also further questioned to check their underemployment situation, considering them as a special category.

8. Informal Sector Employment

In order to classify a person to be employed in informal sector employment, following information were used.

- (i) Registration of the organization
- (ii) Accounts keeping practices of the organization
- (iii) Total number of regular employees of the organization.

Reliability of the estimates

Statistics based on the quarterly labour force data are subject to both sampling and non - sampling errors. When a sample rather than the entire population is surveyed, there is a chance that the sample estimates may differ from the "true" population values they represent.

The exact differences or sampling error, varies depending on the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 95 percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.96 standard errors from the "true" population value, because of sampling error. Analyses relating to the Labour Force Survey are generally conducted at the 95 percent level of confidence.

For example, the confidence interval for the quarterly unemployment rate is calculated as follows

When the estimated unemployment rate is 4.5 and standard error of unemployment rate is 0.275 then 95% confidence interval

Estimated value (of the unemployment rate) \pm (standard error) * (1.96)

4.5 \pm (0.275) * (1.96)
(4.5 \pm 0.539)

Explanatory Notes (Page 3)

This means, the 95 percent confidence interval on the quarterly unemployment rate could range from (4.0 to 5.0). This implies that there is about 95 percent chance that the "true" unemployment rate lies within this interval. This range includes all the values range from 4.0 to 5.0. When the comparison of this estimate is done between two quarters, if any of the value within the 95 percent confidence interval of one quarter overlaps with the confidence interval of the other, it means that the estimates of this two quarters are not significantly different.

Therefore, in each quarterly labour force report, a separate table is given including approximate standard errors for some selected variables, so that users could understand this statistical scenario clearly.

Distribution of unemployment rates and 95% confidence intervals (2018Q2 - 2021Q2)

As seen in figure, it is very important to note that, there were no statistically significant differences between the unemployment rates reported in different time periods of 2018/2021, when sampling error was considered.

Change in survey schedule

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes have been made over the years to improve the accuracy and usefulness of the data. In January 2006, some improvements were made to the labour force survey schedule in order to fulfill the requirements of data users and also to provide additional information for planning purposes. The revision was made focusing on literacy, household economic activities, and informal sector employment and under employment etc.

From January, 2013 onwards, the lower bound of working age populations is considered as age 15, hence age 15 and over population is considered as working age population. The survey schedule is updated to obtain more precise information on following age, informal employment, informal sector, secondary occupation, wages & income, unemployment & trainings.

New Industry & Occupation classifications

From January 2013 onward the survey uses new industry & occupation classifications, such as

SLIC Rev 4:- Sri Lanka Standard Industry Classification based on International Standard Industry classification - Rev.4 (ISIC Rev 4)

SLSCO 08:- Sri Lanka Standard Classification of Occupation-2008 based on International Standard Classification of Occupation-2008 (ISCO 2008)

Explanatory Notes (Page 4)

Note :

It is important to note that, all the data published here are the estimates based on a sample survey and these are subject to sampling errors. These sampling errors can be statistically evaluated from the survey results. Therefore, sampling error is normally measured in terms of the standard error of the particular variable. Standard error could be used to calculate the confidence limits with a prescribed accuracy where the true value of the estimates lies.

Further reliability of the estimates can be expressed in terms of Coefficient of Variation (CV). The CV is a relative measure of the sampling error and is calculated as sampling error divided by the expected value of the given characteristic.

In view of this, following table is given to show the estimates for some selected variables, its standard error, CV and 95% Confidence interval.

It is also important to note that all the estimates we publish in this report are subject to sampling error and one should be cautious in the interpretation of results, especially with respect to the trends over time.

Estimate of Confidence Intervals for some selected characteristics

Year	Labour Force					Employed				
	No.	Standard error	C.V (%)	95% C.I.		No.	Standard error	C.V (%)	95% C.I.

ALTERNATIVE ESTIMATES

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial, are as below.

- (1) Number of Hours of Work : A person who work at least one hour during the reference week, is considered employed, under these definitions.
- (2) Working Age Population : All persons of age 10 years and over are considered to be in the working age, before 2013. However, this was changed as age 15 and over from 2013 onward.
- (3) Employment Status : All,
 - a) Paid employees, (those who work for wages/salaries).
 - b) Employers (who have at least one paid employee under them).
 - c) Own account workers (who carry out the economic activity without having anypaid employees).
 - d) Contributing family workers (who make their contribution to the economic activities carried out bytheir own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

- (1) Number of Hours of Work : Some pointed out that one hour per week is too low, to consider a person to be employed.
- (2) Working Age Population : Some pointed out those persons in the age group 10-14 yrs. are too young to be considered in the working age. (From 2013 onward the working age population is considered as age 15 and over).
- (3) Employment Status : Some pointed out that 'contributing family workers' may work in the family enterprise without payment because they have no other work, and so it is not appropriate to consider them as employed.

An attempt has been made to produce 'Alternative estimates of Employment, Unemployment and Labour Force Characteristics,' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

- (1) Number of Hours of Work : Persons who work 20 hours or more per week only are considered to be employed.
- (2) Contributing Family Worker : Contributing family workers are not considered as employed. They are considered as economically inactive (not in the labour force) so only, a) paid employees b) employers and c) own account workers are considered to be employed.

Following tables are based on the above alternative concepts and definitions.

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

TABLE 1 - LABOUR FORCE STATUS OF HOUSEHOLD POPULATION 15 YEARS & OVER (ALTERNATIVE ESTIMATES)

YEAR	HOUSEHOLD POPULATION (15 YEARS & OVER)	TOTAL LABOUR FORCE	LABOUR FORCE PARTICI: RATE(%)	LABOUR FORCE				NOT IN LABOUR FORCE NUMBER
