

NATIONAL ACCOUNTS OF SRI LANKA 2017

Department of Census and Statistics

National Accounts of Sri Lanka

2017

Department of Census and Statistics

Preface

This is the 43rd publication of the series of National Accounts Estimates(NAE) published by the National Accounts Division of the Department of Census and Statistics (DCS). Further, this is the second publication which contains the NAE's based on the new base year of 2010.

In the year of 2015, the National Accounts Division of the DCS revised the base year from 2002 to 2010. In addition to revising the base year from 2002 to 2010, in the compilation of National Accounts, many other improvements were also made, such as, conceptual changes as recommended by the international guidelines (SNA 2008) and best practices, improvements in the methodology of compilation, adoption of latest classification systems, expansion of the production boundary and inclusion of emerging activities, new and recent data sources. With these improvements in the national accounting system, from 2015 second quarter onwards the DCS compiled and released the annual and quarterly estimates of National Accounts from 2010 to 2015 using the new base year of 2010. Accordingly, this publication is prepared based on National Accounts Estimates produced for the year 2017 with the new base year of 2010.

This publication includes tables on Production Accounts prepared according to the activities on International Standard Industrial Classification of all economic activities (ISIC Rev 4), General Government Expenditure based on the Classification of the Functions of Government (COFOG), and Private Consumption Expenditure based on Classification of Individual Consumption according to the purpose (COICOP).

Further, this publication consists of "Annual data series of GDP estimates from 2010 to 2016" in Production approach. In addition, GDP estimates compiled based on the Income and Expenditure approaches, are also included.

I hope that this publication would be benefitted for data users, including policy makers, economic planners of the country as well as for academicians, researchers and other data users, who are working for and interested in the economy of Sri Lanka.

Dr I. R. Bandara

Director General

Acknowledgements

The "National Accounts of Sri Lanka – 2017" report was prepared under the guidance of Mr.D.G.S.G. Munasinghe, retired Additional Director General (Statistics I) and under the direction of Mrs. K.M.D.S.D. Karunaratne, Additional Director General (Statistics III), of the Department of Census and Statistics (DCS).

The report was prepared by the team of officers of Mrs. N.W. Disanayaka, Mr. E.M.M.K. Ekanayake, Mrs. Y.P. Rajapaksha, Mrs. I.C. Premaratne, Mr. W.M.A.U.B. Weerathunga, Mr.B.A.U. Warnasiri, Mrs. U.V.R.S. Gunawardana, Mrs. S. Jeyagowry, Mr. M.A.S. Laksiri, Statisticians, Mrs. Y.G.R.I. Kulathilaka, Senior Statistician of the National Accounts Division and the team were assisted by the officers of Mr. S.T.T. Warapitiya, Mrs. H.M.N.K. Hennayaka, Mr. K.D.P. Priyadarshana, Mrs. T.P.G.W.K. Thennakoon, Ms. M.P.M. Priyadarshani and Mrs. K.A. Wijesekara, Ms. C.N. Balasooriya, Mrs. K.A.M.W. Kumari, Mrs. I.G.V.L. Dasanayaka, Statistical Officers and Ms. R.K. Tharanga, Mrs. S.N.P. Warnamali, Mrs. C.W.D.K. Chandrasekera and Mrs. W.A.R. Mangalika, Statistical Assistants and Mrs. S.G.P. Sandya Kumari, Development Officer and other staff of the National Accounts Division.

At this time we thankfully acknowledge the contributions provided by the staff of the DCS at different stages of compiling macroeconomic indicators of the country.

The field staff of the DCS is responsible for many statistics activities, including survey enumerations and price collections which provides data for compiling Indicators, Output and Intermediate consumption of economic activities. Their contributions in conducting all those statistical activities are highly appreciated.

Further, we thankful all the officers of the divisions of the DCS, such as Agriculture Division, Industry, Construction, Trade and Services Division and Prices and Wages Division for their hard work in providing more accurate and timely data needed for the compilation of macroeconomic indicators.

In addition, the continued assistance given by the private and public sector organizations through furnishing primary data to compile these estimations and make this annual publication a success is very much appreciated.

Chapter 1: Economic Performance – 2017

Overview

The economic growth rate in the country for the year 2017, reported as 3.4 percent, indicating a slower growth rate when compared to the previous year. The estimated annual Gross Domestic Product (GDP) at constant price (2010) for Sri Lanka for the year 2017 (January to December) reportedly reached up to Rs.9,344,839 million. The annual GDP value at constant price (2010) reported for the year 2016 was Rs.9,035,830 million.

Figure 1.1 clearly shows the continuous expansion of Sri Lanka economy based on the annual GDP estimates at constant (2010) prices, by the upward trend pattern during the period of 2011 to 2017. The economic growth rate has increased continuously in a slower phase by 5.0 percent in both years 2014 and 2015, and by 4.5 percent and 3.4 percent in years 2016 and 2017 respectively (Figure 1.1).

Figure 1.1: Annual Trends in the GDP, 2011-2017

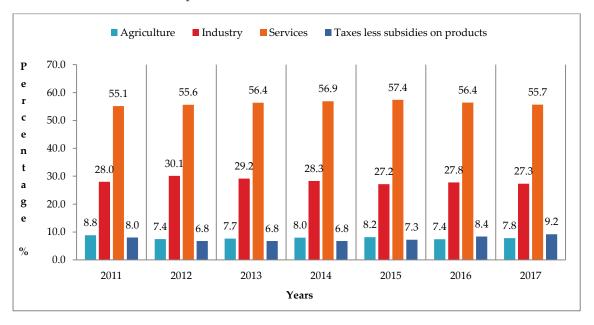

With the new National Accounting frame (New Base year =2010), composition of the GDP was changed as Agriculture, Industry, Services and Taxes less subsidies on products. This is due to the adjustment of 'taxes less subsidies on products' to the total Gross Value Added to derive Gross Domestic Product at market price. The value added of the each economic activity derived by deducting intermediate consumption from the gross

output value. Generally the, intermediate consumption is estimated at purchaser's price, the output of the economic activities is estimated at basic price. Consequently the value added is reported at basic price. In theoretical point of view, the GDP of an economy should be valued only at market price. Therefore to calculate the Gross Domestic Product at market price, the taxes should be added up to the gross value added of the total economy and then the

subsidies should be deducted. Accordingly, in the new series of national accounts, the Gross Domestic Product of the economy has

been derived by adjusting the 'taxes less subsidies on products' to the total Gross Value Added.

Figure 1.2: Contribution of Agriculture, Industry, Services & Taxes less subsidies on products to the GDP at current market price

In the year 2017, the four major components of the economy: Agriculture, Industry, Services and Taxes less subsidies has contributed their share to the total GDP at current price (2010) by 7.8 percent, 27.3 percent, 55.7 percent and 9.2 percent respectively, (Figure 1.2). This show the contribution patterns are more or less similar to the previous years. As shown by the Figure 1.2, the Service activities shoulder the economy more than 50 percent followed by the Industrial and Agricultural activities.

The Figure 1.3 illustrates the growth rates of major economic activities and the annual GDP growth rate of Sri Lanka over the last five years. In 2017, the economy mostly buoyed on industrial and services activities while agricultural activities badly affected with the inclement weather conditions which continued since 2016. Moreover these severe weather conditions seriously affected on the whole economy, which resulted an annual growth rate of 3.4 in 2017.

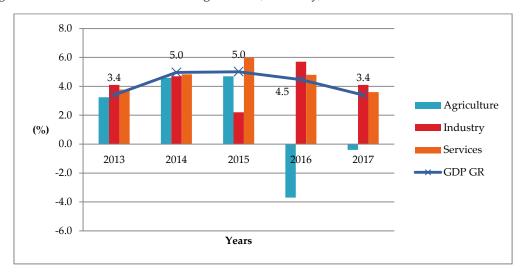

Figure 1.3: Annual Growth rates of agriculture, Industry, Services 2013-2017

Contribution from the institutional sectors to the GVA

The Gross Value added (GVA) is comprised by contribution from the institutional sectors of Non-financial corporations (NFC), Financial Corporations (FC), General Government (GG), Households (HH) and Non-Profit

Institutions Serving Households (NPISH). In National Accounting framework in Sri Lanka, Households and Non-profit institutions serving households are considered as one sector. Based on that, national accounts are compiled.

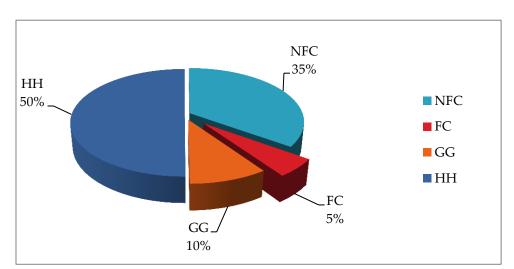

Figure 1.4: Percentage share of Institutional sectors to the GVA at current market price -2017

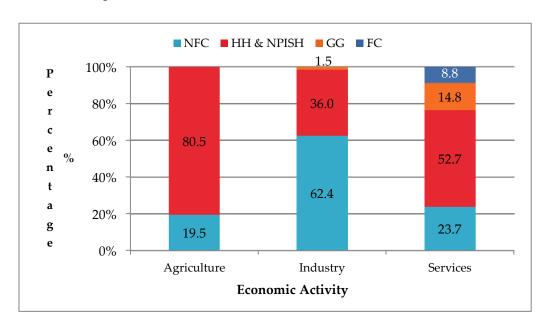

Figure 1.5: Percentage share of Institutional sectors to the GVA by Major economic Activities at current market price -2017

When consider the Institutional Sectors contribution to the total GVA, at national level, the half of the GVA is shared by the household sector and NPISH sector. (Figure 1.4). Around 35.0 percent is shared by the NFC sector. The General Government and Financial Corporation sectors contributions to the total GVA are relatively low (10 percent and 5.0 percent) when compared to the other two sectors. When consider the institutional sectors contribution to the major economic activities, (Figure 1.5) the agricultural activities were mainly driven by HH and NFC sectors. The major portion of 80.5

Output of the economy (market output/non market output/ own use)

Total output of the economy is comprised by Market output, Non market output and Output for own final use. The total output value for the year 2017 is valued at current price as Rs. billion 21,512. Out of the total percent is contributed by HH sector while the rest of 19.5percent is contributed by NFC sector. Sixty two percent of industrial activities are shared by the NFC sector, while 36 percent is contributed by Household sector. The General Government sector contribution to the n Industry sector is very low (2.1 percent). All four sectors of the economy give contribution to generate the gross value added of the services activities. The HH and NPISH sectors contributed 52.7 percent to the total GVA of services activities while the rest are shared by the NFC, GG and FC sectors.

output, 90.0 percent is represented by the market output and 6.0 percent and 4.0 percent is estimated as output for non-market output and own final use respectively (Figure 1.6).

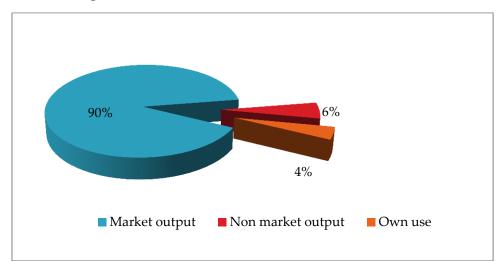

Figure 1.6: Percentage share of Institutional sectors to the GVA at

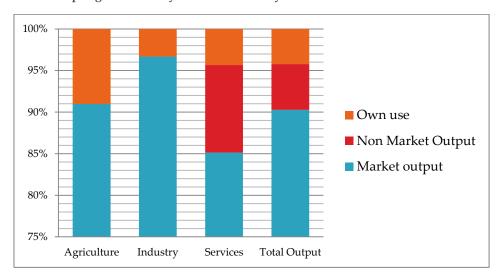

The output generated for their own consumption (household's or NFC's consumption) is considered as 'Output for own final use'. The non-market output is the output generated by the General government.

According to Figure 1.7, in agricultural activities, 91 percent of the output is produced as a market output. Compare with other economic activities the highest percentage of 9.0 percent of output will be

used for own consumption from the total agricultural output of the country. Out of the industrial production, 96.9 percent is a market output. When considering the service activities, the output is a combination of all three, the market output, non-market output and output for own consumption. Compared to the agriculture and industry activities, in service activities, one tenth of output is derived through the general government as non-market output.

Output by institutional sectors

Figure 1.7:: Output generation by economic activity - 2017

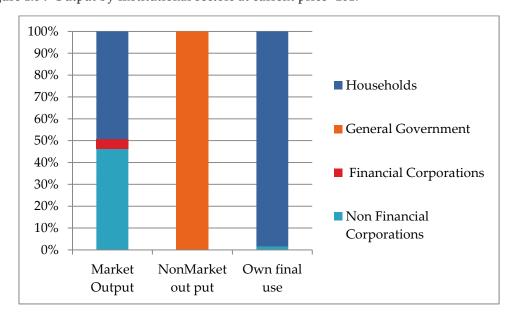

The contribution of the institutional sectors to the total output in each category of the economy is clearly showing in

Figure 1.8. The market output is generated mainly through NFC, FC and HH/NPISH sectors by 46 percent, 4 percent and 50 percent respectively. Hundred percent of

the output of Financial corporations contributed to the Market output. Non market output is totally driven by the General Government sector. In 'Own final use', 98.5 percent is generated by Households and remained 1.5 percent provided by NFCs.

Figure 1.8: Output by Institutional sectors at current price -2017

GDP implicit price deflator

The GDP implicit price deflator which measures the price change in the economy with respect to a specific base year (2010=100), increased to 143.6 in the year 2017 from 132.8 recorded in the year 2016, indicating 8.2 percent of inflation rate for the

year 2017. According to the Colombo Consumer Price Index (CCPI) (2013 = 100), it has increased to 119.0 in year 2017, from 111.7 recorded in the year 2016, indicating a 6.5 percent of inflation rate.

Performance of major Economic activities in 2017

Agriculture Activities

In the year of 2017 the main activity of 'Agriculture, forestry and fishing' shrank by 0.4 percent, when compared with the respective year of 2016. In the year 2017, the share of the Agriculture, forestry and fishing has contributed 7.8 percent to the total GDP at current price and this share is relatively low when compared with the Industry and Services activities. The sub activities of, 'Growing of vegetables', 'Growing of tea' and 'Growing of oleaginous fruits including coconut', 'Growing of spices', 'Animal production', 'Forestry and logging', and 'Marine Fishing' have contributions in a range of 0.6 to 1.2 percent to the total GDP.

The highest share of 1.2 percent was reported by Marine fishing and marine aquaculture activity.

Annual growth rates of agricultural sub activities are shown in Figure 1.9. 'Forestry logging', 'Fresh water fishing', 'Growing of fruits', 'Animal production', 'Growing of rubber' and 'Growing of tea' have recorded striking positive growth rates. In the meantime the sub activities of, 'Growing of oleaginous fruits including 'Growing of other cereals' coconut', 'Growing of rice', 'Growing of vegetables, and 'Marine Fishing' activities reported negative growth rates.

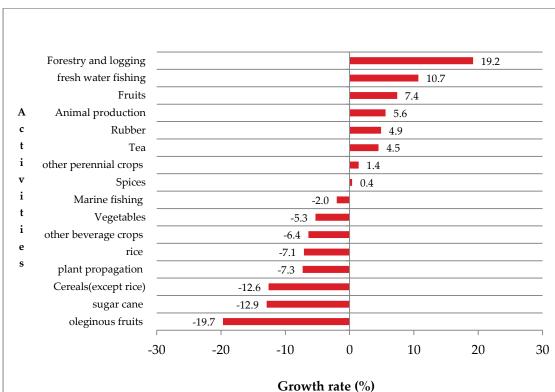

Figure 1.9: Agriculture - Growth rates by economic activity (2017)

Industry Activities

The Industry activity, which is the second largest contributor towards in expanding the economy and it contribute nearly 27.3 percent to the total GDP in 2017, recorded a striking growth rate of 4.1 percent. Mining and quarrying activities has expanded by 9.1 percent in 2017 compared to 2016. Construction sector has expanded further by 4.3 percent in 2017. Overall manufacture activities have reported an increase of 3.3 percent, while 'Non Metallic Mineral Products', 'Basic metals and fabricated metals', 'Rubber and plastics', reported striking growth rates of

13.1 percent, 12.6 percent and 11.3 percent in 2017. The major contributors in manufacturing sector, 'Food Beverages and Tobacco' and 'Textile and wearing apparels have reported a contraction of 0.9 percent and an expansion of 3.8 percent respectively in 2017 compared to 2016. Refined petroleum shows the highest contraction in industrial activities in 2017.

The 'Sewerage and waste treatments', 'Water collection and treatments' and Electricity' activities showed an increase in growth rates by 7.9 percent, 4.6 percent and 2.6 percent respectively (figure 1.10)

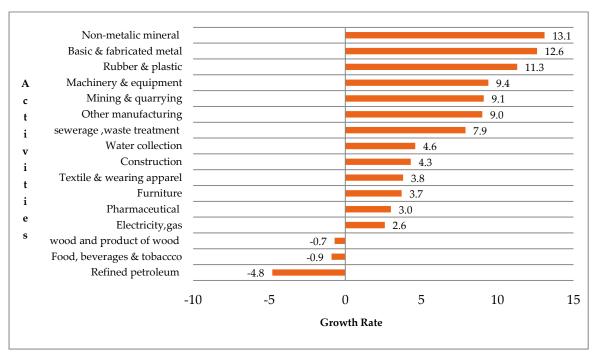

Figure 1.10: Industry - Growth Rates Of Economic Activity For 2017

Services Activities

The Service activity, which is the major contributor to the GDP, has reported a growth rate of 3.6 percent for the year 2017 compared to the growth rate of 4.8 reported in 2016. In the year 2017, an outstanding growth rate of 12.2 percent is recorded by

'Telecommunication 'services. Both 'Financial service activities' and 'Health' services also reported striking growth rates of 9.4 percent and 7.2 percent respectively in 2017 compared to the 2016 (Figure 1.11)

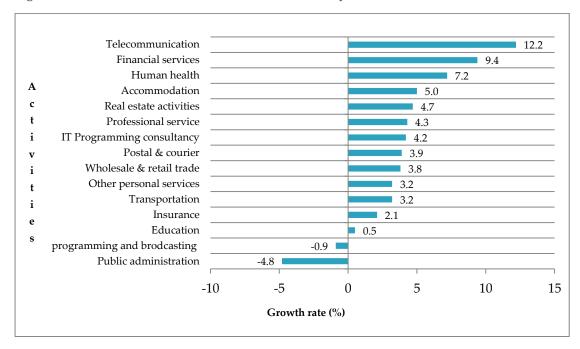

Figure 1.11: Services - Growth rates of economic activity for 2017

The major contributors of service sector, 'Wholesale and retail trade', 'Transportation' and 'Other Personal has further expanded by 3.8 percent, 3.2 percent and 3.2 percent in year The wholesale and retail trade contributes nearly 10.5 percent to the overall GDP in year 2017. It's one of the largest economic activity which generate considerable amount of value addition to the economy, has expanded continuously over the last few years. The wholesale and retail trade activity considers the valued addition created through the domestic trading activities.

According to the Balance of Payment Statistics of Central Bank of Sri Lanka, the annual total import expenditure for the year 2017 has increased up to Rs.3,198,572 million from Rs.2,794,393 million recorded in the year 2016, indicating an increase of 14.5 percent in annual total import expenditure. According to the trade indices, the import

volume index of consumer goods has increased by 6.9 percent, during the year 2017. In addition, the total trading output value of Agriculture, forestry and fishing activity has increased by 9.6 percent in the year of 2017 when compared with the year 2016. The total trading output value of Industrial activities has increased up to Rs. 835,875 million from Rs.781,922 million in the year 2017 indicating an increase of 6.9 percent.

Accommodation and Food and Beverage Serving activity grew by 5 percent in this year compared to 2016. Real estate activities, Professional services, IT programming and consultancy, Postal and courier services also have expanded in 2017 compared to 2016

Only two activities has reported contractions in the service sector in 2017 compared to the previous year of 2016, the service of 'programming and broadcasting by 0.9 percent and 'public administration' by 4.8 percent.

Chapter 2: Detailed Review of Economic Activities

In this chapter the performances of economic activities in Agriculture, Industry and Service sectors in year 2017 are broadly discussed. Mostly, they are compared with 2016 annual data. In many data tables the base year (2010) values are also included for the reference.

Overall Agricultural activities has added Rs 642,366 million to the Sri Lankan Economy in 2017, reporting further contraction of 0.4 percent compared to the considerable contraction of 3.7 percent recorded in 2016. The contraction of few agricultural activities in year 2017 has been the main reason for this trivial contraction.

Among them, the sub activity of 'Growing of rice' has declined substantially by 7.1 percent during the year 2017. 'Growing of oleaginous fruits, including Coconut' has severely affected by dry wheather prevailled in the coconut growing areas including the coconut triangle, which reported a heavy contraction of 19.7 percent in 2017. 'Growing of vegetables' also heavily affected with bad wheather and recorded a considerable drop of 5.3 percent. 'Marine Fishing' which carried out the highest share of 1.2 percent in agriculture activities, also reported a contraction of 2.0 percent in 2017 due to unfavourable marine wheather conditions. In addition, compared to year 2016, the growth rates of 'Growing of other non perennial crops including suger cane and tobacco', 'Growing of cereals (except rice)', 'Growing of other beverage crops' have declined substantially by 12.9 percent, 12.6 percent and 6.4 percent respectively in year 2017.

Meanwhile, several major agriculture activities reported expansions in this year .

Mainly 'Growing of Tea', 'Growing of Rubber', 'Growing of Fruits', 'Forestry and Logging', 'Animal production' fishing' 'Freshwater have reported considerable growth rates as 4.5 percent, 4.9 percent, 19.2 percent, 5.6 percent and 10.7 percent respectively in 2017 compared to 2016. Ninty percent of the total output Agriculture, Forestry and Fishing sector is produced for the market and 10 percent is used the 'own use'. Only 'Growing of rice', 'Growing of coconut' and 'Forestry and logging' activities reported more than 20 percent of the output used for own use. Generally 80 percent of the gross value added of agricultural activities comes through the household sector. However 35 percent and 66 percent of value additions of 'Growing of tea' and 'Animal production' come through the NFCs.

The industrial activities have healthily expanded further by 4.1 percent in 2017 compared to 2016. The total contribution of Industry activities to the GDP is recorded as Rs. 2,495,721 million. The 'Construction' activity, the highest shareholder of industrial activities, has further grew by 4.3 percent in 2017. The sub activity of 'Mining and quarrying' also has expanded further by 9.1 percent in 2017 compared to the high growth rate of 13.8 percent recorded in 2016.

During the year of 2017, the manufacturing activities alone has contributed Rs.1,448,383 million to the total GDP, indicating a growth of 3.3 percent compared to 2016. Among the manufacturing activities, 'Manufacture of non metallic mineral products', 'Manufacture of basic metal and fabricated metal products', 'Manufacture of rubber and plastic products', 'Manufacture of

machinery and equipment', 'Other manufacturing' and 'Manufacture of textile and wearing apparels' reported an out standing growth rates of 13.1 percent, 12.6 percent, 11.3 percent, 9.4 percent, 9.0 percent and 3.8 percent respectively.

However, 'Manufacture of food, beverages and tobacco products' which is the highest contributor of manufacturing sector, has recoded a slight contraction of 0.9 percent in year 2017. Similarly 'Manufacture of wood and products of wood' and 'Manufacture of coke and refined petroleum products' showed contractions of 0.7 percent and 4.8 percent respectively compared to the high growth rates of 20.3 percent and 7.5 percent respectively recorded in 2016. The value added of 'Electricity', 'Water collection, treatment and supply' and 'Sewerage, waste, treatment and disposal activities' also have expanded by 4.1 percent, 4.0percent and 7.0 percent respectively over the period of 2017.

The service activities has contributed Rs. 5,311,307 million to the total GDP in 2017.

All the service activities except 'Public administration and defence' have expanded during 2017 which make an overall increase of 3.6 percent when compared to the year 2016.

The outstanding performances reported by 'Telecommunication', 'Financial service activities', and 'Health activities' which grew by 12.2 percent 9.4 and 7.2 percent respectively in 2017 when compared to 2016. The other main activities underpinned the service sector are 'Accomodation','Real estate', 'Professional services' and 'IT programming, consultancy and related activities' which reported significant growth ratesc of 5.0 percent,4.7 percent, 4.3 percent, 4.2 percent respectively compared to previous year. The highest contributors to the service sector, the 'Whole sale and retail trade' and 'Transportation of goods and passengers including ware houses' have recorded expansions of 3.8 percent and 3.2 percent respectively.

Performance of Agricultural

Activities

Growing of Cereals

In year 2017, the activity of 'Growing of Cereals' has contributed Rs. 18,241 million and Rs. 11,503 million to the gross domestic product at current market prices and constant (2010) market prices of the country sharing 0.1 percent of GDP at current market price, Figure 2.1 shows the comparison of production and value added given by main cerials in 2017. The highest Production of 74 percent is recorded by 'Maize' in cereal

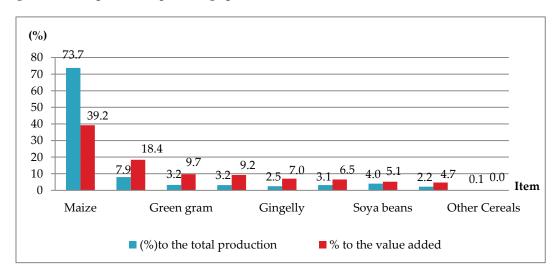

production. But compared to 2016 where the maize production has heavly declined by 12.2 percent in 2016, and it has further dropped by 12.6 percent in 2017. Percentage change in GDP implicit price deflator which indicates the impact of price effect on the activity has also reported a significant increase of 26.4 percent in 2017 compared to 2016 (

Table 2.1).

Table 2.1: Major economic indicators of 'Growing of Cereals' (2010, 2016 and 2017)

Growing of Rice

Rice is the staple food in the country. It's a non-perennial crop, growing in all districts of the country. Rice is regarding as a seasonal crop based on North-East and South-West monsoon rains. The share of 'growing of rice' has been increased to 0.7

percent to the total GDP in 2017. The value added of 'Growing of Rice' has reported a further decrease of 7.1 percent in year 2017 compared to the heavy decrease of 31.3 percent reported in 2016 (

Table 2.2).

Table 2.2: Major economic indicators of 'Growing of Rice' (2010, 2016 and 2017)

Figure 2.2: Paddy Production by Province in 2016 and 2017

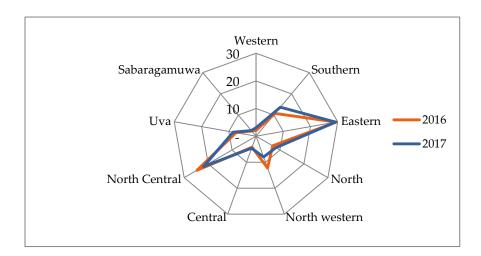

Figure 2.2 shows the comparison of paddy production by province in 2016 and 2017. Though the Southern province reported an expansion of 19 percent of paddy production in 2017 compared to 2016, heavy

contractions of 39 percent and 17 percent reported in North-Western and North-Central provinces respectively which has been the main reason for further drop of production reported in 2017 compared to 2016. The highest paddy production in 2017 is reported from the Eastern Province of Sri **Growing of vegetables**

The gross value added of 'Growing of vegetables' contributed 0.7 percent of the GDP in 2017 but reported a contraction by 5.3 percent in its real gross value added. Further, this activity added Rs. 55, 240 million to the total GDP in real terms in

Lanka.

2017(Table 2.3). According to the quantity produced in 2017, the five main vegetable items reported were Manioc, Green leaves (mugunuwenna and gotukola collectively), Brinjals, Cabbage and Red pumpkin.

Growing of Oleaginous Fruits

The activity of 'Growing of oleaginous fruits' mainly consists of growing of coconut. The gross value added to the GDP in this activity decreased from Rs.66,971 million reported in 2016 to Rs.53,773 million in 2017, recording a huge decrease of 19.7 percent. The percentage share of this activity to the GDP in 2017 incressed to 0.8 percent compared to 0.6 percent stated in 2016 (Table 2.4). Total coconut production of the country has

gradually contracted from the first quarter to the fourth quarter of 2017 (Figure 2.3) and reported a reduction of 561,470 thousand nuts in year 2017, compared to year 2016. The main reason was the drought started in mid-2015 in coconut growing areas which was negatively affected on coconut production and resulted a downward trend in 2017 (Figure 2.3)

					'@-Provisional

Table 2.9 shows the producer prices of each item in 2010, 2016 and 2017 and the price change between 2016 and 2017. Price of a cow has increased by Rs.20, 000 from 2010 to 2017. The price change of a cow between year 2016 and 2017 is around 10 percent. When compared to 2016, the highest price change occurred in Goat by 17 percent. Prices of Goat tend to increase rapidly throughout the period from 2010. In 2017, The average price change of an egg has decreased by 12.6 percent compared to year 2016. The producer price of one liter of milk in 2010 has

almost doubled in 2017. The price increase between 2016 and 2017 was reported as 12.8 percent.

The pattern of milk production and eggs production of the country in the period of 2010-2017 is given in

Figure 2.10. These two industries have shown a gradual increase within the period of 2010-2017. When compared to 2016, in year 2017 both Milk and Eggs production of the country has expanded healthily by 3.2 percent and 0.6 percent respectively.

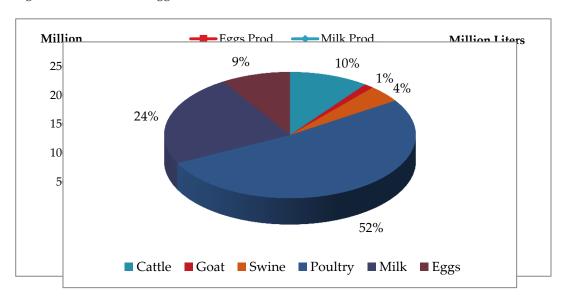

Figure 2.10: Milk and Eggs Production (2010-2017)

Figure 2.11: Share of sub activities of animal production to the GDP in 2017

Figure 2.11 shows the share of sub activities to the 'Animal Production' in 2017. Almost fifty percent of the current

value added of Animal production is shouldered by the poultry industry. Poultry industry reported an increase of 10 percent during 2017 compared to 2016. It is interesting to note that cattle slaughtering has reduced by 4 percent during the period of 2016-2017. Milk and Eggs production shoulder 33 percent of

services to the agriculture

The activity of 'Plant propagation' and activity of 'Support services to the agriculture' jointly added Rs.14, 374 million and Rs.9,459 million to the GDP in nominal and real terms respectively in year 2017 (

Table 2.10). Both these activities reported further contraction in 2017 compared to 2016, where both activities together furnished a negative growth rate of 7.3 percent.

The activity of 'Plant Propagation' mainly includes the nursery productions of Coconut, Rubber, Tea, Fruits, Flowers and

value added of animal production activity (Figure 2.11).

Plant propagation and support

main Minor Export Crops: Cinnoman and that used for propagation activities in the country. Large amount of plant saplings produced from respective government nurseries have been used for many government projects. Compared to year 2016, the dry weather conditions prevailed throughout the country, adversely affected the production of plant saplings of all items in 2016.

The Support services to the agriculture also has reported a decrease in 2017 when compared to 2016. The down-turn production of maize in this year was the main reason for this drop.

Figure 2.13 shows the deep sea production and coastal production of marine fishing during 2010-2017. In year 2017 coastal fish production has decreased by 3.5 percent while the deep sea fish production has increased by 3.8 percent.

'Inland fishing and inland aquaculture' activity has also increased considerably by

10.7 percent in year 2017. According to the reports of Ministry of Fisheries and Aquatic Resources Development, high production in the dry zone was reported in year 2017 was a result of dry whether conditions prevailed in inland tank areas in the respective districts.

Figure 2.13: Coastal and Deep sea fish production (2010-2017)

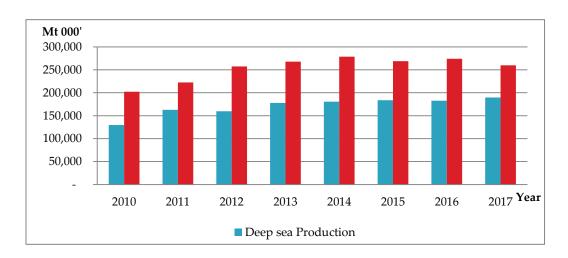

Performance of Industry activities

A one third of the Sri Lankan economy was completed by the industry sector. These industry activities comprised with 'Manufacturing activities' the principal shareholder of industry sharing 58.5 percent along with 'Construction', 'Mining and quarrying', 'Electricity and related activities' and 'water and sewerage collection, treatment and supply'. Industry activities altogether grew by 4.1 percent in 2017 and added Rs. 2,495,721 million to the gross domestic product in real terms. The share to the GDP in 2017 was reported as 27.3 percent (Table 2.13). When considering the sector wise performances,

Non-financial corporations were the main performer in industry sector, which grew by 10.0 percent in 2017 (Table 2.14). Government sector showed a recession of -21.6 percent in 2017 when compared to 2016. The highest share of 62.4 percent of industry is hold by NFCs' while 'Households and NPISH' together shared 36.0 percent. The remaining 1.5 percent was shared by the government sector The Lion's share of the output of the industries is produced for market 96.7 percent and only residual 3.3 percent produced for own use in 2017.

Manufacturing industry

Manufacturing industry sector comprises with 24 ISIC categories. Data was collected by 'Quarterly Survey of Industries' and 'Annual Survey of Industry. The dissemination categories were 'Manufacture of Food, beverages & Tobacco products', 'Manufacture of Textiles, wearing apparel and leather related products', 'Manufacture of Wood and products of wood and cork, except furniture', 'Manufacture of Paper products, printing and reproduction of media products', 'Manufacture of Coke and refined petroleum products', 'Manufacture Chemical products and basic pharmaceutical products', 'Manufacture of Rubber and plastic products', 'Manufacture of Other non- metallic mineral products', 'Manufacture of Basic metals and fabricated

metal products', 'Manufacture of Machinery and equipment etc.', 'Manufacture of Furniture, Other manufacturing, and Repair and installation of machinery and equipment'.

The major economic indicators are shown in Table 2.16. The share of these activities to the total GDP was reported as 16.0 percent in year 2017.

The overall Manufacturing industry sector contributed Rs 1,448,383 millions of value addition at real terms to the total GDP in 2017.

It indicated a 3.3 percent growth in 2017 compared to 3.0 percent growth in 2016. The major manufacturing category of

Manufacture of Food, beverages & Tobacco products, which showed a recession of 0.9 percent in 2017 as opposed to 0.2 percent growth in recoded in 2016. In year 2016, the sub sector of manufacture of textiles, wearing apparel and leather related

products, reported 2.2 percent growth rate. It further grew 3.8 percent in 2017.

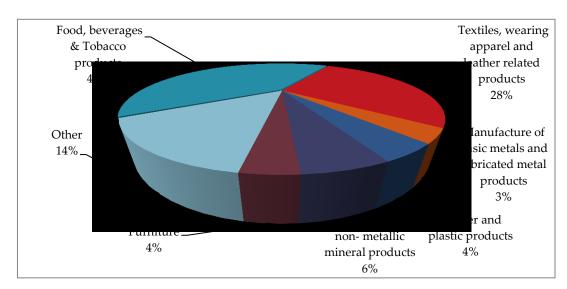

Figure 2.19 : Share of main manufacturing Items to the total value added of manufacturing sector - 2017

Comparison of growth rates of main manufacturing activities were shown in Figure 2.20. When compared to the 2016, the sub activity of 'Manufacture of rubber and plastic products further grew by 11.3 percent in 2017 from 1.2 percent in 2016. 'Manufacture of chemical products and

basic pharmaceutical products' showed a positive growth of 3.0 percent in 2017 in comparison to the growth of 8.3 percent reported in 2016. 'Manufacture of basic metals and fabricated metal product' grew by 12.6 percent in 2017 compared to high growth rate of 33.2 percent reported in

2016.

When compared with year 2016, the sub activity of 'Manufacture of machinery and equipment products' further expanded by 9.4 percent in year 2017. In year 2016, this activity reported as 20.0 percent high growth rate.

The significant growth rate of "Manufacture of rubber and plastic products' has increased in 11.3 percent in year 2017, compared to 1.2 percent increase reported in 2016.

Electricity

Electricity, generation, transmission and distribution activity further grew by 2.6 percent in year 2017 along with 8.4 percent growth reported in year 2016. The share of this activity to the total GDP was reported as 0.7 percent in year 2017.

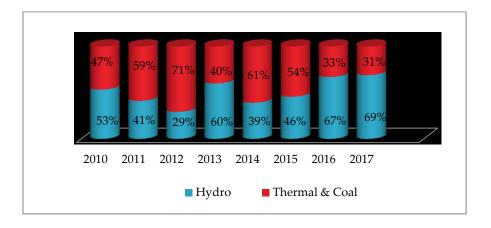

This growth in GVA was clearly reflected by the generation increase which reported as 8.8 percent in 2016 and 2.9 percent in 2017 The total electricity generation of the country increased to 14,671 GWH in 2017 from 14,250 GWH in 2016. CEB contributed 75.6 per cent to the total power generation in 2017, while the remainder was purchased

from the independent power producers (IPPs). Electricity generation continued to expand with a higher dependence on thermal power generation during 2017. The excited ratio of 33:67 hydro and thermal power generation in the year 2016 has changed 31:69 in this year. The fuel and coal based power generation has grown by 6.7 percent in 2017. The hydro power generation contracted by 2.54 percent in 2017. Electricity sales grew by 26.1 percent during the year. The increase in electricity sales was mainly driven by the industry, general-purpose and domestic sectors.

Construction

The second largest activity of the industry sector, 'Construction' has shared 7.8 percent of total gross domestic product of the country in year 2017. It has reported positive growth rate of 4.3 percent in real terms in 2017. In nominal terms the gross value added of construction industry has increased by 11.3 percent. Construction activities included the construction of

buildings, highways, bridges, water supply and drainage systems, irrigation and land, dredging and reclamation and other activities regarding construction. The total cement availability of the country grew by 6.26 in 2017. Local cement production grew by 4.58 percent while cement imports has increased by 7.12 percent.

Performances of Services

Activities

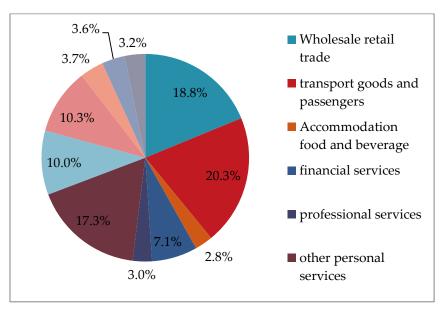

The Service sector was the key benefactor of the economy, sharing 56.8 percent of the total GDP, grew by 3.2 percent in the year 2017. Fifteen major sectors from section G to section U which contain 55 sub-groups under ISIC classification revision 4.0 were formally amalgamate together and disseminated under 15 service activity groups in the GDP production account in the new series. The total value added of

service sector was reported as Rs. 8,211,616 and Rs. 5,560,849 million at nominal and real terms respectively in year 2016.

Figure 2.22: share of main services activities to the total GVA of Service sector 2017

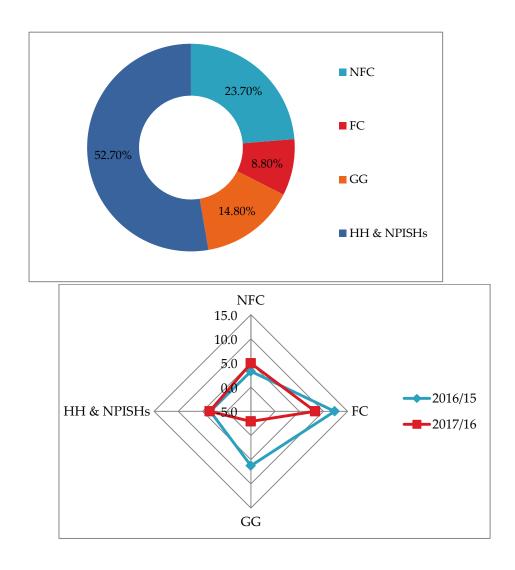

The 'Transportations of goods and services including warehousing' comprises the highest share of 20.3 percent of total gross value added generated by service sector trailed with 'wholesale and retail trade'

services with 18.8 percent and 'Other personal services activities' with 17.3 percent (Figure 2.22). The other main components were 'public administration and defense; compulsory social security'

'real estate activities including ownership of dwelling' and 'financial services and auxiliary service activities' which encompasses of 10 percent, 10.3 percent and

7.1 percent respectively. All other service activities collectively share 16.2 percent of gross value added of service sector in nominal terms in year 2017.

Figure 2.23: Percentage growth in GDP by institutional sectors, 2017

The institutional sector breakdown in service sector showed that 52.7 percent of value added household/NPISH generated from

Figure 2.24) in year 2017. 23.7 percent of the GVA generated by services sector, is shared by the NFC sector. The gross value added generated by financial institutions grown by

8.3 percent in year 2017, compared to the 12.3 percent of growth recorded in the year 2016 (Figure 2.23).

Figure 2.24: Sectorial share in service sector, 2017

Wholesale and retail trade

The wholesale and retail trade which contributes nearly 10.5 percent to the overall GDP, grew by 3.8 percent in the year 2017. It's one of the largest economic activity which generate a considerable amount of value addition to the economy, expanded continuously over the last few years.

The wholesale and retail trade activity considers the value addition created through the domestic trading activities. Domestic trading activity is consisted by the trade of imported goods and trade of domestically produced goods. Accordingly, the value addition is generated through the trading of these goods domestically. Hence, the value added of wholesale and retail trade activity is affected by fluctuations in total imports and total domestic production. Consequently the growth rate of this activity is depended on the variations in the three variables of Imports, Agricultural production and Industrial production.

According to the Balance of Payment Statistics of Central Bank of Sri Lanka, the

annual total import expenditure for the year 2017 has increased up to Rs. million 3,198,572 from Rs. million 2,794,393 recorded in the year 2016, indicating an increase of 14.5 percent. According to the trade indices, the import volume index of consumer goods has increased by 6.9 percent, during the year 2017. However among the consumer goods, import volume indices of these categories namely cereals, dairv products, oils & fats, telecommunication devices and household and furniture items have increased during this period, when compared with the year 2016. Increase in the imported consumer goods may have direct impact on domestic trading activities.

In addition, the total trading Output value of Agriculture, forestry and fishing activity has increased by 9.6 percent in the year of 2017 when compared with the year 2016. The total trading output value of industrial activities has increased up to Rs. Mn. 835,875 from Rs. Mn. 781,922 in the year 2017 indicating an increase of 6.9 percent.

Table 2.20: Major Economic Indicators of Wholesale and retail trade

						@ Revised

Accordingly, wholesale and retail trade activity generated Rs. Mn. 993,471 worth of gross value added at constant price to the economy in the year 2017. It contributed to the overall GDP by 10.5 percent and when compared with the previous year, the GVA of this activity grew by 3.8 percent.

Transportation and storage

Transportation and storage activity has expanded by 3.2 percent in 2017 compared to the 5.5 percent growth reported in 2016 adding Rs.1,013,792 million to the gross domestic product of the country in real terms. The share was stated as 11.3 in 2017.

The number of new registration of buses showed 24.1 percent increase in year 2017. Registration of lorries increased by 55.6 percent. New registration of motor cars displayed a negative growth rate of 13.3 percent in year 2017. Three wheeler registrations also reported a 58.7 percent decrease within the 2017. (Figure 2.25).

The public transport mainly comprise with railway, SLTB and private buses and three wheelers. The passenger kilometers operated by Sri Lanka Railway and Sri Lanka Transport Board decreaced by 3.2 percent and 2.5 percent respectively during the year 2017. An 1.3 percent decrease was reported for daily operated SLTB buses in year 2017.

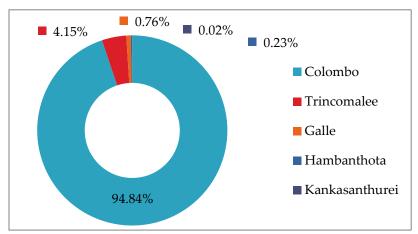

The passenger kilometers operated by Sri Lankan airways increased by 8.6 percent in year 2017, against the 0.8 percent decrease reported in year 2016.

Table 2.21: Major Economic Indicators of Transportation and Warehouse, 2010-2016

The cargo handling was mainly operated by five commercial ports: Colombo, Trincomalee, Galle, Hambantota, Kankasanthurei and the total number of Meanwhile the trans-shipment containers (Twenty Foot Equivalent Units-TEUs '000) expanded from 4,355 in year 2016 to 4,742 in year 2017 indicating 8.9 percent increase

ships arrived to these ports were dropped from 4,405 in 2016 to 4,329 in 2017, denoting 1.7 percent decrease. The total cargo handled by these ports was expanded by 8.5 percent in year 2017. Colombo the premier port handled95percentoftotalcargo().

throughout the period. Further, freight ton transported by Sri-Lanka Railway showed an increased of 0.7 percent. The freight tons kilometers flown by Sri Lankan Air lines by 5.3 percent in year 2017, compared to year 2016

Accommodation, food and beverage serving activities

Under the new National Accounting framework (Base year, 2010) this activity is being compiled considering two main economic activities. According to the

International Standard of Industrial classification Revision 4, this industry is identified in two major economic categories. One is Accommodation activities and the

other one is food and beverage service activities. However in the compilation process, these were compiled as one category due to insufficient data sources related to domestic food and beverage serving activities.

The Output of Accommodation, food and beverage serving activity is estimated based on the Output related data of quarterly and annual value added tax, which is provided by the Department of Inland Revenue, related to this economic activity. In addition, some important indicators related to the tourism industry in Sri Lanka, like room occupancy rate in tourist hotels, total of foreign and local guest nights, monthly and annual tourists arrivals, total number of supply tourists hotel units, total supplementary accommodation units and accommodation capacity which provided by the Sri Lanka Tourism Development Authority, are also being considered.

The Accommodation, food and beverage serving activity altogether contributed to the

economy Rs. 146,431 Million worth of gross value added at constant price, during the year 2017. It is 5.0 percent of growth, when compared with the previous year. The estimated output of this industry has expanded over the past six years.

When observe the performance of the other leading indicators in tourism industry the number of tourist arrivals, during the year 2017, has increased by 3.2 percent. However, the room occupancy rate calculated related to the graded hotels, motels and guest houses which are registered members under Tourism Development Sri Lanka Authority, have decreased slightly up to 73.3 in the year 2017, from 74.8 recorded in 2016. In addition, total foreign guest nights and local guest nights recorded at all tourist's hotel have been grown substantially by 9.6 percent and 4.5 percent respectively during the year 2017, when compared with year 2016. During this period, room capacity of hotels tourist supplementary and accommodation units have also been increased remarkably, recording 6.1 percent and 8.4 percent growth rates respectively.

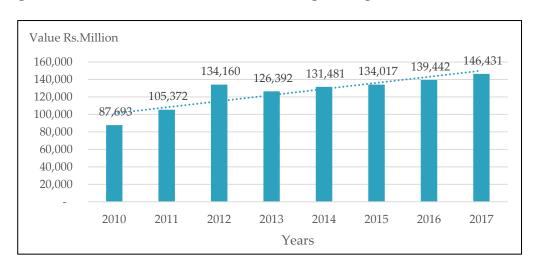

Figure 2.27: GVA of Accommodation, food & beverage serving at Constant Prices

Telecommunication

The telecommunication industry significantly grew by 12.2 percent in 2017,

beside 8.3 percent growth reported in 2016. The total values added to the GDP in

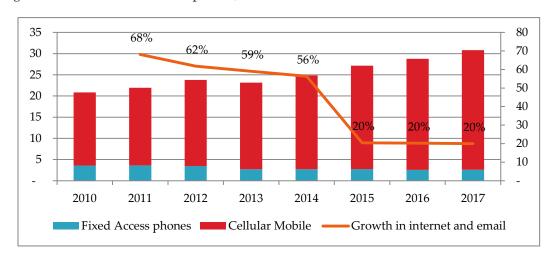

nominal and real terms were Rs.67,355 million and Rs. 41,502 million,

respectively. The share to GDP was reported as 0.5 percent.

Figure 2.28: Total number of telephones, mobile and fixed (2010-2017)

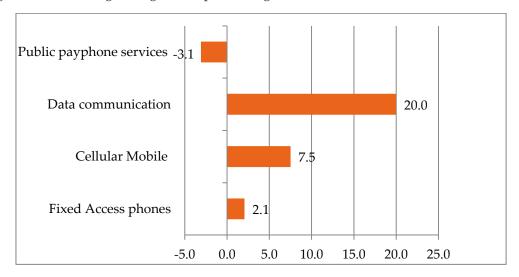

Telecommunication activity experiences a relatively high growth in the past four years. The total telephone penetration has almost clocked the 30 million milestone. The

demand generated mainly through cellular mobiles where the proportion of fixed phones to cellular mobiles were reported as 08:92 in year 2017. The use of cellular mobile phones in 2017 has increased by 7.5 percent, while fixed access telephones showed a 2.1 percent increase compared to year 2016 (Figure 2.26). The internet and email subscribers are continually increasing from 0.5 million in 2010 to approximately 5

million in 2017 while registering 20.0 percent growth in 2017.

Figure 2.29: Percentage change in telephone usage 2017/2016

IT programming consultancy and related activities

Information and communication industry is one of the most emerging industry in Sri Lanka. Over the last decade, it has made significant progress in the industry. The export revenue earned, total employment engaged and the number of companies in the industry have been grown remarkably during the past decade. In addition, in the recent past, the global ranking position for Sri Lanka in the information technology industry has improved significantly.

In the year 2015, during the National Accounts Estimates Rebasing project (Base year 2010), new compilation categories were introduced to the GDP compilation process under the production boundary expansion of GDP. IT programming consultancy and related activities was a key compilation category among the

newly introduced compilation categories to the GDP system.

According to the ISIC Rev.4, this industry mainly covers two broader areas of IT industry. ISIC code 62 constitutes all the activities related computer to programming and consultancy related activities. ISIC 63 covers information services activities. Accordingly, activity mainly constitute by computer programming activities, computer consultancy and computer facilities management activities, other information technology and computer service activities, data processing, hosting and related activities and web portals. Based on Value Added Tax data provided by the Department of Inland Revenue, related to

IT industry in Sri Lanka, the national level total output was estimated.

Accordingly estimated output for the year 2017 was Rs. Mn. 25,051 at nominal term.

The generated value added for this industry increased up to Rs. Mn. 13,564 in the year 2017, from Rs. Mn. 13,015, resulting a positive growth rate of 4.2 percent.

Financial services and auxiliary financial Services

Financial and auxiliary financial activities showed a significant growth of 9.4 percent in the year 2017 compared to 12.3 percent growth reported for the year 2016. The generated gross value added at real terms was recorded as Rs.606459 million.

The banking sector is the most important sub sector in this activity, consisted with 25 Licensed Commercial Banks, including 13 domestic and 12 foreign banks and 7 licensed specialized banks.

Total number of bank branches and other outlets operative throughout the island were reported a increse and recorded as 6213 for the year 2017. The automated

teller machine services have expanded virtually by 568 new machines by year 2017.

Figure 2.30: Comparison of main items in assets and liabilities 2016-2017

The assets of the banking sector has reported 13.8 percent expansion over the past year reaching 8.9 trillion in year 2017 compared to 7.8 trillion recorded for year 2016 (Figure 2.30). Sixty three percent of the assets comprises with Gross loans and advances which extended to all major activities in the economy covering agriculture and fisheries, manufacturing, construction and trade services, extended by 16.1 percent in year 2017 compared to year 2016. Investment

which accounted for 24.8 percent of total assets grew by 13.8 percent during the year 2017. Total borrowings recorded a 15.6 percent growth during year 2017. When considering bank deposits, which consist mainly with time deposits, saving deposits and demand deposits, grew by 17.6 percent in year 2017. The 9.3 percent growth rate was reported by saving deposits and 3.5 percent growth reported by demand deposits.

Insurance and pension funding

Insurance and pension funding activity grew by 2.1 percent in the 2017 compared to 12.4 percent growth recorded in the 2016. The value added generated by this activity in nominal and real terms were Rs.143,844 million and Rs.94,088 million respectively during the 2017.

This activity comprises with local and foreign insurance companies and pension funding boards. Consequently twenty three local insurance companies, four foreign companies, Employee's Provident Fund and Employees Trust Fund were belong to this activity in 2017.

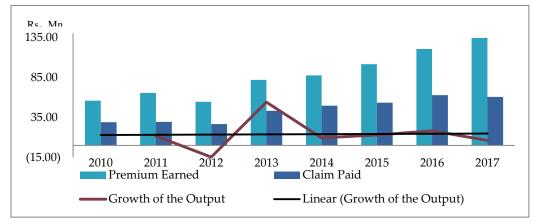

The premium earned in insurance activity grew by 11.5 percent where as claims incurred dropped by 3.6 percent in year 2017 compared to 2016. The gross output of this industry mainly based on the difference

between premiums earned and claims paid. The investment income and the other income generated by insurance companies were also accounted for the gross output.

Real estate activities including ownership of dwellings

The 'Real estate activities including ownership of dwellings' consist with two sub activities 'Real estate activity' and 'Ownership of dwellings'. This activity further expanded by 4.7 percent at constant (2010) during the year 2017. It has added Rs.770,243 million and Rs.544,726 million in nominal and in real terms respectively to the total GDP in 2017, compared to Rs.690,146 million in nominal and Rs.520,080 million in real terms respectively in 2016 (Table 2.26). In sector wise comparison, value addition of

household: non-financial companies reported as 82:18 percent in 2017.

The ownership of dwellings was estimated using the average monthly housing rent. The highest percentage increase of 7.1 percent was reported in estate sector trailed by rural and estate sectors by 6.6 percent and 5.1 percent respectively. The average housing rent for Sri Lanka was estimated as Rs.7,100 in year 2017 and the annual increase is

reported as 6.8 percent when compared to

year 2016.(Figure 2.32).

Professional services

Professional services are another new compilation category introduced to the national accounting system under the rebasing project (Base year 2010). The sub activity of 'Professional service' is a combination of eight compilation categories. It is mainly comprised by 'Legal and accounting activities', 'Architectural and engineering activities', 'Scientific research and development', 'advertising and market research, other professional, scientific and technical activities and publishing activities', 'Veterinary activities', 'Rental and leasing

activities', 'Employment, travel agency, security and investigation activities' and 'Services to building and landscape activities'. Professional services take into account the value addition generated through all these economic activities. The total output values of these economic activities are estimated based on the value added tax national level data released by the Department of Inland Revenue.

All these economic activities which are coming under professional services contributed to the overall GDP averagely by 1.7 percent. Accordingly the reported gross value added for the year 2017 was Rs. Mn. 158,754. It has grown by 4.3 percent when

compared the GVA generated in the year 2016.

Other personal services

The Other personal services activity is one of a largest sub sector among service industry activities and has grown by 3.2 percent during the year 2017. The sub activity of 'Other personal service activities' which is also a combination of two compilation categories' and is comprised by 'Arts entertainment and other recreation activities' and 'other personal service activities' mainly. These activities are mainly constitute by creative, arts and entertainment activities, gambling, betting, sports activities and recreation activities, repair of computers and personal household goods, washing, dry cleaning, hair dressing, other beauty treatment, funeral related activities and other personal service activities.

The output value of this activity was also estimated by using the national level value added tax data released by the Department of Inland Revenue. The other personal services, all together contributed nearly 9.6 percent to the overall GDP and in past few years it has expended continuously. All these activities have generated Rs. Mn 913,573 million worth of value added to the overall economy in the year 2017.

Chapter 3: The Expenditure Approach

Introduction

The expenditure approach measures total expenditure on final goods and services produced in the domestic economy plus exports less imports of goods and services. The total is obtained from the sum of final consumption expenditure by households, non-profit institutions serving households (NPISH) and government on goods and services; gross capital formation (capital expenditure on fixed and intangible assets, changes in inventories and acquisitions less disposals of valuables); and net exports of goods and services.

GDP expenditure is a sum of the following expenses;

GDP(E) = C + G + I + (X - M)

C – consumption expenditure

G - government expenditure

I – investment/capital formation

(x-m) – net exports

x Consumption Expenditure

Consumption expenditure is the major expenditure component of the economy, Thus, final consumption is broken down into:

- consumption expenditure a) Final of households;
- b) Final consumption expenditure of general government;
- c) Final consumption expenditure of nonprofit institutions serving households.

Note that, in the SNA, 'final consumption' by the corporate sector is not admissible.

x Final consumption expenditure of households

The final consumption expenditure of households encompasses all domestic costs residents and non-residents) individual needs. Among other things, it includes expenditure on goods and services, the consumption of garden produce, rent for owner-occupied dwellings and imports. Information on consumption expenditure contains according to the Classification of individual consumption purpose by (COICOP).

Actual Final Household Consumption Expenditure

The value of goods and services that the household consumed or used.

This includes:

a) Household consumption expenditure.

b)Social transfer in kind from general government and nonprofit institutions.

x Final consumption expenditure of general government

Final consumption expenditure of general government is classified into two parts;

1.Individual Final Consumption Expenditure;

2.Collective Final Consumption Expenditure;

Individual services are essentially 'private' and are available to certain individuals. Collective services are delivered to the entire community such as security and defense, maintenance of law and order and others. Information on consumption expenditure, according to the Classification of Functions of Government (COFOG).

x Final consumption expenditure by nonprofit institutions serving households (NPISHs)

No information is available to help measure the individual consumption expenditure of non-profit institutions serving households (NPISH)

Balance of payments data on transfers to nongovernment institutions may be an important indicator in countries where foreign aid is a major source of funding for NPISHs.

x Gross Capital Formation

Gross Capital Formation (GCF) includes:

- a) Gross fixed capital formation;
- b) Changes in inventories;
- c) Acquisition less disposals of valuables (such as jewelry and works of art).
- x Change in Inventories (CII)

In National Accounts, the difference between the stocks at the end and at the beginning of the accounting period is called 'Change in Inventories'. Inventories includes:

- unsold finished products
- goods for sale with the traders
- unused raw materials (inventories) materials and supplies
- work-in-progress (growing crops, maturing trees and livestock,

uncompleted structures, uncompleted other fixed assets, partially completed film productions and software) and statistical discrepancy between Production GDP and Expenditure GDP.

x Net acquisitions of valuables

This item is very small (see Table 1) and is therefore no more than a curiosity for the macroeconomist. Valuables are goods that are bought not to be consumed or used in production.

x Exports / Imports

Exports and imports between the domestic economy and the rest of the world are transactions between residents and non-residents of an economic territory, regardless of whether there are corresponding physical movements of goods across borders.

Consumption expenditure

Consumption expenditure is the major expenditure component of the economy, which includes Household final consumption expenditure and Government final consumption expenditure. The Final consumption expenditure in real terms recorded the positive growth of 1.8 percent in 2017.

It grew by 10.3 per cent at current prices in 2017 amounting to Rs. 10,513.1 billion compared to 14.0 percent growth recorded in 2016 and 78.3 percent contributes to the GDP. This attributes from Household final consumption expenditure about 69.9 percent.

Household final consumption expenditure

Data Sources and Value indicators

Household final consumption is usually the largest component of GDP expenditure. The main sources of data on household consumption are household income & expenditure surveys, imports of consumption goods, domestic production of consumption goods. For estimating the consumption of electricity, water and gas, data is available with the relevant authorities. The DCS conducts household Consumption and expenditure surveys at 3 year intervals. Expenditure estimates may have to be adjusted to take account of expenditure by residents abroad and expenditure by non-residents in the domestic economy. The balance of payments statistics record these

expenditures in the travel account as travel credits (expenditures by non-residents in the domestic economy) and travel debits (expenditures by residents abroad). Commodity flow methods can be used in cases where there are good data on the supply of products.

Price indicators

CPI components usually provide appropriate deflators for household consumption. Deflation should be carried out at a COICOP level to ensure that. For expenditures by residents abroad and expenditures by non resident in the domestic economy, we have used as the GDP implicit deflator.

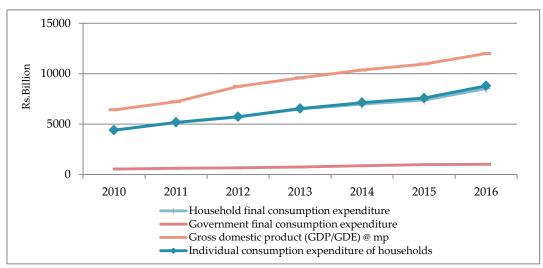

Figure 3.1:Final Expenditure pattern with GDP

Table 3.1 shows that the largest component, household final consumption, represented 69.9 % of GDP in 2017. When adding 'individual' government expenditure such as public education and public health care (2.6 % of GDP), the result is households' actual individual

consumption (73.1 % of GDP). After adding 'collective' government consumption (5.8 % of GDP), covering items as administration, justice, defense or the police, the result is total final consumption expenditure, which accounted for 78.3 % of GDP in 2017.

Table 3.1: Change in GNI and Actual HFCE Per Capita

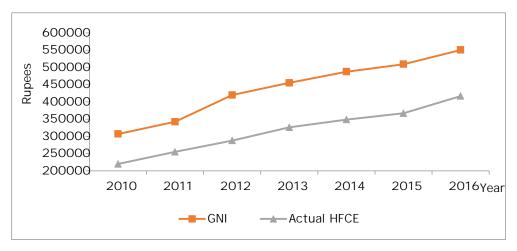

Component	2016	2017@	2017/16 Change %)
Actual Household Final Consumption Expenditure (Rs Mn.)	8,842,169	9,737,759	10.1
Per capita Actual Household Final Consumption Expenditure at Current Prices (Rs.)	417,024	454,102	8.9
GNI Per Capita at Current Prices (Rs.)	550,697	609,281	10.6
			'@ - Revised

While GNI per capita is often considered as an indicator of a country's living standard, it is actually the sum of all goods and services produced in that country. Actual individual consumption per capita is an alternative indicator better suited to describe the material welfare situation of households in the shares of public financing for the provision of education and health services to individuals.

Food, beverages and tobacco category, the major contributor to the HFCE increased

by 6.2 percent in current prices during 2017; compared to 22.3 percent growth in 2016, share of this category is little decreased to 33.1 percent of the HFCE from 34.5 percent in the previous year. But Consumer imported goods for the Food and beverages increased to 18.1 percent during the year compared to the previous year 7.3 percent. Agriculture, Forestry & Fishing activity value added change also significantly increased from negative 0.6 percent to 17.2 percent. Expenditure on Clothing and footwear decreased by 0.4 percent, but this is slight increase in 2016.

Figure 3.2:Per capita GNI & Actual HFCE

Expenditure on Furnishings, household equipment routine household maintenance showed increase by 5.9 percent compared to the previous year high increase 34.5 percent. Consumption on Health increased by 7.4 percent in 2017, It was increased by 11.9 percent in 2016. Imports of and Pharmaceutical Products increased by 3.6 percent where it was 22.5 percent in the year 2016. In the Production approach value added in human health activity increased from 3.5 percent in 2016 to 3.7 percent in 2017 and education expenses also significant increase from 1.2 percent to

8.3 percent for the years 2016, respectively by the government expenses for the private Education increased by 8.4 as same percent but Restaurants and hotels expenditure increased by 11.9 percent. Intermediate Imports of showed high increase by 44.4 percent.

Household expenditure on communication continued increasing a 6.9 per cent change in 2017 when compared to 11.2 percent change in 2016. Production of Telecommunication services increased by 18.9 percent to 0.8 percent from 2016 to 2017.

Table 3.2 :Composition of Individual Final Consumption Expenditure of Households classified by Type (At Current prices) 2013 - 2017

					Rs.Mn

				@ -	Provisional

Government final consumption expenditure (GFCE)

The share of Final consumption Expenditure of the Government to GDP remained 8.4 percent in 2017. The change of GFCE in 2017 was 11.4 percent and 3.0 percent in 2016. The growth of GFCE was decreased 5.4 percent from 2016 to 2017.-The GFCE for the year under review was Rs. 1.130,674 million at current market prices compared to Rs. 1,014,746 million in 2016, showing an increase of 11.4 percent in the year 2017. In constant terms, it was Rs. 637,174 million in 2017 in contrast to Rs. 673,400 million in 2016 indicating a negative growth rate of 5.4 percent for 2017.

In nominal terms the share of collective Final consumption Expenditure of the (General public services, Government Defense, Public order & Safety, Economic Affairs, Environmental protection, Housing community amenities, Recreation, culture and religion and Social protection) contributed 68.6 percent to GFCE and showed by 12.9 percent growth in 2017.

Meanwhile 'individual consumption', which is the amount spent by general government and the NPISHs (non-profit institutions serving households) on things that directly benefit households, such as healthcare and education. Households do not pay directly for these services (they pay for them indirectly through taxes), but they benefit from them. Individual Final consumption Expenditure of the Government (Health and Education) grew by negative 8.3 percent in 2017, compared to 2.3 percent in 2016 which is contributed by 31.4 percent in the recent year. Expenditure on Education and Health sector have increased by 8.3 percent and 8.6 percent during this period compared with

the previous year. The share of Government Expenditure on both Education & Health to GFCE was recorded 17.0 percent, 14.5 percent.

By the table 3.3 In particular, the largest share of the Government final consumption was from the expenditure for defense 23.0 percent in 2017. The expenditure for 'Education' 17.0 percent 'Social protection' 16.6 percent, and 'Health' 14.5 percent placed the second, third and fourth respectively, in the reference year. The defense expenditure as a percentage share to total government consumption expenditure in 2017 was 23.0 percent where as it was 24.0 percent in 2016.

Table 3.3: Percentage Distribution for GFCE by COFOG (Classification of the Functions of the Government)

Function	2016	2017@
General public services	9.3	12.0
Defense	24.0	23.0
Public order & Safety	7.4	7.5
Economic Affairs	8.7	8.5
Environmental protection	0.4	0.4

Gross capital formation

(Investment)

Gross capital formation (GCF) is one of the principal component of final expenditures, typically accounting for around 32 percent of GDP.

The share of capital formation (28.8 percent) to GDP in the year 2017 and showed a positive change of 15.8 percent.

The rate of Gross Capital Formation at constant 2010 prices is 36.6 percent and It has recorded a moderate growth rate (8.2 percent) in the year 2017.

Gross fixed capital formation (GFCF)

Table 3.4 shows that the Gross Fixed Capital Formation (GCF) as a percentage of GDP and in current terms showed a 26.5 percent in 2017. The Gross Fixed Capital Formation (GFCF) which stood at Rs. 3,210,061 million at current price in 2016 has increased to Rs 3,553,236 million in 2017 indicating an increase of 10.7 percent. At constant terms, it recorded a value of Rs 2,447,693 million in 2017 as compared with Rs. 2,334,584 million in 2016, indicating a growth rate of 4.8 percent. The ratio of GFCF to GDP at current prices was 26.5 percent comprising from the private sector and Public sector for the year 2017.

The Gross fixed capital formation by construction increased by 13.0 percent in 2017, 18.0 percent in 2016. At the same time Machinery and equipment and weapons systems grow by 9.7 percent in 2017 compared to 12.2 percent change in previous year and Transport equipment increased by 6.3 percent which is 9.5 percent in 2016. Imports of investment goods increased by Information 23.3 percent. and communication technology (ICT) equipment, Intellectual property products increased by 11.1 percent and 10.4 percent respectively. At the sametime cultivated biological resources showed a considerable growth 17.2 percent.

Table 3.4: Gross Fixed Capital formation (GFCF)

Year	Current Value (Rs. Mn.)	Constant Value (Rs.Mn.)	Share of GDP	Imported Capital Goods as a share of total imports
2012	2,533,056	2,060,075	29.0	25.1
2013	2,809,789	2,174,090	29.3	23.6
2014	2,874,377	2,137,668	27.7	21.4
2015	2,814,288	2,138,922	25.7	24.1
2016	3,210,061	2,334,584	26.8	26.0
2017@	3,553,236	2,447,693	26.5	23.3

Exports and imports of goods and Services

Exports and imports are key aggregrates in the analysis of a country's economic situation. Exchange rates play an important role here. The openness indices for the years 2012, 2013, 2014, 2015, 2016 and 2017 are 51.5 percent, 49.3 percent, 49.6 percent, 50.3 percent 49.6 percent 50.9 percent and 52.9 percent respectively. It measures the extent to which a country is dependent on foreign trade flows with its trading partners.

Imports

The total payment of merchandised imports increased by 13.2 percent in 2017 as against the 9.9 percent in 2016, imports of consumer goods which consist nearly one fifth of the total imports increased by 9.2 percent in 2016 (Figure 3.3). The share of imports of consumer goods showed a decrease from 22.3 percent in 2015 to 21.5 per ecent in 2017. Imports of Intermediate goods which is the largest subsector in Imports increased by 21.2 percent in 2017. This sector has increased by 9.8 percent in 2016 as well. The share of this sector also increased to 54.5 percent the previous year. Fuel is the largest sector, within Intermediate goods Imports increased by 44.4 percent in 2017. Imports of

Chemical Products and Textiles & Textile Articles have increased by 2.0 percent and 5.5 percent respectively in the year 2017. Imports of Fertilizer has decreased by 21.1 percent in 2017 compared with previous year decrease 49.7 percent.

Investment goods hold one fourth of total Imports has increased by 2.9 percent in 2017 as against the increase of 16.9 percent recorded in 2016. Transport equipment under Investment goods decreased significantly by 19.9 percent in year 2017, Building Materials and Machinery and Equipment increased by 6.2 percent and 0.1 percent respectively.

Exports

Earnings from exports at current terms, which increased by 4.8 per cent in 2016, it is further increased by 15.4 per cent in 2017, to Rs. 1,732,440 million, a 12.7 percent up in industrial and 24.6 percent, considerable increase in agricultural exports.

By table 3.5, the composition of exports for the year 2017 indicated by 75.2 percent from Industrial exports, 24.4 percent from Agricultural exports, 0.3 from Mineral exports and 0.1 percent from other exports.

Within the total exports, Agricultural exports indicated a significant increase of 24.6 percent compaired with 0.5 percent increase in 2016. Within the Agricultural exports, export income of coconut recorded a negative change of 0.5 percent but tea and rubber exports shows significantly high increase 26.3 percent and 24.4 percent, while Export earnings from tea, the largest export commodity in Sri Lanka, which accounts for about 13.5 percent of total exports. Spices and Minor agricultural crops indicated high increases 34.1 percent and 27.5 percent

respectively. Exports of Industrial products increased by 12.7 percent in 2017, mainly led by the petroleum products, Textiles and Garments, Other Industrial and Rubber Products. Gems, Diamonds & Jewellery exports marginal decreased by 1.5 percent

Table 3.5: Exports at Current Prices 2016 – 2017

compared with 11.4 percent decrease of previous year. Textiles and Garments sector contributes 58.9 percent to the Industrial exports sector. Export earnings from Mineral exports increased by 24.7 per cent, to 5263 Rs. million in 2017.

	Со	mposition (%)	I	ncrease(%)
Category	2016	2017@	2016	2017@
Industrial exports	76.0	75.2	0.9	12.7
Agricultural exports	23.5	24.4	-7.6	24.6
Mineral exports	0.3	0.3	-50.7	24.7
Other exports	0.2	0.1	38.3	21.5

Table 3.6: Trade Direction

Major Exporters	Exports Value (Rs. Mn.)		
	2016	2017@	Change%
1. United States of America	408,814	443,927	8.6
2.United Kingdom	151,940	157,815	3.9
3.India	80,257	105,117	31.0
4.Germany	73,615	82,129	11.6
5.Italy	62,341	80,781	29.6
Major Importers		Imports Value	(Rs. Mn.)
	2016	2017@	Change%
1. India	557,290	685,447	23.0
2. China	622,241	638,983	2.7
3.UAE	185,500	238,529	28.6
4.Singapore	150,115	197,071	31.3
5.Japan	138,388	158,331	14.4
6.Malaysia	69,591	93,543	34.4

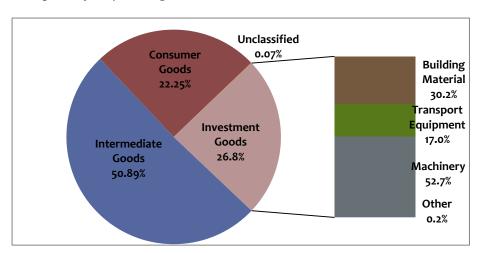

Figure 3.3: Imports by Major Categories - 2017

Table 3.6 shows that India continued major trading country with Sri lanka. United States of America continued to be the largest trade of exports with a share of 25.5 percent in total exports in 2017. Exports from United States of America increased by 8.6 percent from Rs. 408,814 million to Rs. 443,927 million. UK and India are the second and third buyer countries with the shares 9.1 percent and 6.0 percent of total exports for the year 2017. In 2017, total exports to the UK is recorded marginally by 3.9 percent

significantly increased by 31.0 percent compared with the decrease pf previous year 2016. First five largest export countries USA, UK, India, Germany and Italy accounted by 50 percent of total exports. India is the largest trade of imports with a share of 21.1 percent in total imports in 2017. Imports from India increased by 23.0 percent from Rs. 557,290 million to Rs.685,447 million.

with Rs. Mn. 157,815. While India's exports

Balance of trade

The balance of trade is the difference between exports and imports. When exports exceed imports this is referred to as a trade surplus, when imports exceed exports this is referred to as a trade deficit.

Balance of trade for Sri Lanka has recorded a deficit for the year 2017. Trade balance can be briefly defined as the difference between export income and expenditure on imports. According to the structures of exports and imports of Sri Lanka and prices in the world market, expenditure on imports higher than the export income. Accordingly, the trade deficit expanded marginally by 10.6 per cent

Table 3.7: Trade Balance 2016-2017

Type of Trade	2016	2017@
Import Outlay(Rs.Mn)	2,826,260	3,198,572
Export Earnings(Rs.Mn)	1,500,766	1,732,440
Trade Balance(Rs.Mn)	-1,325,494	-1,466,133
		@- Revised

to -1,466,133 Rs. million in 2016, from the -1,325,494 Rs. Million recorded in 2015. However, as a per cent of GDP, the deficit in the trade balance decreased to 10.9 per cent in 2017 from 11.0 per cent in 2016 (Table 3.7).

Chapter 4: Income perspective of the GDP

Introduction

The income approach of measuring gross domestic product (GDP) is based on the circular flow of an economy, which displays that total value added in the entire production process of the economy should be equal to the income generated by production process. Therefore, by summing all the primary incomes which are generated by production process together, an estimate for the total value added of an economy for a given period can be made. Subsequent adjustments must then be made for taxes, less subsidies on products to get GDP at market price.

Distribution of the income components of GDP

Compensation of employees

Compensation of Employees is the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work the done during accounting period. Compensation of employees is recorded on an accrual basis; that is, it is measured by the value of the remuneration in cash or in kind that an employee become entitled to recover from an employer with respect to work done during the relevant period, whether paid in advance, simultaneously or in arrears of the work itself. No compensation of employees is payable in respect of unpaid work undertaken voluntarily, including the work done by members of a household within an unincorporated enterprise owned by the same household. Compensation of employees does not include any taxes payable by the employer on the wage and salary bill, for example, a payroll tax; such taxes are treated as taxes on production in the same way as taxes on buildings, land or other assets used in production.

Compensation of employees has two main components:

- a. Wages and salaries payable in cash or in kind;
- . Social insurance contributions payable by employers, which include contributions to social security schemes.

Operating surplus and mixed income

Operating surplus or mixed income is a measure of the surplus accruing from processes of production before deducting any explicit or implicit interest charges, rent or other property incomes payable on the financial assets, land or other natural resources required to carry on the production.

The balancing item described as operating surplus except for unincorporated enterprises owned by households in which the owner(s) or members of the same household may contribute unpaid labour inputs of a similar kind to those that could be provided by paid employees. In the latter case, the balancing item is described as mixed income because it implicitly contains an element of remuneration for work done by the owner, or other members of the household, that cannot be separately identified from the return to the owners as an entrepreneur. In many cases, though, the element of remuneration may dominate the value of mixed income.

The preferred measure of value added is after deducting consumption of fixed capital ,that is, net value added. However, provision is made in the accounts of the SNA for value added, and all subsequent balancing items that depend on value added, to be measured gross or net of consumption of fixed capital. Operating surplus and mixed income may therefore both be expressed as gross or net.

Consumption of fixed capital (CFC)

Consumption of fixed capital the decline, during the course of the accounting period, in the current value of the stock of fixed assets owned and used by a producer as a result of physical deterioration, normal obsolescence or normal accidental damage. The term depreciation is often used in place of consumption of fixed capital, but it is avoided in the SNA because in commercial accounting the term depreciation is often used in the context of writing off historic costs, whereas in the SNA consumption of fixed capital is dependent on the current value of the asset.

Consumption of fixed capital is calculated for all fixed assets owned by producers, but not for valuables. That are acquired precisely because their value, in real terms, is not expected to decline over time. Fixed assets must have been produced as outputs from processes of production as defined in the SNA. Consumption of fixed capital does not, therefore, cover the depletion or degradation of natural assets such as land, minerals or other deposits, coal, oil or natural gas, or contract, leases and licenses.

Taxes on production and on imports (less subsidies)

Taxes are compulsory, unrequited payments, in cash or in kind, made by institutional units to government units.

They are described as unrequited because the government provides nothing in return to the individual unit, making the payment, although governments may use the funds raised in taxes to provide goods or services to other units, either individually or collectively, or to the community as a whole.

At the highest level of the classification, taxes on production and on imports consist two components;

- 1. Taxes on products (less subsidies)
- 2. Other taxes on production (less subsidies).

Taxes on products consist of taxes on goods and services that become payable as a result of the production, sale, transfer, leasing or delivery of those goods or services, or as a result of their use for own consumption or own capital formation.

Other taxes on production consist mainly of taxes on the ownership of land, buildings or other assets used in production or in the labour employed, or compensation of employees paid. Whatever the valuation of output used, other taxes on production are always recorded as a charge on the value added in the generation of income.

Table 4.1: Annual GDP estimates (Current Prices) by Income Approach 2011 to 2017

#	Components (Income Generated)	2011	2012	2013	2014	2015	2016	2017@

								@- Revised

At current prices, Compensation of Employees (CoE) is estimated at Rs. 3,686,953 million for the year 2017. It has increased by 7.5 percent compared to the recorded Rs. 3,431,025 million CoE in the year 2016. At constant prices, Rs. 2,586,373 million CoE recorded for the year 2017 and it grew by 0.4 percent compared to the recorded Rs. 2,575,534 million CoE in the year 2016.

Gross Operating Surplus recorded at Rs. 8,322,727 million in 2017 compared to Rs. 7,434,521 million in 2016. The GOS increased by 11.9 percent in nominal terms and grew

by 4.3 percent in real terms. Hence, estimated GOS at Constant prices for the years 2016 and 2017 were Rs. 5,553,031 and Rs. 5,794,024 million, respectively.

Mixed income totally generates through Household sector and Estimated for the year 2017 as Rs. 839,670 million and It was 9.3 percent more than the Rs. 768,220 million of MI, recorded in 2016. Meanwhile MI in 2017 grew by 0.5 percent. Further, other taxes less subsidies on production decreased by 7.4 percent in 2017 while accounting for a 3.6 percent growth in real terms.

							@-R	evised

The Gross Operating Surplus has been the biggest income component of the GDP. Compensation of Employees accounted for 27.7 percent of GDP in 2017 and Net operating surplus, Mixed income and CFC collectively accounted for 62.6 percent of the GDP in 2017. Those primary income components represented 90.4 percent of Gross Domestic Product at current prices

in 2017 and the remaining 9.6 percent estimated as other taxes, less subsidies on production and taxes less subsidies on products.
