Processing of employment census data – traditional method

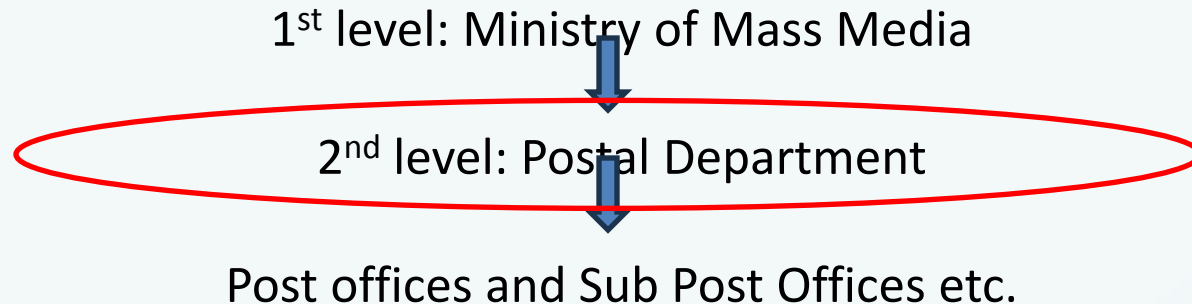

Processing of employment census data at Data Processing Centres (DPCs)

Data Processing Centres (DPCs)

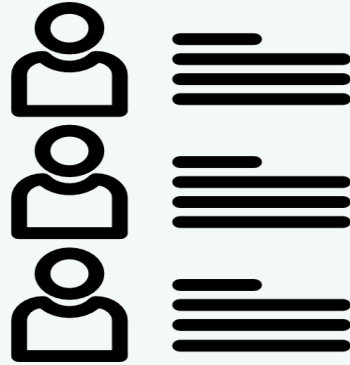

- A DPC can be a 1st level or a second level institution identified in the listing stage
- E.g.

- Institutions shall make decisions regarding the personnel

Main objectives of establishing DPCs

- To create an employee database for the major public and semi-government sector institutions
- Facilitate institutional level decision-making

Census Data Entry

- Currently in development
- Special training for the DPC staff
- Creates an employee database for each institution
- Create your own data summaries
- Output in various formats (PDF, Excel, CSV etc.)

Data Processing Step-by-Step

1. Collection of completed questionnaires
2. Entering data to the computer program at the DPC
3. Addressing problems (inconsistencies/ mistakes) – referring to program reports
4. Transferring data to the DCS
5. Sending the completed questionnaires to DCS

Dissemination of Census Results

- Data will be analyzed by DCS officers
- Final report (PDF)
- Data dashboards (user friendly)
- Data visualizations (main findings)
- List of institutions

Way forward

- Employees list to be updated by institutions
- Avoid delays in providing data for the future censuses/ surveys of DCS
- Eliminate misinformation on public and semi-government sector employment in Sri Lanka
