CENSUS OF PUBLIC SECTOR AND CORPORATION SECTOR EMPLOYMENT 1985

PUBLISHED IN 1987

PREFACE

A Census of Public and Corporation Sector Employment was undertaken by the Department of Census and Statistics in 1985. This was the second of such censuses conducted by the Department covering both public and corporation sectors. The earlier censuses covered only the public sector employment.

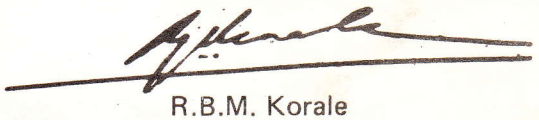

This publication which contains the final results obtained from the completed census schedules perfected by all the employees irrespective of their status of employment and employed on 2nd July 1985 in any Government or Semi Government organization.

It is regretted that the smooth flow of census activities was hampered in some sectors and furthermore owing to poor response from certain institutions of the state service only 90.8 percent coverage could be achieved.

This report was prepared by Mr. V.S. Ratnasingam, Assistant Director under my direction and guidance.

I am deeply grateful to all the officers who have contributed at different stages to the successful completion of this census. In particular I am thankful to the Heads of various Government and Semi Government Institutions and their staff for their invaluable assistance and co-operation.

The Department hopes that this report will provide useful data to planners, policy makers and other users of the data and welcomes suggestions for the improvement.

ACKNOWLEDGEMENTS

This publication was the collaborative effort of all the officers in the Demographic and Social Statistics Division of the Department, under the direction of Mr. V.S. Ratnasingham, Assistant Director.

The co-operation and assistance of the staff of the Data Processing Division are gratefully acknowledged. Following are some of the major contributions.

The Tables for this report were prepared and checked by the Statistical Officer Mrs. K. Wickremaratne. She was assisted by Mrs. R. Jayawardene, Statistical Officer and Mr. Sunil Kumara, Mrs. T.N. Rajgopal, Mrs. S. Senanayake, Mrs. D.M.G. Ariyawathie, Miss. C. Wagachchi, Miss. D. Ratiyala and Miss. D.I.N. Egodavitharanage, Statistical Investigators and the work was supervised by Mrs. M.I. Panditharatne, Statistician.

Data Processing and Tabulation were carried out by W. Sumanasiri, the System Analyst under the direction of the Assistant Driector, Data Processing.

The manuscript for this report is typed by Mrs. D. Ariyawathie.

The report was printed by Mr. K. Siripala, Assistant Director, Printing Division and his staff.

INTRODUCTION

The Census of Public and Corporation Sector Employment is the fifth in the series. Earlier, Census of Public Sector Employment only was conducted by the Ministry of Public Administration in the years 1968, 1972 and 1976 with the technical assistance and staff by the Department of Census and Statistics.

In 1980 this department undertook and carried out the Census in both sectors, namely Public and Corporation Sector for the first time. This Census is the second in this series covering both Public and Corporation Sectors. In 1980 Census, the coverage was about 78 percent due to the islandwide strike.

With the idea of obtaining complete coverage, a listing operation was carried out during March 1985. A list of all institutions coming under each Ministry was prepared with the estimated number of employees in each of these institutions ie. in each Ministry, Department, Corporation, Authority, Board, Institution and Government Owned Busniness Undertaking. The estimated number employed in each of them as permanent, temporary and casual employees were also listed. Table below shows the distribution of the estimated number of employees by institutions and the number enumerated at this Census along with their percentages.

Institution	Number	Number of Employees		
		Estimated	Enumerated	Percentage
Ministry Offices	46	12,025	11,807	98.2
Departments	130	435,612	394,552	90.6
Corporations	46	79,270	76,806	96.9
Authorities	13	74,507	71,562	96.0
Boards	77	153,128	149,326	97.5
Institutions	23	4,502	4,493	99.8
Govt. Owned Business Undertakings	30	21,008	20,430	97.2
	365	780,052	728,976	93.5

When we look at the 1981 Census of Population figures classified by status of employment 519,967 persons reported that they are Government employees and another 834,217 persons reported that they are semi-government employees giving a total of 1,354,184 persons in both these sectors, as compared to 728,976 persons covered at this census. This difference is mainly because at the 1985 census wage earners in the Estate Sector are not counted. The workers in Tea, Rubber and Coconut plantation may have reported at the 1981 Census of Population as government or semi-government employees. This may be one of the reason for the difference between the two sets of figures.

At first all the secretaries of the Ministries were requested to appoint an officer in the Ministry to liase this census work with the Department of Census and Statistics and the Institutions coming under his Ministry. Also these officers provided, this department with the list of institutions coming under the Ministry with the estimated number of employees in each of them.

PLANNING

A list of all Institutions to be covered at this Census of Public and Corporation Sector Employment - 1985 by Ministries was prepared. It is observed that under the 46 Ministries, there are 130 departments, 46 corporations and 143 boards, institutions and other government owned business undertakings. Excluded in this census are all institutions that have covered by the Companies Ordinance.

At the beginning of the year 1985, when the planning for the census was in progress, all these institutions provided the total number of employees at work in each of them. This gave an estimate of 447,637 employees in the 46 Ministries and the 130 Departments coming under them. In the corporation sector estimated figure of 332,415 employees were distributed among the corporation and other state owned bodies. The total number of employees to be covered was estimated at 780,052. Finally in the actual count, the enumerated number was 406,359 or 90.8 percent of the number of government employees reported earlier and also enumerated 322,617 or 97.1 percent of the number of employees reported in the corporation sector. The overall number enumerated was 728,976 or 93.5 percent of the estimated number. Also much reliance should not be placed on the total number of employees estimated earlier and reported by the individual institutions, which in many instants gave the budget estimates figures of employment. In many departments and corporations which employ casual hands seasonally, the estimates provided were always on the higher side.

Also the larger departments which have branches all over the country and field officers distributed in remote areas had difficulties in reporting the number correctly and in many cases gave an approximate estimate. That may be one of the reasons for an undercount of 9.5 percent in the public sector and about 3 percent in the corporation sector. This is clearly seen from the 90 percent coverage in the Ministry of Education which employs more than a third of public sector employment and also Department of Railways which have reported only 80 percent of the employees. Further some institutions would have given the estimates as provided in the cadre for 1985 in which most of them would not have been filled by the census date.

If not for some of the institutions providing a higher estimate of employees, the enumerated figures should be more or less closer to the actual number of employees in service as on the date of the Census.

Table 1 below shows the growth of Public Sector Employment figures in Sri Lanka from 1960 and Corporation Sector Employment figures from 1968.

Table 1 - Growth of (State Sector) Employment
1960 - 1985

Year	Public Sector	Percent Increase	Corporation Sector	Percent Increase
1960	257,890			
1964	298,334	15.68		
1968	303,674	1.74	115,355	
1972	323,718	6.60	145.810	26.40
1980	368,849	13.94	228,531	56.73
1985	406,359	11.01	322,617	41.16

During the intercensal period 1980-1985, the increase in the Public Sector Employment is quite appreciable (11.0 percent). But in contrast the Corporation Sector Employment was increasing rapidly showing a 41 percent increase during the same 5 year intercensal period 1980-1985. This amounts to an annual increase of more than 8 percent in employment. This is specially due to the accelerated Mahaweli expansion scheme and other rapid expansion work undertaken by the Government in Agriculture, Housing and Construction, Free Trade Zone and other Development Schemes which resulted in more openings in the employment in the Corporation sector during this period.

The overall increase in both Public and Corporation Sector Employment during this 5 year period 1980-85 is 143,518 or 24 percent, giving an annual increase figure of about 5 percent. When we look at the the Public Sector Employment only during the period 1960-1985, employment has increased by 62 percent during this twenty five year period, or an annual increase of about 2.5 percent.

Table below shows the distribution of employees by sex and Ministries in both public and corporation sectors. It is observed as expected that the largest number of employees 156,866 are in the Education Ministry followed by the Ministry of Local Government Housing and Construction with 65,548 employees. Other Ministries which have more than 30,000 employees are Transport Board (51,128) Agricultural Development and Research (38,757) Health (36,336) Finance and Planning (32,942) Post & Telecommunication (31,444) and Land and Land Development (30,339). Sexwise Ministry of Education has more female employees than males and Health Ministry has almost equal number of males and females. Other Ministries have as expected more males than females.

55 & Over	20,787	5.12	13,686	5.25	7,101	4.87

When we look at age distribution of Public Sector employees, it is observed that a little more than a third of the employees are between the age group 30 - 40 years. The employment of under 20 years is negligible.

Percent employed increases as the age increases and reached a maximum of 18.78 percent for the age group 30 - 34. There is hardly any difference in the distribution of male employees by age from that of the total employees. But in the case of females the percentage of employees in the younger age groups are higher than that of the males.

It is also observed that out of the 406,359 employees in the Public Sector 260,576 or 65% are males and 145,783 or 35% are females. Equal opportunities for female employees are a recent phenomenon and during the recent past many females had entered the Public Sector for employment.

The sexwise distribution of employees in the Corporation Sector shows that out of the overall employees of 322,617 nearly 85% or 277,517 are males and about 15% or 45,000 are females. This is due to the fact that most of the production oriented Corporation prefer men for hard labour and also to work in the night shifts.

Age wise distribution of employees in the Corporation sector is shown in Table 5 below. Employees in the Corporation sector also depicts a similar pattern of age distribution as in the Public sector but for the fact that a little more than a fifth of the employees in the Corporation sector are in the age group 30 - 34 and almost an equal number in the age group 35 - 39. Both these age groups share about 40% of Corporation Sector employees.

Table - 5 : Distribution of Corporation Sector employees by age and Sex

Age Group	Total		Male		Female	
	No.	%	No.	%	No.	%
All Ages	322,617	100.00	277,517	100.00	45,100	100.0

45 - 49	31,256	9.69	28,817	10.38	2,439	5.41
50 - 54	22,353	6.93	21,067	7.59	1,206	2.85
55 & over	14,617	4.53	13,835	4.98	782	1.73

With the increase of age of the employees the number employed decreases and by age 55 years and over only a little more than 4 percent are in service in the Corporation sector. Sexwise distribution of employees also the same trend is maintained as age distribution but there are more ladies in the age group 25 - 29 (24.5 percent). By the age of 40 years about 15 percent are male employees where as only 10 percent are females, and their share in employment decreases very rapidly and by the age of 55 only a little more than one percent are in service. Whereas 5 percent of males are in employment by the age 55.

The Table 5 also shows that with the increase in age the depletion is more rapid among females than in males as they grow older. But in the public sector there is not much of a difference by age and sex.

EDUCATIONAL QUALIFICATIONS

The employees are grouped according to their present educational qualifications and not the one they had at the time of joining the service. The information provided by the respondents are tabulated and the results are shown in Table 6 below :

Table 6 : Distribution of Public Sector Employees by educational Qualifications and Sex

Educational Qualifications	Total		Male		Female	
	Number	%	Number	%	Number	%
Total	406,359	100.0	260,576	100.00	145,783	100.00

Unspecified	3,040	0.75	2,437	0.94	603	0.41

Number and percentage distribution of total Public Sector Employees by educational qualification and sex is shown in Table 6. It is observed that almost 52 percent of the Public Sector Employees have passed G.C.E. 'O' level examination, only where as only 13 percent have G.C.E.'A' level passes. About 11 percent have degree or higher qualifications. A negligible number(2.39) percent with less than grade 5 qualifications are in the public sector. If we look at another angle, less than 24 percent of the employees are with less than G.C.E. ordinary level qualifications. When we look at the sex breakdown of these figures, it is seen nearly 60 percent of females have 'O' level qualifications, 18 percent 'A' level and 15 percent degree or higher qualifications. Only about 7 percent of females have less than 'O' levels compared to 32 percent males with less than 'O' level qualifications.

Corporation Sector Employees by their educational attainment is shown in Table 7 below and in detail in the appendix Table.

Table 7 : Number and Percent distribution of Corporation Sector Employees by Educational Qualification and Sex

Educational Qualifications	Total		Male		Female	
	No.	%	Number	%	No.	%
Total	322,617	100.00	277,517	100.00	45,100	100.00
Less than Grade 5	22,008	6.82	17,972	6.47	4,036	8.95

Unspecified	5,655	1.75	5,018	1.81	637	1.41

It is observed that 47 percent of the corporation sector employees have educational qualifications below the G.C.E. 'O' level and 38.6 percent are having G.C.E. 'O' level qualifications and 8.3 percent are G.C.E. 'A' level qualified and about 4.5 percent have degree or higher qualifications. In this sector most of the employees are in the construction, production or service industry, have concentration of employees with the middle and lower middle educational qualifications. Further, as expected the educational qualifications of public sector employees have a different distribution - concentrating more towards the higher qualifications and lesser number with lower middle qualifications.

Between sexes, the female employees percent distribution has a greater weightage towards higher educational qualifications. This is also expected as most labourers and minor grade employees are males and their educational qualifications to their grade is sufficient for their occupations. 21 percent of female employees have G.C.E. 'A' level qualifications as compared to 6 percent of males in this category even degree or equivalent qualifications holders are 7.6 percent of the feamales compared to 3.2 percent males.

PROFESSIONAL QUALIFICATIONS

In addition to the educational qualifications, professional qualifications of the employees were also collected at the Census. The employees however, had difficulties in distinguishing between educational and professional qualifications. Coders also experienced such

difficulties. The professional qualifications provided were tabulated and presented in the appendix Table 12. But a major grouping of the professional qualifications is presented in Table 8 below for the public sector and in Table 9 for the Corporation Sector. In any case much reliance should not be placed in this grouping for the reasons stated above.

Table 8 - Distribution of Public Sector Employees by Professional Qualifications

Almost 71 percent of the Public Sector employees did not report any professional qualifications and 0.5 percent have stated some additional qualifications which could not be filled into any of the groups. There are 86,249 or 21.2 percent of the employees with teacher professional qualifications and 14,517 or 3.6 percent with professional qualifications in their Trades. Further 8,583 or 2 percent of the employees have Diploma qualifications at University level.

Almost 79 percent of male employees and 56 percent of female employees have no professional qualifications. So between the sexes more female employees are professionally qualified than the males.

The distribution of Corporation Sector employees by professional qualifications are shown in Table 9. In this sector a little more than 7 percent of the employees have some professional qualifications and almost 92.5 percent of the employees have no professional qualifications and about one percent have qualification not well defined. Unlike in the public sector where the teaching profession has many employees, corporation sector has a few profesionally qualified employees and even among them about 10 percent of the females and about 7 percent of males are professionally qualified.

BROAD OCCUPATIONAL GROUP

The occupation in similar fields are grouped together in this Table as such, while interpreting, care should be taken of the definition of each category. Table 10 below shows the distribution of Public Sector Employees by broad occupational groups and sex. Teachers form more than a third (36%) of all employees followed by skilled workers 20 percent, clerical workers 17 percent and agricultural workers 13 percent, medical and related workers formed 6 percent. But engineers and technicians formed only 2 percent.

When we look at the sex differential by occupational groups, males dominate in all occupations except in teaching (60%) and medical and related fields(12%). In these females excel males (vide Table in the appendix).

The distribution of employees in the Corporation Sector by broad occupational groups presents, as expected, a different picture compared to the Public Sector Employment. In the Corporation Sector skilled workers' share is more than a third(35%) of all employees followed by clerical workers and agricultural workers which form 26 percent each. In other words more than 87 percent of the Corporation Sector Employees are in the occupational groups skilled, clerical and agricultural workers. Sex wise also male workers follow this pattern of employment but female employees show a different distribution.

More than 52 percent of females employed in the Corporation Sector are in the clerical and related fields, which includes typists and stenographers as well. In the categories administration, managerial and also in engineering and related technical occupations, shares of males and females are evenly distributed (around 2 percent) in the Corporation Sector. In the skilled jobs almost 39 percent of males are engaged whereas there are only 14 percent of females in this category compared to unskilled workers where males and females have equal share.

DISTANCE TO PLACE OF WORK

The Table below shows the distribution of employees by sex according to the distance travelled from the place of usual residence to place of work. It is seen that a third of employees are residing within one kilometre or less and about two thirds of the employees are within 10 kilometres from place of work.

87 percent of employees are residing within 30 kilometres. Only about 0.12 percent are residing more than 75 kilometres away from their place of work and about 2 percent are residing more than 50 kilometres away from their place of work.

When we look at the sex difference of employees with the distance of residence, it seems that a little less than 40 percent of women employees in public sector are residing within a distance of 1 kilometre or less. And more than 75 percent of women employees are travelling a distance of less than 10 kilometres to their place of work. Only a little over 1 percent of female employees travel more than 50 kilometres for their place of work compared to 2.5 percent male employees who are travelling more than 50 kilometres to work. Compared to female employees, male employees are residing at longer distance from their place of work.

Table 13 - Below shows the distribution of Corporation Sector employees by the distance from usual residence to place of work. The distance are given in Kilometres.

It is observed that 38 percent of the employees in this sector are staying within 5 kilometres and sexwise 42 percent of female employees and 37 percent of male employees are within 5 kilometres. 54 percent of all the employees or 53 percent of males and 59 percent of female employees are staying within 10 kilometres from the work place. Where as more Public Sector employees are staying closer to their work places compared to the Corporation Sector employees. It is also seen from the long distance travellers as well. In the Corporation Sector about 3 percent of its employees are daily travelling a distance more than 50 kilometres compared to 2 percent in the Public Sector. In both sectors women avoid staying in far away places. Only 1 percent of females in the Public Sector and 2 percent of females in the Corporation Sector travels daily a distance more than 50 kilometres to their work place.

MODE OF TRAVEL

A question is on the distance travelled to the place of work of the employees with their mode of travel. The details are shown in Table 14 below in respect of Public Sector Employees. Nearly a third of the public servants reported that they used to walk to their places of work. This is true in the districts as well.

A little less than 40 percent of public sector employees travel by bus(including private buses). The importance of road transport is clearly seen in this case of travellers. The next important mode of travel is the push bicycle which is used by nearly 14 percent or 54,685 public sector employees. Train only transports 4 percent of the public sector employees as compared to both train and bus together used by 6 percent or 24,495 of the employees in this sector. Only 0.3 percent of the public sector employees use office vehicles for their travel from residence to office and back. This category is less in number than the private car users which forms less than one percent(0.90). Table 14 shows the distribution of public sector employees and their mode of travel to their office and back. Between sexes female public servants are more frequent users to walk or to bus to their work places. (43 percent and 47 percent respectively). Compared to their male counterparts where only 27 percent walk to their places of work and another 35 percent use the bus. As expected bicycle is used by about 20 percent of the males as compared to 1.5 percent females using bicycles as their

mode of travel to work place. But female employees do not prefer to use train or train and bus. Only 2 percent of the female employees used train and nearly 4 percent travel by train and bus to their place of work. Where as 5 and 7 percent of males respectively use train and bus and train only 2 percent of the female employees used train and nearly 4 percent travel by train and bus to their place of work. Where as 5 and 7 percent of males respectively use train and bus and train.

The mode of travel to place of work from residence shows a different picture as regards to Corporation Sector Employees. Here more than half the number of employees use bus to reach their place of work and back to residence.

This compared with 39 percent of Public Sector Employees using bus as their mode of transport. As regard to walking to office public sector employees(33 percent) out number the corporation sector employees (22 percent). Also 59 percent of female employees used the bus as compared to 53 percent male employees. Train travellers also is only 2.6 percent and not much of a difference between the sexes. Same is true of bus and train travellers who forms about 4 percent of the employees. Users of bicycles as their mode of travel are similar in both public and corporation sector employees. But use of office vehicles is more in the case of corporation sector employees.

RELIGION

Buddhism being the religion professed by the majority of the population 80 percent of all employees in the public sector are Buddhists, as shown in Table 16 below. Hindus form 8 percent of the employees in this sector.

Table 16 - Distribution of public sector employment by religion and sex

Six percent are Roman Catholics, while Islam the religion of Muslim forms 3.7 percent of the employees. A similar pattern is shown in the sex distribution as well. However almost 82 percent of the females employees are buddhists. Among female employees 7 percent are Hindus, followed by Roman Catholics form 6.4 percent and followers of Islam forms about 3 percent.

Table 17 below shows the breakdown of the Corporation Sector Employees by religion. There is not much of an difference between the religion in employment in the Public Sector or Corporation Sector.

Buddhists forming 79 percent of all employees in the Corporation Sector followed by Hindus 8.5 percent Roman Catholics 7.6 percent and followers of Islam forms 2.9 percent.

Distribution of Males also shows a similar religious breakdown but females shows a different distribution. Since Muslim ladies mostly confined to their homes only 1.3 percent of working females are the followers of Islam and they form the least number by religion in the Corporation Sector Employment.

ETHNIC GROUP

The Table 18 below shows the distribution of Public Sector Employees by Ethnic Groups and sex.

It is observed that 86 percent of the total employees in the public sector are Sinhalese and about 10 percent are Sri Lankan Tamils, Moors constitutes a little less than 4 percent.

Males and females employees by ethnic groups show the same pattern as the total, when we look at the sex difference by Ethnic groups. A little more than 87 percent of the female public sector employees are Sinhalese and 9 percent Sri Lanka Tamils and a little less than 3 percent are female Moors. Male employees form 85 percent from Sinhalese, 10 percent from Tamils and 4 percent from Moors.

Malays and Burghers share less than one percent of the employment and their share in the country's population also is of that magnitude.

In the Corporation Sector also the same trend in employment by ethnic groups prevailed but appreciable number of Indian Tamils are also employed because of the Plantation Corporations in this sector. As expected Sinhalese forms the larges percentage with a little more than 85 percent followed by Sri Lanka Tamils with little less than 10 percent, Moors 2.4 percent and Indian Tamils 1.25 percent.

Employment of males in the Corporation Sector depicts a similar pattern. But for females, picture is different. 86.9 percent are Sinhalese females 9.1 percent Tamils and 1.5 percent are Indian Tamils. Moor ladies in the Corporation Sector constitutes less than 1 percent.

STATUS OF APPOINTMENT

The data on Status of Appointment were collected at this census and it is observed that more than 82 percent of the employees in the public sector are in permanent and pensionable posts followed by casual employees who forms about 9 percent or 37,007 in number. There are an appreciable number in EPF/PSPF category also, numbering 14,838 or 3.6 percent. The Table 20 below shows the distribution of public sector employees by Status of Appointment.

Table 20 - Distribution of Public Sector Employees by Status of Appointment and Sex

Unspecified	6,344	1.56	3,831	1.47	2,513	1.72

It is also observed that there is considerable number of re-employment of pensioners. They numbered 828 persons.

When we look at the figures of Status of Appointment by sex, there are more than 87 percent of female employees in permanent and pensionable status as compared to 80 percent of males in this category. There are 9,397 females in casual grade as compared to 27,610 males in this group. Also there are 160 female pensioners re-employed in the public sector.

Unspecified	6,315	1.96	5,422	1.05	893	1.98

Unlike in the public sector which has about 4 percent in the permanent and PSPF/EPF category, the Corporation sector has 67 percent and only 14 percent in permanent and pensionable category. About 13 percent are in the casual or temporary service in this sector. Among the male employees about 82 percent are enjoying permanent status and 13 percent are casual or temporary while among females about 78 percent are permanent with pensions or PSPF/EPF, about 17 percent in casual or temporary service.

The distribution of Public Sector Employees by districts is shown in Table 24. Nearly one quarter of the employees are located in Colombo District (23.47%) followed by Kandy district which has 7.75 percent of the employees and Gampaha 7.33 percent and Kurunegala 7.02 percent. Districts Galle, Kalutara, Anuradhapura and Badulla shares a little more than 4 percent each of the employees.

Mannar, Vavuniya, Mullaitivu and Kilinochchi have less than one percent of the employees each. The distribution of employees by district is similar to the distribution of the population in these districts. But the picture is different in the case of Corporation Sector Employees distribution in the districts. It is because most of the Corporations are situated in the districts in Western Province. Table 25 shows the distribution of Corporation Sector Employees in each district by sex. Nearly 50 percent of the employees in this sector are from the Western Province, followed by Central Province which has little more than 10 percent of the employees. As in the case of Public Sector districts like Mannar, Vavuniya, Mullaitivu and Kilinochchi have less than one percent each of the total number of employees in this sector. This is because these districts have not much of the Corporation activities unlike the public sector which have many production activities distributed evenly.

The Enumeration Form (Individual Questionnaire)

The form used for enumeration is a modification of the one used in 1980 census. It is an individual questionnaire and has to be perfected by all employees in the State Sector.

1. Identification Particulars

It has 15 items to be filled in by the individual employees and has to be certified by his supervisor.

As the employee is identified by his place of work the respondent is asked to write the name of Department/Corporation and Ministry. First 4 items are in respect of the identifying information.

II. The next part of the form decks with, the name, sex, marital status, race, religion and age. Except for the name and age which hereto be written, other information, the respondent is asked to circle the appropriate code number printed along with the description of the item.

Item 7 is about the designation of the employee. Here the designation with class and grade in detail has to be written. The information given in this column is used to identify one's occupation and the individuals are instructed to give their designation in full without using any abbriviations.

Item 8 - This decks with one's status of employment. There are six possibilities but one has to circle only one code.

From this information about permanent, temporary, re-employment and other category of employment is identified.

Item 9 - This decks with the date of first joining the State Sector.

Item 10 - Educational qualifications - Here the respondent is instructed to write his highest educational qualification attained, inclusive of academic and Post graduate diplomas and degrees.

Item 11 - Professional qualifications - Other than the educational qualifications, employees are classified by their professional qualifications, which in many cases related to their occupation.

Here the employees are requested to furnish their professional qualifications in detail without using abbreviations.

Item 12 - Salary - The employees are instructed to give the gross salary drawn for the month of June 1985, inclusive of all allowances without making any deductions.

Item 13 - Distance to place of work, from where you travel to work - This refers in kilometres the distance from the residence whether permanent, or temporary from where the employees travels to office.

Item 14 - Mode of travel to office - Here the employee is requested to circle the appropriate code relating to his mode of travel to work.

Item 15 - Total number of days leave taken during 1984. Here the casual and vacation, has to be recorded separately.

A copy of the Enumeration Form used is shown in the appendix.
