PREFACE

The Census of Public & Corporation Sector Employment conducted in 1990 was the third in the series of such censuses conducted by the Department of Census & Statistics since 1980. The empoyees under the recently created provincial public sector have also been enumerated in this census.

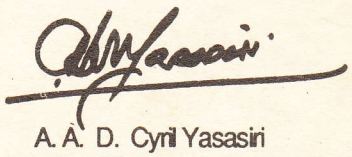

This publication contains summerised data provided by the employees who were employed in institutions either under the Central Government or under a Provincial Council or in the Semi Government Sector. These information were provided by the employees as at 2nd May 1990, irrespective of their status of appointment. The response rate was reasonably good in most of the institutions, except for those located in the Northern and the Eastern provinces.

This Census was conducted by the staff of the Demography and Social Statistics division under the direction of Mr. G.Y.L. Fernando, Deputy Director and under the supervision of Mrs. K. Wickremaratne and Mr. D.M. Gunaratna, Statisticians and Mr. C.C. Williamrajah, Statistical Officer.

The staff of the Data Processing Division, under the direction of Mr. S. Sangarapillai, Former Acting Data processsing Manager and Mrs. S.V. Nanayakkara, Deputy Director (in-charge) and the supervision of Mr. W. Sumanasiri, Deputy Director was responsible for data entry, computer data editing and tabulations. The printing of this report was done at the Printing Division under the direction of Mr. K.D. Siripala, Deputy Director (Printing).

The co-operation extended by the Secretaries to the Ministries, Heads of the Departments and other institutions both under the Central Government and Provincial Councils and the Co-ordinators who were appointed to liaise with the Department of Census & Statistics in connection with the census is highly appreciated.

Finally I wish to express my appreciation to all the employees who were the respondents in this census for their co-operation for the successful completion of the census.

A. A. D. Cyril Yasasiri
Director of Census & Statistics.

Census of Public and Corporation Sector Employment -1990

1. INTRODUCTION

The Census of Public and Corporation Sector Employment conducted by the Department of Census and Statistics in 1990 is the third in the series. Three censuses only on the Public Sector Employment had been conducted earlier in 1968, 1972 and 1976 by the Ministry of Public Administration.

The first census conducted by the Department of Census and Statistics on Public and Corporation Sector Employment was in 1980 and the second in 1985. The information collected at these three censuses were obtained through postal medium by an individual questionnaire filled personally by the employees.

A provincial public service was created by the government in 1990 by a section of the public sector employees being absorbed in to the Provincial Public Service. These employees are employed under the provincial councils. A special feature of the Census of Public & Corporation Sector Employment conducted in 1990 was that, apart from the public sector and the corporation sector, information on the provincial public sector employment have also been collected in this census.

Listing of all the institutions under these three sectors, was done in 1989 with a view of a complete coverage. This operation was somewhat delayed due to the organizational changes in the administrative set up, which was mainly due to the transfers of employees to Provincial Councils from the State Sector (Central Government) institutions in January 1990. At this point of time officials of some of the provincial councils were not aware of the institutions coming under each provincial council as well as the numbers of the employees working under them. This had an adverse effect in obtaining the estimated numbers of employees under each provincial council. These numbers were obtained from the Ministry of Provincial Councils based on the reports of Salaries and Cardres Committee. A list of all the institutions coming under each Ministry of Central Government was prepared along with the estimated number of employees in them. Institutions include Ministry offices, Departments, Corporations, Authorities, Boards and Public Private Companies. A list of provincial councils along with the respective Ministries and Offices under each of them was also prepared.

A responsible officer was appointed from each of these institutions to liaise with the Department of Census and Statistics regarding the activities in connection with the census. These co-ordinating officers held the responsibility for all the activities starting from, preparing the estimates of number of employees in his institution, to returning of the questionnaires filled by the respective employees to the Department of Census and Statistics.

A responsible officer was also appointed from each provincial council to co-ordinate with the Department of Census and Statistics with regard to the distribution of questionnaires, collection of filled questionnaires and returning them to the Department of Census and Statistics. He was responsible for co-ordinating these activities with all the institutions under his provincial council and with the Census Department.

The listing operation faced another difficulty when the functions of cabinet Ministries were reallocated in 1990. The list of institutions had to be revised to suit the current situation after the reallocation. This has happened amidst the distribution of the questionnaires and has disturbed the scheme of work to some extent.

Finally the census was conducted according to the current list in which 28 Ministries, 149 Departments, 167 Corporations and Boards, 43 Public Private Companies and 8 Provincial Councils were enumerated. By this time management of some of the State Corporations, Boards and Government Owned Business Undertakings were privatized with the Government retaining some proportion of the shares. These institutions were counted as public private companies under the Semi-Government Sector in this census.

2. COVERAGE

Total number of employees covered in the census in all the three sectors is 700, 592.

The sectors being,
i. State Sector
ii. Semi-Government Sector
and iii. Provincial Public Sector

i The **State Sector** includes all the Ministries, Departments and the Institutions not coming under a Ministry, under the Central Government.

ii The **Semi-Government Sector** includes, all the Corporations, Boards, Authorities, State Banks, Public Private Companies and Local Authorities.

iii The **Provincial Public Sector** includes all the Ministries and Institutions under the Provincial Councils.

The employees in the following categories are included in the census.
i Permanent
ii Casual
iii Temporary
and iv Pensioner, Re-employed

The personnel in the armed services (Army, Navy and Air Force) except for the civilian officers have not been covered in the census. Also the field labourers in the State Sector estates were not included.

The following table gives the information on
i the estimated number of employees in each sector
ii the number enumerated
and iii the coverage rate

It was not possible to obtain the estimated number of employees from some of the local authorities under the provincial councils. One of the difficulties faced in the census was getting the estimates for the number of employees as at 2nd May 1990, in both State Sector and Provincial Public Sector institutions, because of the premature stage of the functioning of the Provincial Public Sector in general.

TABLE 1 - COVERAGE RATE BY SECTOR OF EMPLOYMENT

The other major problem faced was that receiving the filled questionnaires from the institutions in the Northern and the Eastern Provinces. Nearly 53,000 questionnaires were dispatched to the North-Eastern Provincial Council for the distribution among the employees. However only about 18,500 filled questionnaires were returned from the North-Eastern Provincial Council, back to the Department of Census and Statistics.

Further a relatively low response was reported even in some of the Central Government institutions located in the Northern and the Eastern provinces. i.e.

i State Banks
ii Postal Department
and iii Railway Department etc.

The social background of the employees as reflected in the census could have been affected to some extent, owing to this under enumeration.

Table No.2 above shows the distribution of employees by Sex and Ministry (in both state and corporation sectors). This table includes only the ministries with over 10,000 employees. Ministry of Defence comes first according to the number of employees (59,324). However, armed service personnel under this Ministry are excluded in the census. Transport and Highways Ministry takes the second place having 59,143 employees. Ministry of Finance comes third with 34,497 employees. This data cannot be compared with the data of the 1985 census. This is because of the transferring of the employees who were in the State Sector to the Provincial Public Sector in 1990. For example in 1985 the Ministry of Education was reported to be having the highest number of employees (156,866). But in this 1990 census most of them were enumerated under the Provincial Education Departments in the respective provincial councils and the total number of employees in the Ministry of Education & Higher Education under the Central Government has reduced to 16,433 in the 1990 Census of Public & Corporation Sector Employment.

Table 3 shows the distribution of employees in the Ministries having less than 10,000 employees. Only 4 Ministries were found to be having less than 1000 employees, in this census. i.e.

Ministries of

(i) Buddha Sasana
(ii) Environment & Parliamentary Affairs
(iii) Reconstruction, Rehabilitation and Social Welfare.

and (iv) Foreign Affairs

Unspecified	3,141	1.6	2,846	1.8	295	0.8

The above table gives the distribution of State Sector (Central Government) employees by age and sex. This shows that nearly 50 percent of the employees are in the age group 25-40 years.

When examining the percentage of employees by sex in the State Sector (Central Government), It is seen that 82 percent are males and the balance 18 percent are females. A reduction of the proportion of female employees can be seen here in 1990 (from 35% in 1985 Census to 18% in 1990). A majority of females are employed in the Education and Health Services sectors as Teachers and Nursers. The major reason for the above reduction is that they are now being counted under the Provincial Public Sector and not under the Central Government.

TABLE 4B - DISTRIBUTION OF PROVINCIAL PUBLIC SECTOR EMPLOYEES BY AGE AND SEX - 1990.

Unspecified	2,571	1.2	1,456	1.5	1,115	0.9

The above table gives the distribution of Provincial Public Sector employees by age & sex. Nearly 50 percent of the employees in this sector are in the age group 25-40 years which is very much similar to the pattern exists in the State Sector (Central Government).

It is to be noticed here that the employees in the Provincial Public Sector have been absorbed from the State Sector (Central Government) recently as mentioned earlier in the introduction.

But there is a distinct difference between these two sectors when the distribution of employees by sex is taken into consideration. The proportion of females (55%) exceeds the proportion of males (45%) in the Provincial Public Sector. The reason for this difference is that the Provincial Public Sector comprises mainly of the two sectors, Health & Education, in which a majority of the employees are females.

The proportion of female employees has increased from 35 percent in 1985 to 38 percent is 1990, when both State Sector & Provincial Public Sector are combined together.

Unspecified	4,147	1.5	3,660	1.6	487	1.0

The above table is on the distribution of employees in the Semi-Government Sector by age and sex. Nearly 40 percent of these employees are seen to be in the age group of 30-40 years and another 29 percent of employees are in the age group of 40-50 years. Of the Semi-Government Sector employees, 83 percent were reported to be males and 17 percent females. This distribution can be matched with the distribution in the State Sector (Central Government). But when compared with the 1985 Census the proportion of the females in the Semi-Government Sector has increased from 15 percent in 1985 to 17 percent in 1990.

4. EDUCATIONAL QUALIFICATIONS

The employees are grouped according to their current educational qualifications and not according to what they had at the time of joining the service. The information provided by the employees are tabulated and the summerised results are shown in the tables below.

TABLE 5A - STATE SECTOR EMPLOYEES BY EDUCATIONAL QUALIFICATIONS AND SEX - 1990

This table shows the distribution of State Sector (Central Government) employees by educational qualification and sex. Nearly 65 percent of the employees have passed at least G.C.E. (O/L) examination. Of them little over 17 percent have passed G.C.E. (A/L) or a higher examination. Only about 5 percent have qualifications equivalent to a degree or a post degree level qualification.

Female employees in the State Sector seem to posses a relatively higher level of education, as compared to their male counterparts. This is evident in Table 5A, as the proportion of female employees with an educational level equivalent to G.C.E. (O/L) or above is nearly 86 percent as compared to the corresponding proportion for males which is about 60 percent.

It is seen in Table 5B that, nearly 92 percent of the Provincial Public Sector employees posses an educational qualification, equivalent or above G.C.E. (O/L). However in this sector, no marked difference can be observed between males and females as regards the level of education.

The pattern exists in the Semi-Government Sector is some what similar to that of the State Sector, as regard to the level of education of the employees. A similar difference between the level of education of the males and the females can be observed in the Semi-Government Sector too.

5. PROFESSIONAL QUALIFICATIONS

In addition to the educational qualifications of the employees, the information on their professional qualifications were also collected in this census. A formal training of a duration of 6 months and over was considered as a professional qualification. Some of the employees however had difficulty to distinguish educational and professional qualifications. All post graduate degrees and diplomas (excluding the field of medicine) were treated as educational qualifications.

About 90 percent of the State Sector employees have not been reported to posses professional qualifications. It is seen here, that as a proportion of the total, the professionally qualified employees in the field of medicine is the highest reported proportion. (See Table 6A)

It can further be seen that 9 percent of the female employees are reported to be having professional qualifications in the field of medicine. The females with nursing training have accounted for this relatively high proportion in this field.

A higher percentage of employees are reported to be professionally qualified in the Provincial Public Sector as compared to the State Sector (Proportions being 44% and 10% respectively). This is because of the large number of teachers, who have had teacher training certificate are counted under the Provincial Public Sector. This is well reflected in Table 6B as the proportion of employees, professionally qualified in the field of education is the highest reported proportion in the Provincial Public Sector.

Of all Semi-Government Sector employees only 12 percent are reported to be professionally qualified. The highest proportion reported to be having professional qualifications are in the Engineering and Architecture fields. Unlike in the State Sector, the fields of education and medicine have reported very much less proportions as professionally qualified.

Nearly 20 percent of the females and 10 percent of the males are reported to be professionally qualified. A relatively high proportion of females (12%) reported to be having 'other' professional qualifications have accounted for this difference. This might be due to the high proportion of females having professional qualifications in the fields of Typing and Stenography.

It is seen here that the selected occupations have covered about 47 percent of the employees in the State Sector, about 79 percent in the Provincial Public Sector and about 59 percent of the Semi-Government Sector employees.

According to the proportions employed in different professions the most significant groups in the Public Sector are (i) Clerical (ii) Skilled Labourers (iii) Office-peons & Labourers, with the contributing proportions being 13 percent, 11 percent and 9 percent respectively. However in the Provincial Public Sector, the proportion of teachers is about 63 percent, with all other selected occupations contributing only 16 percent of the total employment in this sector. Of all selected groups in the Semi-Government Sector, Skilled Labourers account for the highest proportion with 21 percent of the employees in this group. Clerks and related occupations can be ranked next to this group (percentage being 17).

7. NUMBER OF YEARS REMAINING IN THE SERVICE.

The above table has been prepared by assuming that the retirement age is at 55 years. In all three sectors of employment 15 to 20 percent of the employees will get retired in less than ten years from 1990 and altogether 45 to 55 percent will reach their retirement age in less than 20 years from 1990.

8. ETHNIC GROUP

8. ETHNIC GROUP

Table 9A illustrates the distribution of State Sector employees by ethnic group and sex. It is found that 91 percent of the employees in the State Sector are Sinhalese and about 6 percent are Sri Lanka Tamils. Moors account for about 2 percent and Indian Tamils and others for less than 1 percent. The percentage of Sri Lanka Tamils has fallen by 4 percentage points as compared with the previous census taken in 1985. This was caused by the high under coverage in the Northern and the Eastern provinces due to the prevailing situation in the area during the time of the census. Distribution of male and female employees by ethnic group show a pattern similar to the total. 94 percent of female State Sector employees are reported to be Sinhalese. This is higher than the proportion reported at the 1985 Census. Sri Lanka Tamil female proportion is less than 4 percent and female Moors are about 1 percent. 90 percent of male employees are reported to be Sinhalese.

TABLE 9B - DISTRIBUTION OF PROVINCIAL PUBLIC SECTOR EMPLOYEES BY ETHNIC GROUP AND SEX - 1990

Table 9B illustrates the distribution of employees in the Provincial Public Sector by ethnic group and sex. It shows that Sinhalese are 88 percent, Tamils are 7 percent and Moors are 5 percent respectively of the total in this sector. Others are less than 1 percent. It is found that in the Provincial Public Sector, Sinhalese male employees amount to 85 percent of the total male employees while Sinhalese female employees amount to 90 percent of the total female employees.

TABLE 9C - DISTRIBUTION OF SEMI-GOVT. EMPLOYEES BY ETHNIC GROUP & SEX - 1990

Employees in the Corporation Sector also show a similar pattern (See table 9C). Sinhalese with 88 percent reported at the 1990 census are proportionately higher than the 85.5 percent reported in 1985.

Employment of males in the Semi-Government Sector follows a pattern similar to the total employment in this sector. But the pattern for female employees is different. Nearly 90 percent of the female work force is Sinhalese. Tamil females are about 8 percent of the work force. Indian Tamil females and female Moors are less than 1 percent of the total work force.

9. STATUS OF APPOINTMENT

TABLE 10A - PUBLIC SECTOR EMPLOYEES BY STATUS OF APPOINTMENT & SEX - 1990

Status of Appointment	Total	%	Male	%	Female	%
All Status	198,425	100.0	161,887	100.0	36,538	100.0

Others	2,915	1.5	2,020	1.2	895	2.5
Unspecified	2,773	1.4	2,274	1.4	499	1.4

Table 10A shows that more than 67 percent of the employees in the State Sector are holding permanent and pensionable posts. This is relatively lower than the proportion (83 percent) reported at the previous census. However proportions of temporary and casual employees are slightly higher with proportions being 8 percent and 11 percent respectively. In the previous census the comparative figures were 2 percent and 9 percent. There is a considerable number in the PSPF/EPF category also (reported in the State Sector) numbering 19,960 (or 10 percent) in comparison with 14,838 (or 3 percent) reported at the previous census. Re-employed pensioners numbered 714 persons. It is also evident that the difference is negligible between female and male employees, when the proportion for employees in the State Sector holding permanent and pensionable posts is taken in to consideration. (Note: The Public Sector in 1985 has now been subdivided in to the State Sector and Provincial Public Sector).

As indicated.in Table 10B, 83 percent of the employees in the Provincial Public Sector have permanent status of the employment and 12 percent are employed on a temporary or casual basis. Others, amount to less than 5 percent. In the Provincial Public Sector male employees with a permanent status amount to 85 percent while female employees with a permanent status amount to 81 percent. Female employees with a temporary & casual status shows a higher rate at 14 percent, than the male employees which is at 10 percent.

It is seen in Table 10C that the PSPF/EPF category is much dominant among the Semi-Government Sector employees with nearly 70 percent of the employees in this group. Nearly 17 percent of the Semi-Government Sector employees are reported to be holding pensionable posts. Not much difference can be observed between male and female employees in the Semi-Government Sector by the status of appointment. The information on status of appointment is given as reported by the employees themselves and misconception might have lead to misinformation.

10. PLACE OF WORK

Colombo district can be ranked first with the highest percentage of employees in the State Sector in respect of the place of work (percentage being 39). Kandy with 8 percent and Gampaha with 6 percent of the State Sector employees can be ranked next to Colombo respectively. Nearly 4% of the State Sector employees work in each of the districts Kalutara, Galle, Kurunegala and Anuradhapura respectively. (See Table 11A)

The proportion of Provincial Public Sector employees who work in Kurunegala district is 12 percent, which is the highest reported proportion in a district. Next comes Colombo and Gampaha districts, with nearly 8 percent of the employees in each of them. However these figures are to be treated with caution as one would not certain about the coverage of the Provincial Public sector employees in the 1990 Census of Employment. (See Table 11B)

APPENDIX - 1

Classification of Occupations

The classification of occupations used in this Census was based on the International Standard Classification of Occupations (ISCO) 1988 revision. In the previous censuses, however, ISCO - 68 revision had been used to classify the occupations. In ISCO - 88 revision all occupations have been categorised into nine major groups.

Major Group 1 - Legislators, Senior Officials and Managers :

This group of occupations covers the persons who are involved in planning, formulatiing and deciding on policies. Hence Policy makers Administrators and Managers are categorised under this group. The core content of this group is identical with that of major group "Administrative and Managerial Workers" in ISCO - 68, but occupations with similar tasks classified under other ISCO - 68 major groups have also been added in this group.

Major Group 2 - Professionals :

This major group includes the occupations whose main tasks require a high level of professional knowledge and experience in related fields. For example Doctors, Asst. Medical Practitioners, Pharmasists, Nurses and Midwives are taken under the "Professional" categroy in the Health sector. All occupations classified under this major group were classified under the major group "Professional, Technical and related workers" in ISCO - 68.

Major Group 3 - Technicians and Associate Professionals

This major group covers the occupations which require the experience and knowledge necessary to assume operational responsibility and to give technical support to the administrators and the professionals in the major groups 1 and 2. The core content of this major group consists of occupations which were classified under the major group "Professional, Technical and related Workers " in ISCO - 68. Occupations with skill requirement at a similar level which were classified under other ISCO - 68 major groups, such as major group - 3 "Clerical and related workers" and major group 4 - "Sales Workers" are also classified under this major group. This is a new major group introduced in the ISCO - 88 revision.

Major Group 4 - Clerks

This major group covers occupations whose main tasks require the knowledge and experience necessary in recording, organising, storing and retrieving, information,

computing, numerical, financial and statistical data and also performing a number of client oriented clerical duties. The core content of this group consists of the occupations that were classified under the major group as clerical and related workers" in ISCO - 68.

Major Group 5 - Service Workers and Shop and Market Sales Workers

This major group covers occupations whose main tasks require the knowledge and experience necessary to provide protective services and personal services related to travel, house keeping, catering and personal care or to sell and demonstrate goods for wholesale or retail shops and similar establishments. The core content of this group consists of occupations that were classified under the major groups "Sales Workers" and "Service Workers" in ISCO - 68.

Major Group 6 - Skilled Agricultural and Fishery Workers

This major group covers occupations whose main tasks require the knowledge and experience necessary to grow and harvest crops, breed, feed or hunt animals, catch or breed fish or cultivate or gather other forms technical and related workers' in ISCO - 68 of aquatic life. The core content of this group consists of occupations that were classified under the major group, "Agricultural, Animal Husbandry and Forestry Workers, Fishermen and Hunters" in ISCO - 68. However this major group is not much significant in the Census of Public and Corporation Sector Employment in Sri Lanka.

Major Group 7 - Craft and Related Workers

This major group covers occupations whose tasks require the knowledge and experience necessary to extract and treat raw materials, manufacture and repair goods and construct, maintain and repair roads, structures and machinery. The core content of this group consists of occupations that were classified under major groups 7/8/9 "Production and related workers, Transport Equipment Operators and Labourers" in ISCO - 68.

Major Group 8 - Plant and Machine Operators and Assemblers

This major group covers the occupations whose main task require the knowledge and experiance necessary to operate vehicles and other mobile equipment, control and monitor the operations of industrial plant and mechinery. The core content of this group consists of occupations that were classified under major group 7/8/9 "Production and related workers, Transport Equipment Operators, and Labourers," in ISCO - 68. >»

Major Group 9 - Elementary Occupations

This major group covers occupations with mostly simple and routine tasks, performed with physical effort and hand held simple tools with little innitiative and judgement which needs simple knowledge and experience. The core content of this group consists of occupations that were classified under major groups 7/8/9 "Production and Related Workers, Transport Equipment Operators, and Labourers" in ISCO - 68 and occupations with skill requirment at a similar level classified under other ISCO - 68 major groups.
