

PADDY STATISTICS

2016 YALA SEASON

DEPARTMENT OF CENSUS AND STATISTICS

MINISTRY OF NATIONAL POLICIES AND ECONOMIC AFFAIRS

ISBN 978-955-702-050-1

Preface

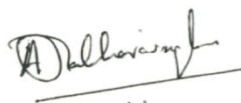

The Agriculture and Environment Statistics Division of the Department of Census and Statistics (DCS) is responsible for the collection, compilation and dissemination of agricultural related information of the country. This division collects data through economic census including agricultural activities, sample surveys and administrative records. The publication “Paddy Statistics” provides information on paddy during the 2016 Yala season.

The field work of the survey covered the whole country. A sample of 4000 paddy parcels has been selected for the 2016 Yala season representation of all paddy parcels in Sri Lanka.

Crop cutting survey was done by Statistical Officers and Statistical Assistants of the DCS, attached to the Divisional Secretariats and other Officers attached to the Department of Agriculture and Department of Agrarian Development.

Senior Statisticians, Statisticians, Statistical Officers, Statistical Assistants, Development Officers and Information and Communication Technology Assistants of the Agriculture and Environment Division are acknowledged for their valuable contributions to this report.

The publication was prepared by Mrs. C.P. Chandrasekara, Statistician, Agriculture and Environment Statistics Division of the DCS under the guidance of Mr. P. M. P. Anura Kumara, Additional Director General and Mr. K. P. K. Disanayake, Deputy Director. Printing of this publication was done by staff of the printing division of the DCS.

Paddy Statistics –2016 Yala Season

The total paddy production in the country is estimated as a product of the average yield that is estimated through a sample survey and the harvested extent, which is based on a complete enumeration of all paddy parcels. Jaffna district is not cultivated paddy in the Yala season.

In order to estimate the average yield, 1,078 experiments were conducted during the season.

Paddy is an important crop in Mahaweli areas. Therefore, paddy statistics at block level for Mahaweli areas namely Mahaweli ‘B’, ‘C’, ‘G’ ‘H’ and ‘L’ are also published in this report. Mahaweli ‘H’ area and Udawalawa areas have been included as special agricultural districts and all other Mahaweli areas have been incorporated into the respective districts that they belong to.

Distribution of sown extent by various aspects pertaining to paddy cultivation such as method of land preparation, application of fertilizer, use of insecticides etc. are included in table 14 through table 23. These statistics have been compiled on the basis of data collection from 5532 paddy growing parcels.

**Table 1: GROSS HARVESTED AREA, AVERAGE YIELD AND PRODUCTION OF PADDY
2011 –2016 YALA SEASONS**

YALA SEASON	GROSS HARVESTED EXTENT		AVERAGE YIELD		PRODUCTION	
	'000 ACRES	'000 HECTARES	BUSHEL PER NET ACRE	KG PER NET HECTARE	MILLION BUSHEL	'000 MT
2011	1,209	489	84.30	4,347	90.97	1,898
2012	754	305	80.39	4,145	54.11	1,129
2013	1,104	447	85.50	4,408	85.04	1,774
2014	743	301	81.54	4,204	54.87	1,145
2015	1,176	476	87.80	4,527	93.09	1,942
2016	939	380	85.67	4,417	72.72	1,517

The sown extent under paddy cultivation during 2016 Yala season was 952,140 acres (385,318 ha), and it is 20 % decrease compared to the 2015 Yala season .

The harvested extent during this season was estimated to be 938,927 acres (379,970 ha) and it is about 99% of the sown extent. It is 20% decrease compared to the 2015 Yala season .

Average Yield

The average yield of paddy estimated for 2016 Yala season was 85.7 bushels per net acre (4,417Kg. per net ha.). It is decrease 2.1 bushels per net acre (110 kg per net ha.) compared to the 2015 Yala season.

The highest average yield of 123.44 bushels per net acre (6,365 kg per net ha.) was reported during this season from Udawalawa special area. Average yields of 101.99 and 99.12 bushels per net acre (5,259 and 5,111 kg per net ha.) were reported from Hambantota district and Mahaweli 'H' special area respectively.

Production

The estimated paddy production for 2016 Yala season was 72,722,000 bushels (1,517,392 MT). This is about 22% decrease compared with the 2015 Yala season. Productions of 13,971,000 bushels (291,520 MT), 12,026,000 bushels (251,131 MT) and 8,368,000 bushels (174,599 MT) of paddy were reported from Ampara, Pollonnaruwa and Kurenegala districts respectively. Paddy production in Ampara district was accounted for about 19% of paddy production of the country. The contribution to the national paddy production from Pollonnaruwa, Kurunegala and Anuradhapura districts were recorded as 17%, 12% and 9% respectively.

Seed Variety

Long grain white varieties had been cultivated nearly 50% of the total sown extent. Short grain white, long grain red and short grain red varieties had been cultivated 24%, 16% and 10% of the total sown extent respectively.

Ownership

Nearly 81% of the sown extent during 2016 Yala season was under the 'Singly Owned' category of ownership. Another 7% and 6% had been under 'Ande' and 'Joint' ownership category respectively.

Method of Land Preparation

Nearly 97% of the sown extent has been prepared for cultivation by using tractors. Sown extent that had been prepared for cultivation using buffaloes and mamoties were about 3% of the total sown extent.

Method of Sowing

Broadcasting is the most popular method of sowing and that has been used in 97% of the sown extent. Transplanting not in rows is the most popular method of sowing in Nuwara Eliya, Kegalle and Kandy Districts. The percentages of sown extent under these Districts were estimated to be 56% and 17% and 17% respectively.

Use of Fertilizer

Only chemical fertilizers have been applied in about 55% of the sown extent. Use of both chemical and organic fertilizers was 45% of the sown extent.

Use of Insecticides and Weedicides

Insecticides had been applied in about 67% of the total sown extent and weedicides had been applied was about 87%. Corresponding percentage for 'Hand weeding' was 10%.

Use of Straw

Applying straw directly to the paddy field was about 91% of the total sown extent.
