

**SRI LANKA**

**ANNUAL SURVEY OF CONSTRUCTION**

**INDUSTRIES**

**2008**

**Department of Census & Statistics**

## **PREFACE**

The first Survey of Construction Industry was conducted in 1993 with the assistance of Institute for Construction Training and Development (ICTAD). Thereafter this Department continues to conduct the survey annually to cater to the needs of National Planners and other data users.

This publication provides the Survey results for the year 2008 in which the reference period was 2007. The frame for this survey was the list of contractors registered with ICTAD.

Any suggestions to improve this survey are most welcome.

D.B.P. Suranjana Vidyaratne,  
Director General of Census & Statistics.

Department of Census & Statistics,  
No. 15/12, Maitland Crescent,  
P.O. Box 563,  
Colombo.  
June 2009.

## **ACKNOWLEDGEMENT**

The planning, collection and processing of data were done by the staff of the Industry and Construction Division under the guidance of Mr. D.C.A. Gunawardena, Director, and under the direction of Mr. D.G.S.G. Munasinghe, Deputy Director, with the assistance of Mr. U.S. Wanapushpa, Senior Statistician.

The Computer assisted data processing using the software package Visual Basic & Statistical Tables using the SPSS/PC+ were done by Mr. R.D.N. Premawansa, Statistician & Ms. W.S.D. Jayasundara, Statistical Officer under the supervision of Mr. U.S. Wanapushpa, Senior Statistician.

Data collection at the follow up stage was done by the Statistical Officers / Statistical Assistants attached to the Divisional Secretariat Division and the Industry, Construction, Trade & Services Division of the Department under the supervision of District, Deputy Directors/ Senior Statisticians/ Statisticians. As well as all staff officers of the Industry, Construction, Trade & Services Division

The co-operation given by the respondents is also much appreciated.

# **Survey of Construction Industries – Sri Lanka 2008**

## **1. Introduction**

Survey of Construction Industry was conducted in 1993 for the first time in Sri Lanka mainly to furnish data regarding input, output and their trends to the Institute for Construction Training and Development (ICTAD). The Department of Census and Statistics continues to conduct the survey annually to cater to the requirements of the data users along with the rapid development of the construction industry in Sri Lanka. Therefore, all information in this report is given only for the Provinces where the survey has been conducted.

## **2. Scope and Coverage**

In this survey, all construction activities undertaken by the private contractors who are registered with ICTAD, government and semi-government agencies are covered. Therefore, construction activities undertaken by the international contractors and the informal construction activities are not presented in this survey.

Information is collected relating to the following sectors of the construction industry.

- i. Building construction
- ii. Highway construction
- iii. Bridge construction
- iv. Water supply & drainage
- v. Irrigation & land drainage
- vi. Dredging & Reclamation
- vii. Other constructions

All construction activities, except building construction, mentioned above are categorized under Civil Engineering activities.

## **3. Methodology**

The Survey of Construction Industries was aimed to cover 736 sample units in all provinces during the reference year 2007. The department introduced a very simple questionnaire for the survey from the year 2000 considering the difficulties to obtain the information of construction activities. In order to collect information such as value of contract, value of workdone, value of raw material used, salaries, other services and value of subcontract.

Field officers of the department were sent to the establishments directly to collect the information from contractors. For the non responding contractors, field officers had to visit quite a number of times to get the questionnaire completed. The collection of accurate

data from contractors is very tedious and time consuming. Sometimes officers had to visit them several times in order to get a good response.

#### 4. Frame

List of contractors registered with the ICTAD and among those who were engaged in construction activities in the year 2007 have been used as the frame for this survey.

#### 5. Sample Design

Stratified Systematic Sampling method was used for the survey and the list of contractors registered with the ICTAD was divided into 2 strata according to the grading system which the ICTAD has devised based on the financial terms. Contractors of all type of construction activities categorized under grade 1 to grade 5 and Contractors of all type of construction activities except building categorized under grade 6 to grade 10 were canvassed 100% and a probability sample was selected from other grades 6 to grade 10 in building construction as shown below.

Sample Frame	Strata	Sample Fraction	Sample size
List of contractors registered with ICTAD	grade 1-5	100%	371
	grade 6-10 (except building)	100%	66
	grade 6-10 (building)	15%	299
<b>Total</b>			<b>736</b>

#### 6. Concepts & Definitions

##### (a) Reference Period

Data relating to construction activities carried out during the calendar year 2007 or financial year 2007 April to 2008 March.

##### (b) Employment

This refers to the average number of persons engaged in construction activity during the reference period, including skilled labourers, unskilled labourers, technical, professional and other paid workers.

##### (c) Salaries & Wages

Amount paid as salaries, wages or subcontract on work done during the period.

##### (d) Output

Value of work done during the year 2007.

**(e) Input**

Expenditure on goods (raw materials), other services and subcontract

$$\text{Input} = \text{Value of goods} + \text{Value of other services} + \text{Value of subcontract.}$$

**(f) Value Added**

Value added is the increment addition to the value of raw materials and other expenditure that is contributed by the contractor. It is computed as follows.

$$\text{Output} - \text{Input} = \text{Value added}$$

**7. Survey Results**

The Survey of Construction Activities was not covered all construction activities carried out during the reference period in the island. The survey covers all the construction activities carried out by the contractors registered with ICTAD.

Therefore it is clear that ;

- a. The construction activities carried out other than by the ICTAD registered contractors such as construction of houses in the rural sector and urban sector;
- b. Large scale construction activities carried out by foreign contractors;

are not covered by this survey.

According to the Annual Survey of Construction Industries, the total estimated value of work done by all type of construction activities in Sri Lanka was Rs. 56,496 million in 2007. The highest contribution to this value has been made by the building construction sector which accounted for 64.1% of the total value of work done.

The major share of the value of work done of building construction sector (which amounted Rs. 36,221 million) has come from the private and public sector. The type of high way construction was the second highest contributor to the value of work done, amounting to 25.2% of the total value.

It is evident in the Table 10 that the highest value of work done reported from Colombo District and it was 37.2% of the total output. Hambantota and Kalutara Districts contributed to 11.3% and 6.2% to the total value of work done respectively. The lowest value of work done was reported from Jaffna District and it was 0.3% of the total output.
