

# IIP, Index of Industrial Production (2015=100)

Web Release - January, 2022

# Department of Census and Statistics

Ministry of Economic Policies and Plan Implementation

The Index of Industrial Production (IIP) is an abstract number, the magnitude of which represents the status of production in the industrial sector for a given period of time. Its main purpose is to provide a measure of the short-term changes in the volume of industrial production from the manufacturing sector in the country.

The IIP provides Information to gauge industrial performance and to forecast the future economic performance. It can be used to identify the turning points in economic development at an early stage. The major advantage of the production index compared to other indicators is the combination of fast availability and detailed breakdown of activities.

# Highlights - January 2022

- The volume of industrial production for the month January 2022 has decreased by 7.1 % compared to the same month in 2021.
- When the monthly difference of volume is considered, it has decreased by 0.6%\*.

#### Inside

Uses of the IIP (Page 1)

Month to month % change of IIP by industry divisions (Page 1)

Year on year % change of IIP by industry divisions (Page 2)

Time series of Index of Industrial Productions by industry divisions – January (Page 3)

Monthly Revised IIP 2021 (Page 4)

Quarterly Revised IIP 2021 (Page 5)

#### Uses of the IIP

The IIP is a key indicator of economic performance in most countries. Index numbers summarize past developments, facilitate forecasting of future trends and assist with evidence based policy decisions. In addition, index numbers facilitate International comparisons. The IIP also has an important role in the compilation of the Quarterly National Accounts. Analysis of economic changes, IIP has a crucial role because industrial production is one of the more dynamic and fluctuating element in the economy.

#### \*Seasonally adjusted month to month % change

This % change computed through evaluating the 12-month moving average (12MMA) of twelve-month moving total (12MMT) index values of the monthly data for the past 12 months. The 12MMA removes seasonal variation to derive the underlying cyclical trend. It is also referred to as the annual total or average. Using this indicator one can get an accurate understanding of the monthly growth (trend) of the manufacturing industries in the country.

## The Vision of DCS

"To be the leader in the region in producing timely statistical information to achieve the country's development goals."

## The Mission of DCS

"Making contribution in the socioeconomic development of the country by providing accurate timely statistics, more Effectively by means of new technology, and utilising the services of dedicated staff under a strategic leadership to become a prosperous nation in the globalised environment."
