

**QUARTERLY REPORT OF THE
SRI LANKA LABOUR FORCE
SURVEY**

Quarterly Report – 2011

Third Quarter

**DEPARTMENT OF CENSUS & STATISTICS
MINISTRY OF FINANCE AND PLANNING**

ISBN 978 – 955 – 577 – 777 - 3

Preface

In the past, information on labour force characteristics, employment and unemployment etc. were collected through labour force and socio - economic surveys conducted at five yearly time intervals. However, the employment and unemployment data are required at very short intervals to monitor the programs made in the employment generating policies of the government. Therefore, to satisfy this need, the Department of Census and Statistics (DCS) designed a labour force survey on a quarterly basis, to measure the levels and trends of employment, unemployment and labour force in Sri Lanka on a continuous basis. This survey was commenced from the first quarter of 1990 and this report is the seventy seventh in the series of quarterly reports published so far.

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes were made over the years to improve the accuracy and usefulness of the data. The significant revisions were made on the labour force survey questionnaire in 2006, and the revised version was introduced for the survey conducted in 2006 first quarter, and it has been using up to now.

The field work of the survey for the Third quarter 2011 was done in July, August and September in year 2011. Even though it was planned to conduct the survey in Northern province, the survey was not conducted fully unavailability of a proper sampling frame in Northern province and However for comparison purposes related tabulations have been done (i) excluding Northern and Eastern provinces and (ii) excluding Northern province, separately in this report.

A nationally representative annual sample of about 22,500 housing units have been selected for the survey in 2011. However as mentioned above, the survey was not conducted properly in Northern province as scheduled, so this report is based on a quarterly sample of 5,170 housing units, excluding Northern province providing national level estimates with a stipulated standard errors of labour force characteristics as reported in the reference period of the Third quarter 2011.

Acknowledgements

This report is eighty fourth in the series of the Quarterly Labour Force Survey which was commenced from the first quarter 1990 and is being continued by the Department of the Census and statistics.

Planning and execution of the survey was done by staff of the Sample Survey Division under the direction of Mr. W.W.M.A.S. Premakumara, Director, Sample Surveys Division and the survey activities were coordinated by Mr. G.Y.L. Fernando, Director(2).

Field operation activities were organized by Mr. R.A.P. Kumarasinghe, Statistician of the Sample Surveys Division.

The supervision activities were carried out by Mr. R.A.P. Kumarasinghe, Mr. I.L.Sherifdeen, Mr. P.A.Subawickrama, and Mr. W. Gnanathilaka, Statisticians, of the sample surveys division and Heads of statistics divisions in each district.

The computer data processing and final tabulations were done by Mrs. W.A.S.M.P. Gunasekara, Mr.T. Thirugnanatheepan Statistical Officers and Mr. M.B.M. Shiras, Statistical Assistant of the Sample Surveys Division, under the supervision of Mr. P.A. Subawickrama, Statistician using Microcomputers.

Developing of sample selection programme and it's related computer software was done by Mr. K.M.R. Wickramasinghe, System Analyst/ Programmer of the sample survey division.

This publication was organized and prepared by Mr. Priyadarshana Dharmawardana, Senior Statistician and Mr. P.A. Subawickrama, Statistician Sample Surveys Division, assisted by Mrs. W.A.S.M.P. Gunasekara, Statistical officer.

The Data Processing Division, under the direction of Mr. S.A.S. Bandulasena, Deputy Director and under the supervision of Mr. Migara Fernando and Mr. Wasantha Weerasiri, Senior System Analyst/Programmers, was responsible for the survey data entry and preparation of data entry and computer edits programmes. Data entry was decentralized and manual editing, coding & data entry were done by responsible officers at district kachcheries in districts Gampaha, Kalutara, Kandy, Matale, Galle, Matara, Kurunegala, Puttalam, Anuradhapura, Badulla, Ratnapura & Kegalle.

District field staff of the Department who worked on the survey deserve a special word of thanks. They include District Deputy Directors/ Senior Statisticians/ Statisticians and field Statistical Officers, who worked hard at the data collection stage, to make this survey a success.

Printing of the report was done at the Printing Division, under the supervision of Mr. W.C. Weerawansa, Senior Statistician.

Finally, I wish to express my appreciation to all the respondents of the survey for their valuable co-operation.

Appendix 3: Survey schedule

Introduction

Sri Lanka Labour Force Survey is designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

The field work of the survey for the Third Quarter 2011 was done in July, August and September in year 2011. Even though it was planned to conduct the survey in Northern province, the survey was not conducted fully due to unavailability of a proper sampling frame in Northern province and therefore this report consists of summary statistics excluding Northern province.

Labour force participation rate

Labour Force: Number of persons (age 10 & above) who were employed or unemployed during the reference week

Labour force participation rate: Labour force expressed as a percentage of population age 10 yr. & over

Table 1: Economically active population by sex and sector - Third Quarter 2011

Sector	Economically active population					
	Total	%	Male	%	Female	%
Total	8266328	100.0	5457863	66.0	2808465	34.0
Urban	1021756	100.0	699137	68.4	322619	31.6
Rural	6823134	100.0	4530977	66.4	2292157	33.6
Estate	421438	100.0	227750	54.0	193689	46.0

Table 2: Economically Inactive population by sex and sector - Third Quarter 2011

Sector	Economically inactive population					
	Total	%	Male	%	Female	%
Total	8855818	100.0	2638799	29.8	6217019	70.2
Urban	1242714	100.0	393638	31.7	849076	68.3
Rural	7223197	100.0	2105992	29.2	5117204	70.8
Estate	389907	100.0	139169	35.7	250739	64.3

The survey results revealed that (Table 1), the estimated economically active population (or labour force) was about 8.3 million in Third Quarter 2011. Of which 66 percent were males and 34 percent were females. Out of the economically inactive population 29.8 percent were males and 70.2 percent were females (Table 2).

Figure 1: Distribution of Economically active/Inactive population

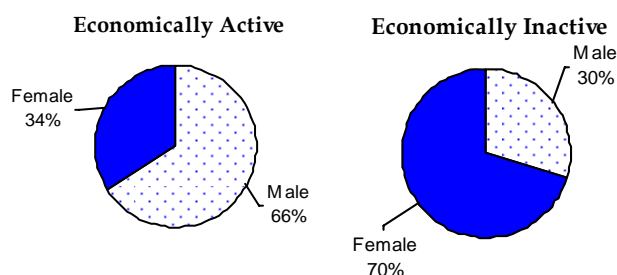

Table 3: Labour Force Participation Rate by sex & year

Year	Labour force participation rate		
	Total	Male	Female
2000	50.3	67.2	33.9
2001	48.8	66.2	31.9
2002	50.3	67.9	33.6
2003	49.7	67.5	32.6
2004	49.6	67.2	33.0
2005	49.3	67.3	32.6
2006	51.2	68.1	35.7
2007	49.8	67.8	33.4
2008	50.2	67.9	34.3
2009	49.2	66.7	33.7
2010	48.6	67.3	32.1
2011 Q1	48.8	66.2	33.2
2011 Q2	48.8	66.4	33.1
2011 Q3	48.8	67.5	32.2

Table 3 provides the information on labour force participation rates since year 2000. As can be seen from this table, male participation rate for the Third Quarter 2011 was about 67.5 percent and it was 32.2 percent for females. It is important to note that, male participation to the labour force was almost twice as that of females.

Note: Excluding Northern & Eastern provinces

Table 4: Labour Force Participation Rate by age group & by sex - Third Quarter 2011

Age group	Sex		
	Total	Male	Female
Total	48.3	67.4	31.1
15 - 19	16.1	21.5	10.4
20 - 24	56.0	79.0	37.0
25 - 29	67.0	94.5	42.0
30 - 34	65.3	94.3	40.6
35 - 39	70.2	96.3	45.9
40 - 44	71.3	94.5	49.9
45 - 49	69.8	94.4	48.7
50 - 54	62.7	90.8	39.7
55 - 59	55.1	81.7	32.5
60+	30.1	45.7	16.0

The distribution of labour force participation rate by age group and by sex depicts more male participation compared to female in all age groups.

Highest male participation rate was reported from age group (35 - 39) yrs, while in female highest participation rate was reported from age group (40 - 44) yrs.

Employment

Employed: Persons who are engaged in some kind of work for pay or profit or family gain during the reference week.

Table 5 : Distribution of Employed population by main industry, (Third Quarter 2010 - Third Quarter 2011)

Year	Total	Major industry group		
		Agriculture	Industries	Services
July-Aug-Sept. 3rd Qtr - 2010	7578174 100.0	2367294 31.2	1850442 24.4	3360438 44.3
Oct-Nov-Dec 4th Qtr - 2010	7909178 100.0	2672472 33.8	1909857 24.1	3326849 42.1
Jan-Feb-Mar 1st Qtr - 2011	7783574 100.0	2511427 32.3	1951202 25.1	3320945 42.7
April-May-June 2nd Qtr - 2011	7956518 100.0	2684299 33.7	1877724 23.6	3394495 42.7
July-Aug-Sept. 3rd Qtr - 2011	7943295 100.0	2609757 32.9	1916181 24.1	3417357 43.0

Note: The tabulation groups based on ISIC (Rev.3) are indicated as A,B,C.....Q..

Agriculture

- | | |
|-----------------------------|--|
| 1. Agriculture (A) | 1. Manufacturing (D) |
| 2. Forestry and Fishery (B) | 2. Construction (F) |
| | 3. Mining & Quarrying (C) |
| | 4. Electricity, Gas and Water supply (E) |

Industries

Services

1. Wholesale and Retail Trade, Repair of Motor Vehicles, Motorcycles and Personal and Household Goods (G)
2. Hotels and Restaurants (H)
3. Transport, Storage and Communication (I)
4. Financial Intermediation and Real Estate, Renting and Business Activities (J,K)
5. Public Administration and Defence, Compulsory Social Security (L)
6. Education (M)
7. Health and Social work (N)
8. Other Community, Social and Personal Service Activities (O)
9. Private Households with Employed Persons (P)
10. Miscellaneous Labour work
11. Extra Territorial Organizations & bodies (Q)
12. Industries not adequately described

Table 5 shows the percentage distribution of employed population by main industry from Third Quarter 2010 to Third Quarter 2011. The total number of employed persons in Sri Lanka was estimated as about 7.9 million in Third Quarter 2011. Of which, about 43.0 percent engaged in services sector, 32.9 percent in agriculture sector, and 24.1 percent in Industries sector.

Table 6 : Percentage distribution of employed population by employment status and Agriculture/ Non-Agriculture sector - Third Quarter 2011

Employment Status	Total		Sector			
			Agriculture		Non Agriculture	
	No.	%	No.	%	No.	%
Total	7943295	100	2609757	32.9	5333537	67.1
Employee	4386361	100	763354	17.4	3623007	82.6
Public	1192714	100	134534	11.3	1058180	88.7
Private	3193647	100	628820	19.7	2564827	80.3
Employer	223882	100	45062	20.1	178819	79.9
Own account worker	2436665	100	1161313	47.7	1275353	52.3
Contributing family worker	896386	100	640028	71.4	256358	28.6

Table 6 shows that, comparatively higher percentage of employees both in private & public sector engage in non-agricultural activities. Also more employers were in non agriculture sector than in agriculture sector. But contributing family workers were more concentrated in agriculture sector.

Table 7 : Distribution of Employed population by main industry & sex - Third Quarter 2011

Major industry group	Total	Sex	
		Male	Female
Total	100.0	100.0	100.0
Agriculture	32.9	30.6	37.4
Industry	24.1	23.7	25.0
Services	43.0	45.7	37.5

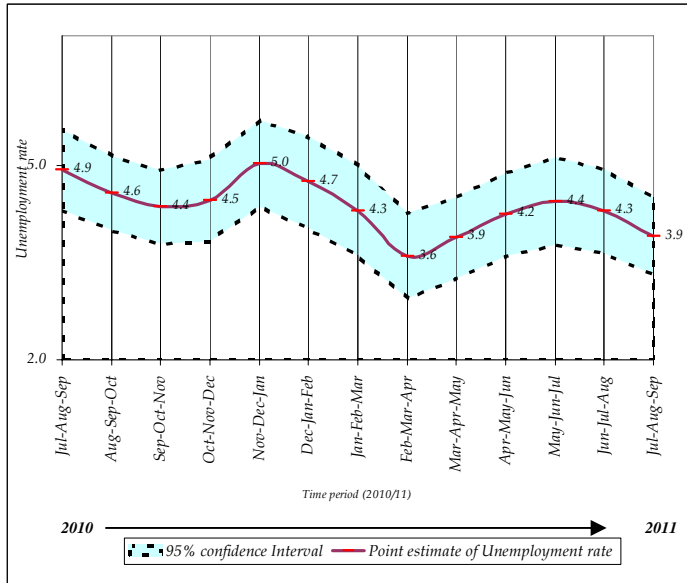

Table 7 depicts the distribution of male and female employed population by main industries. Regardless of sex, highest employment concentrated in service sector. Further among employed women about 37.4 percent was in agriculture sector while this share was 30.6 percent among males.

Unemployment

Unemployment Rate : The number of unemployed persons as a percentage of the labour force

Unemployed : Persons who are seeking and available for work, but had no employment during the reference period

Figure 2 : Unemployment rates and it's 95% confidence intervals (2010 Jul. - 2011 Sept.)

The number of unemployed persons was estimated as about 323,033 during the Third Quarter 2011.

The unemployment rate for the Third Quarter 2011 was reported as 3.9 percent.

As seen in figure 2, it is very important to note that, there were no statistically significant difference between the unemployment rates reported in different time periods of 2010/2011, when *sampling error*⁽¹⁾ was considered.

Table 8: Unemployment rate by level of education - Third Quarter 2011

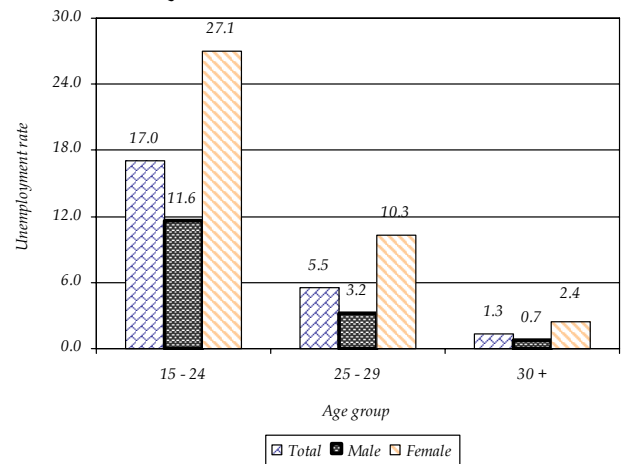

Level of Education	Unemployment rate		
	Total	Male	Female
Total	3.9	2.5	6.7
Below G.C.E. (O/L)	2.4	1.9	3.8
G.C.E. (O/L)	4.3	2.5	8.0
G.C.E. (A/L) & above	9.3	5.5	13.7

Table 9: Unemployment rate by age group and sex - Third Quarter 2011

Age group	Total	Sex	
		Male	Female
Total	3.9	2.5	6.7
15 - 24	17.0	11.6	27.1
25 - 29	5.5	3.2	10.3
30 +	1.3	0.7	2.4

Figure 3 : Unemployment rate by age group and sex - Third Quarter 2011

As can be seen from table 9, overall unemployment rate reported for female was 6.7 percent and it was 2.5 percent for male. Youth unemployment rate 15 - 24 yrs reported for Third Quarter 2011 was 17.0 percent. Highest unemployment rate was reported from age group 15 - 24 yrs, for both males (11.6) and females (27.1). Further the survey results revealed that the unemployment was severe among females than that of males, in all age groups.

The highest unemployment rate was reported from the G.C.E(A/L) and above group which was about 9.3 percent. There were 5.5 percent and 13.7 percent for males and females respectively. This shows the problem of unemployment is more acute in the case of educated females than educated males (Table 8).

⁽¹⁾ Sampling error :

When a sample, rather than the entire population, is surveyed, estimates differ from the true population values they represent. This difference, or sampling error, occurs by chance, and its variability is measured by the standard error of the estimate. **For more details, please refer the explanatory note on the labour force link in the DCS website.**

Note: The normal Labour Force Survey programme was not implemented in 2005 due to the Tsunami - 2004. However a special labour force survey was conducted in August 2005 and the estimates based on this special survey are given under year 2005.

(Up to 2002 fourth quarter, both Northern & Eastern provinces are excluded from the estimates.)

* - Including Eastern province but Excluding Northern province

** - Excluding Mulathivu, Kilinochchi districts.

*** - All the districts are included

- Excluding Northern & Eastern provinces

Explanatory Notes

Coverage

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

This quarterly survey of households is conducted through a scientifically selected sample designed to represent the civilian non-institutional population. Respondents are interviewed to obtain information about the employment status etc. of each member of the household 10 years of age and older.

The field work of the survey is done during the third week of the each month, Monday through Sunday. This is known as the "survey week". The inquiry relates to activity or status are referred in the preceding week of the survey week; referred to as the "reference week".

The concepts and definitions underlying labour force data are as follows.

Concepts and definitions

1. **Labour force** : The labour force is composed of the economically active population 10 years of age and over.
2. **The Economically Active Population** : is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. **Employed** : Persons, who during the reference period, worked as paid employees, employers, own account workers (self employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. **Unemployed** : Persons who are seeking and available for work, but had no employment during the reference period.
5. **Currently Economically Active** : A person who was employed or unemployed during the current reference period is considered to be currently economically active.
6. **Not in the Labour Force (not economically active)** : Persons who were neither working not available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full - time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and Usual definitions apply.
7. **Criteria for classification of underemployment**: In order to classify an employed persons as visibly underemployed,

(i) If the person has worked less than the normal duration in his/her main activity

In Sri Lanka scenario, 35 hours per week is taken as the cut-off point applicable to all workers, except government teachers. As in practice, though teachers do have a normal duration of work which is below the general cut-off point, they should be on a full time schedule according to the nature of their job. Further, those who do have a secondary job, or those who are employers, were considered as having worked the normal duration in their respective activity.

Therefore, if the person has worked less than the normal duration in his/her activity (as described above), then the person is further questioned to ascertain whether he/She is prepared and available for further work if provided. Such persons are considered underemployed in their respective employment.

(ii) If the person has worked more than the normal duration in his/her activity

If the person has worked even more than 35 hours as usually, but he has worked less than 35 hours actually in the reference period, only due to the off season or bad weather, such persons were also further questioned to check their underemployment situation, considering them as a special category.

8. Informal Sector Employment

In order to classify a person to be employed in informal sector employment, following information were used.

- (i) Registration of the organization
- (ii) Accounts keeping practices of the organization
- (iii) Total number of regular employees of the organization.

Reliability of the estimates

Statistics based on the quarterly labour force data are subject to both sampling and non - sampling errors. When a sample rather than the entire population is surveyed, there is a chance that the sample estimates may differ from the "true" population values they represent.

The exact differences, or sampling error, varies depending on the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 95 percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.96 standard errors from the " true" population value, because of sampling error. Analyses relating to the Labour Force Survey are generally conducted at the 95 percent level of confidence.

For example, the confidence interval for the quarterly unemployment rate is on the order of

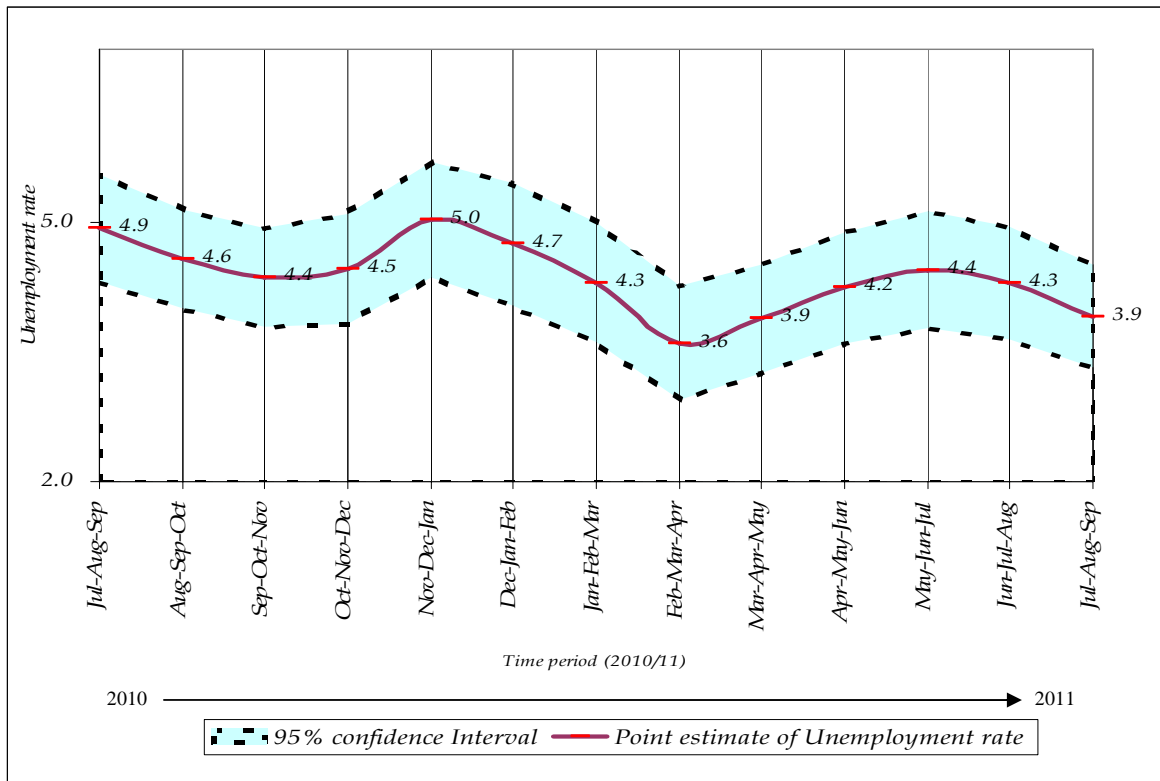

Estimated value *(of the unemployment rate)* \pm (standard error) * (1.96)

6.4 \pm (0.4) * (1.96)
(6.4 \pm 0.784)

This means, the 95 percent confidence interval on the quarterly unemployment rate could range from (5.6 to 7.2) . This implies that there is about 95 percent chance that the "true" unemployment rate lies within this interval. This range includes all the values range from 5.6 to 7.2 . When the comparison of this estimate is done between two quarters, if any of the value within the 95 percent confidence interval of one quarter overlaps with the confidence interval of the other , it means that the estimates of this two quarters *are not significantly different*.

Therefore, in each quarterly labour force report, a separate table is given including approximate standard errors for some selected variables, so that users could understand this statistical scenario clearly.

Unemployment rates and it's lower and upper limits (2010 Jul. - 2011 Sept.)

As seen in figure 2, it is very important to note that, there were no statistically significant difference between the unemployment rates reported in different time periods of 2010/2011, when sampling error was considered.

Change in survey schedule

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes have been made over the years to improve the accuracy and usefulness of the data.

Beginning in January 2006, some improvements were made to the labour force survey schedule in order to fulfill the requirements of it's users and also to provide additional information for the planning purposes. This revision was made focusing on literacy, household economic activities, and informal sector employment and under employment etc.

Note :

It is important to note that, all the data published here are the estimates based on a sample survey and these are subject to sampling errors. These sampling errors can be statistically evaluated from the survey results. Therefore, sampling error is normally measured in terms of the standard error of the particular variable. Standard error could be used to calculate the confidence limits with a prescribed accuracy where the true value of the estimates lies.

Further reliability of the estimates can be expressed in terms of Coefficient of Variation (CV). The CV is a relative measure of the sampling error and is calculated as sampling error divided by the expected value of the given characteristic.

In view of this, following table is given to show the estimates for some selected variables, its standard error, CV and 95% Confidence interval.

It is also important to note that all the estimates we publish in this report are subject to sampling error and one should be cautious in the interpretation of results, especially with respect to the trends over time.

** - Excluding Mulathivu and Kilinochchi districts.

***- All the districts are included

- Excluding Northern & Eastern provinces

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

◆ Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial are as below.

(1) Number of Hours of Work :

A person who work **at least one hour** during the reference week, is considered **employed**, under these definitions.

(2) Working Age Population :

All persons of **age 10 years and over** are considered to be in the working age.

(3) Employment Status :

All, a) Paid employees, (those who work for wages/salaries).

b) Employers (who have at least one paid employee under them).

c) Own account workers (who carry out the economic activity without having any paid employees).

d) Unpaid family workers (who make their contribution to the economic activities carried out by their own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

(1) **Number of hours of Work** : Some point out that **one hour per week** is too low, to consider a person to be employed.

(2) **Working age Population** : Some point out that persons in the age group 10-14 yrs. are too young to consider to be in the working age.

(3) **Employment Status** : Some point out that 'unpaid family workers' may work in the family enterprise **without payment** because they have no other work, and so it is not appropriate to consider them as **employed**.

An attempt has been made to produce '**Alternative estimates of Employment, Unemployment and Labour Force Characteristics**,' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

(1) Number of Hours of Work :

Persons who work **20 hours or more per week only** are considered to be employed.

(2) Working Age Population :

Persons who are **over 15 yrs of age only** are considered to be in the working age.

(3) Unpaid Family Worker :

Unpaid family workers are **not** considered as employed. Those unpaid family workers who were reported to be seeking some other work are considered as **unemployed** and the rest of the unpaid family workers are considered as **economically inactive** (not in the labour force) so only, **a) paid employees b) employers and c) own account workers are considered to be employed**.

Following tables are based on the above alternative concepts and definitions.

TABLE 1 - LABOUR FORCE STATUS OF HOUSEHOLD POPULATION 15 YEARS & OVER (ALTERNATIVE ESTIMATES)

YEAR	HOUSEHOLD POPULATION (15 YEARS & OVER)	LABOUR FORCE						NOT IN LABOUR FORCE NUMBER
		TOTAL LABOUR FORCE	LABOUR FORCE PARTICI: RATE(%)	EMPLOYED		UNEMPLOYED
