

Sri Lanka Labour Force Survey

Annual Bulletin - 2013

Department of Census and Statistics
Ministry of Finance and Planning

In the past, information on labour force characteristics, employment and unemployment etc. were collected through labour force and socio - economic surveys conducted at five year time intervals. However, the employment and unemployment data are required at very short intervals to monitor the programmes implemented in the employment generating policies of the government. Therefore, to satisfy this need, the Department of Census and Statistics (DCS) designed a labour force survey on a quarterly basis, to measure the levels and trends of employment, unemployment and labour force in Sri Lanka on a continuous basis. Hence, the survey was commenced from the first quarter of 1990 and is being continued by the DCS.

This bulletin is based on an annual sample of 25,000 housing units covering all districts of the country. In 2013 the survey was conducted from January to December.

1. LABOUR FORCE: HIGHLIGHTS - 2013

Working Age Population

All persons above specific age limit (15 years and above) of either gender are identified as working age population. This population consists with two groups namely economically active & inactive.

Economically Active Population (Labour Force)

The economically active population or the labour force comprises all persons of working age who are either “employed” or “unemployed” during the reference period (The week before the survey period).

Labour force = Employed + Unemployed

Table 1.1: Labour Force participation rate by gender - 2013

Gender	Economically active population (No.)	Labour Force Participation rate
Total	8,802,113	53.8
Male	5,677,815	74.9
Female	3,124,298	35.6

Table 1.2: Distribution of economically active / inactive population by gender - 2013
