

**QUARTERLY REPORT OF THE
SRI LANKA LABOUR FORCE
SURVEY**

Quarterly Report – 2015

First Quarter

**DEPARTMENT OF CENSUS & STATISTICS
MINISTRY OF POLICY PLANNING ECONOMIC AFFAIRS,
CHILD YOUTH AND CULTURAL AFFAIRS**

ISBN 978 – 955 – 577 – 955 - 5

Preface

In the past, information on labour force characteristics, employment and unemployment etc. were collected through labour force and socio - economic surveys conducted at five yearly time intervals. However, the employment and unemployment data are required at very short intervals to monitor the programs made in the employment generating policies of the government. Therefore, to satisfy this need, the Department of Census and Statistics (DCS) designed a labour force survey on a quarterly basis, to measure the levels and trends of employment, unemployment and labour force in Sri Lanka on a continuous basis. This survey was commenced from the first quarter of 1990 and this report is the ninety third in the series of quarterly reports published so far.

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes were made over the years to improve the accuracy and usefulness of the data. The significant revisions were made on the labour force survey questionnaire in 1996, 2006 and the latest revision was in 2013. The revised version was introduced for the survey conducted in 2013 First quarter, and this report consists with statistics using new concepts and classifications.

The field work of the survey for the first quarter 2015 was done in January, February and March in year 2015. This survey covered the whole country. A nationally representative annual sample of about 25,000 housing units have been selected for the survey in 2015. This report is based on a quarterly sample of 6,250 housing units.

Acknowledgements

This report is ninety third in the series of the Quarterly Labour Force Survey which was commenced from the first quarter 1990 and is being continued by the Department of the Census and statistics.

Planning and execution of the survey was done by staff of the Sample Survey Division under the direction of Mr. H.R.Dias, Director, Sample Surveys Division.

The survey activities were organized and supervised by Mr. P.A.Subawickrama, Mrs. W.A.C.Wijebandara, Mr. K.S.R.L.Senadeera, Mrs. M.D.D.D.Deepawansa, Mrs. C.Jayawickrama, Mr. A.K.D.C.N.S.Karunarathna, Mr. K.Weerasiri, Mrs. U.S.Dilrukshi, Mr. M.L.K.P.Kumara, Statisticians & Senior Statistician, of the sample surveys division and Heads of statistics divisions in each district.

The computer data processing and final tabulations were done by Mrs. W.A.S.M.P. Gunasekara, Mr. A.M.A.E.Atapattu, Statistical Officers and Mrs. A.N. Ekanayake, Statistical Assistant of the Sample Surveys Division, under the supervision of Mrs. W.A.C.Wijebandara, Statistician using Microcomputers. The statistical officers, statistical assistants, Information and Communication Technology assistants, Data Entry Officer/Coding clerks and development officers (iii), of the sample survey division are acknowledged for their valuable contribution during the whole survey process.

Developing of sample selection programme and its related computer software was done by Mr. K.M.R. Wickramasinghe, AD (ICT).

This publication was organized and prepared by Mrs. W.A.C. Wijebandara, Statistician and, Sample Surveys Division, assisted by Mrs. W.A.S.M.P. Gunasekara, Mr. A.M.A.E.Atapattu, Statistical officers. Mr. M.G. Perera, Statistical officer and Mrs. Asanthi Ekanayaka, Statistical Assistant assisted at the editing stage.

The Information & Communication Technology Division, under the direction of Mr. S.A.S. Bandulasena, Additional Director General (ICT) and under the supervision of Mr. P.M.R.Fernando, Deputy Director (ICT) and Mr. W.H.P.N. Weerasiri Deputy Director (ICT), was responsible for the survey data entry and preparation of data entry and computer edits programmes. Data entry was decentralized and manual editing, coding & data entry were done by responsible officers at district office at kachcheries in all districts.

District field staff of the Department who worked on the survey deserves a special word of thanks. They include District Deputy Directors/ Senior Statisticians/ Statisticians for supervision and field Statistical Officers, who worked hard at the data collection stage, to make this survey a success. Printing of the report was done at the staff of Printing Division, under the supervision of Mr. M.J.M Fernando, Statistician.

Finally, I wish to express my appreciation to all the respondents of the survey for their valuable cooperation.

Sri Lanka Labour Force Survey
Summary Statistics on Labour Force Characteristics
2015 1st Quarter
(All Island)

15 years & over population

	Total	Male	Female	Urban	Rural
Population (15 years & over)	16,648,811	7,648,271	9,000,540	2,785,157	13,863,654

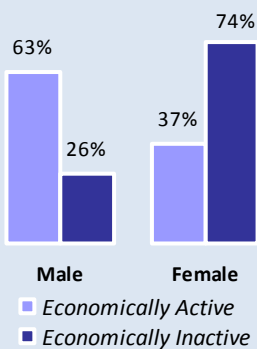

Figure 1: Distribution of Economically active/Inactive population- Fourth Quarter 2014

Sri Lanka Labour Force Survey (LFS) is designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. LFS has been conducted quarterly, since the first quarter of 1990.

The field work of the survey for the First quarter of 2015 was done in January, February and March covering the whole country.

Labour Force (Economically Active Population)

Table 1: Economically active population by gender and sector – First Quarter 2015

Sector	Economically active population					
	Total	%	Male	%	Female	%
Sri Lanka	8,924,716	100.0	5,650,690	63.3	3,274,026	36.7
Urban	1,291,943	100.0	838,957	64.9	452,987	35.1
Rural	7,271,778	100.0	4,618,442	63.5	2,653,337	36.5
Estate	360,994	100.0	193,291	53.5	167,703	46.5

Table 2: Economically inactive population by gender and sector – First Quarter 2015

	Total	%	Male	%	Female	%
Sri Lanka	7,724,095	100.0	1,997,581	25.9	5,726,514	74.1
Urban	1,493,214	100.0	457,944	30.7	1,035,270	69.3
Rural	5,996,575	100.0	1,473,899	24.6	4,522,676	75.4
Estate	234,306	100.0	65,738	28.1	168,568	71.9

Table 3: LFPR by gender and year - All Island

Year	Total	Male	Female
2011	53.0	74.0	34.4
2012	52.6	75.0	32.9
2013	53.8	74.9	35.6
2014	53.3	74.6	34.7
2013 Q1	54.2	75.1	36.2
2014 Q1	53.4	74.4	35.3
2015 Q1	53.6	73.9	36.4

Labour Force

This is the currently economically active population. Which is the number of persons (age 15 years & above) who are employed or unemployed during the reference week.

Labour force participation rate (LFPR)

Labour force population expressed as a percentage of the population, age 15 years and over.

According to the Table 1, the estimated economically active population is about 8.9 million in the First quarter 2015. Of which 63.3 percent are males and 36.7 percent are females. Out of the economically inactive population 25.9 percent are males and 74.1 percent are females (Table 2).

Table 4: LFPR by age group and gender - First Quarter 2015

Age group	Total	Male	Female
Sri Lanka	53.6	73.9	36.4
15 - 19	17.3	21.3	13.0
20 - 24	52.6	68.2	39.9
25 - 29	66.5	91.8	46.2
30 - 34	65.3	95.6	40.2
35 - 39	68.2	96.2	47.4
40 - 44	70.8	95.2	48.2
45 - 49	71.7	95.1	51.7
50 - 54	69.2	94.3	48.6
55 - 59	59.2	84.8	38.3
60+	30.7	47.6	16.6

Table 3 provides the information on LFPRs since year 2008. Referring the table 3, It is important to note that, male participation to the labour force is always higher than that of females.

Considering the Table 4, the distribution of LFPR by age group and by gender depicts high male participation compared to female in all age groups. The highest participation rate for male was reported from age group 35 – 39 years (96.2%), while that for females was reported from the age group of 45 – 49 years (51.7%).

Definition of Employed

Persons, who worked at least one hour during the reference period, as paid employees, employers, own account workers or contributing family workers are said to be employed. This also includes persons with a job but not at work during the reference period.

Reference Period :

Previous week of the survey week

The Employment Rate

The proportion of employed population to the total labour force.

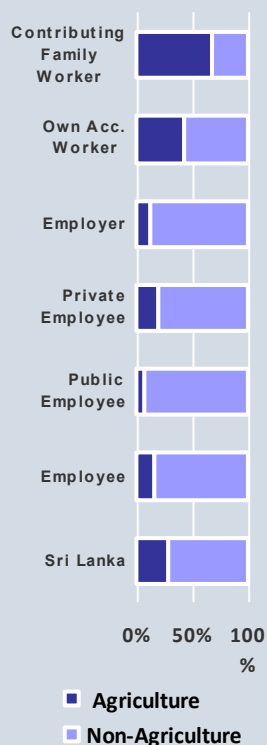

Figure 2: Distribution of employed population by employment status and Agriculture/Non-Agriculture sector- First Quarter 2015

Employment ...

Table 5: Distribution of Employed population by main industry (First Quarter 2014– First Quarter 2015)

Quarter	Sri Lanka	Major Industry Group		
		Agriculture	Industries	Services
2014 Q1 (No.)	8,407,212	2,222,097	2,338,905	3,846,210
(%)	100.0	26.4	27.8	45.7
2014Q2 (No.)	8,413,171	2,368,845	2,189,738	3,854,588
(%)	100.0	28.2	26.0	45.8
2014 Q3 (No.)	8,479,829	2,455,034	2,253,174	3,771,621
(%)	100.0	29.0	26.6	44.5
2014 Q4 (No.)	8,395,762	2,552,541	2,134,233	3,708,988
(%)	100.0	30.4	25.4	44.2
2015 Q1 (No.)	8,502,270	2,500,322	2,200,481	3,801,467
(%)	100.0	29.4	25.9	44.7

Table 5 shows the percentage distribution of employed population by main industry from First quarter 2014 to First quarter 2015. During First quarter of 2015, the total number of employed persons in Sri Lanka is estimated as about 8.5 million. Of which, about 44.7 percent engaged in Services sector, 25.9 percent in Industries sector and 29.4 percent in Agriculture sector.

Main industry categories and sub sectors

Agriculture

1. Agriculture Forestry and Fishery (A)

Industries

1. Mining & Quarrying (B)

2. Manufacturing (C)

3. Construction, Electricity, gas, steam and air conditioning supply, Water supply, sewerage, waste management and remediation activities (D, E, F)

Services

1. Wholesale and retail trade, repair of motor vehicles and motor cycles (G)

2. Transportation and storage (H)

3. Accommodation and food services activities (I)

4. Information and communication (J)

5. Financial and insurance activities (K)

6. Professional, scientific and technical activities (M)

7. Administrative and support service activities (N)

8. Public administration and defense compulsory social security (O)

9. Education (P)

10. Human health and social work activities (Q)

11. Other service activities (S)

12. Activities of households as employers; undifferentiated goods and services - producing activities of households for own use (I)

13. Real estate activities (L) Arts, entertainment and recreation (R) Activities of extra territorial organizations & bodies (U)

Table 6: Distribution of employed population by employment status and Agriculture/Non-Agriculture sector – First Quarter 2015

Employment Status	Sri Lanka		Sector			
			Agriculture		Non-Agriculture	
	No.	%	No.	%	No.	%
Sri Lanka	8,502,270	100.0	2,500,322	29.4	6,001,949	70.6
Employee	4,691,304	100.0	750,210	16.0	3,941,094	84.0
Public	1,251,215	100.0	94,338	7.5	1,156,877	92.5
Private	3,440,089	100.0	655,872	19.1	2,784,217	80.9
Employer	231,761	100.0	27,441	11.8	204,320	88.2
Own Account Worker	2,809,633	100.0	1,197,314	42.6	1,612,319	57.4
Contributing Family Worker	769,572	100.0	525,356	68.3	244,215	31.7

Table 7: Distribution of Employed population by main industry & gender – First Quarter 2015

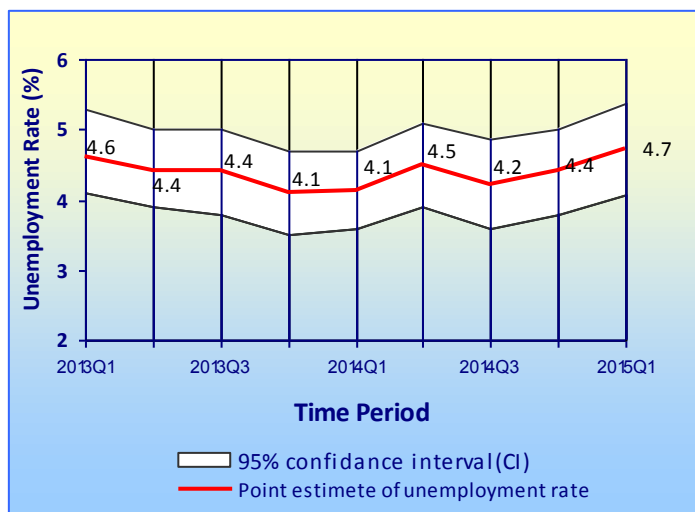

Major Industry Group	Sri Lanka	Gender	
		Male	Female
Sri Lanka	100.0	100.0	100.0
Agriculture	29.4	27.4	33.0
Industry	25.9	25.8	26.0
Services	44.7	46.8	41.0

As seen in Figure 2 & Table 6 contributing family workers are highly concentrated in Agriculture sector.

Table 7 depicts the percentage distribution of male and female employed population by main industries. Highest employment share is in service sector and this is true for both male & female, while the lowest shares are for industry sector. Among employed females 33.0 percent is in agriculture sector while this share is 27.4 percent for males.

Unemployment ...

Figure 3: Unemployment rates and its 95% confidence intervals (2013Q1 - 2015Q1)

¹Sampling error : When a sample, rather than the entire population, is surveyed, estimates differ from the true population values they represent. This difference, or sampling error, occurs by chance, and its variability is measured by the sampling error of the estimate.

For more details, please refer the explanatory note given under the labour force link in the DCS website; www.statistics.gov.lk

Table 8: Unemployment rate by age group and gender – First Quarter 2015

Age group (Years)	Sri Lanka	Gender	
		Male	Female
Sri Lanka	4.7	2.9	7.9
15–24	21.7	15.3	31.2
25–29	8.7	4.1	15.9
Over 30	1.6	0.9	2.8

These figures are to be treated with caution as the corresponding CV (Coefficient of variation) values are high.

The survey results further revealed that the unemployment among females is higher than that of males, in all age groups. Youth and female unemployment contribute more to the overall unemployment of the country.

The highest unemployment rate is reported from the G.C.E(A/L) and above group which is about 10.1 percent. Corresponding percentages are 5.3 percent and 14.3 percent for males and females respectively. Female unemployment rates are higher than those of males in all levels of education.

This further shows that the problem of unemployment is more acute in the case of educated females than educated males, which has been seen the same picture in previous survey results.

Table 9: Unemployment rate by level of education – First Quarter 2015

Level of Education	Unemployment Rate (%)		
	Sri Lanka	Male	Female
Sri Lanka	4.7	2.9	7.9
Below GCE O/L	2.7	2.0	4.2

The number of unemployed persons is estimated as about 422,446 during the First quarter 2015. The unemployment rate for the First quarter 2015 is 4.7 percent.

As shown in Figure 3, it is very important to note that, when sampling error¹ is considered there are no statistically significant drops/increases of unemployment rates reported in different time periods starting from First quarter 2013 to First quarter 2015.

As can be seen from Table 8, overall unemployment rate reported for female is 7.9 percent and it is 2.9 percent for male. Youth unemployment rate 15 – 24 years reported for the First quarter 2015 is 21.7 percent and that reports the highest unemployment rate among all other age groups. Further rates for both males and females are 15.3 and 31.2 percent respectively for age group 15 – 24.

Definition of Unemployed

Persons available and/or looking for work, and who did not work and taken steps to find a job during last four weeks and ready to accept a job given a work opportunity within next two weeks are said to be unemployed.

The Unemployment Rate

The proportion of unemployed population to the total labour force.

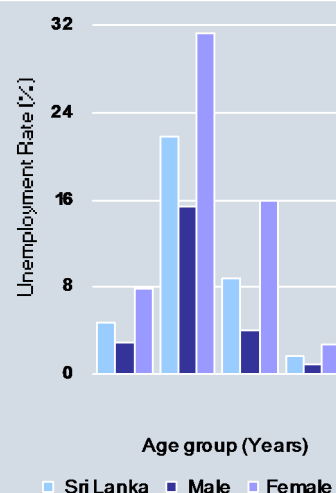

Figure 3: Unemployment rate by age group and gender – First Quarter 2015

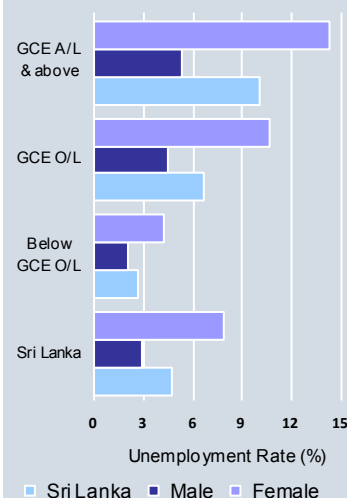

Figure 4: Unemployment rate by level of education and gender – First Quarter 2015

Special Statistical Appendix

EXPLANATORY NOTES

Coverage

Sri Lanka Labour Force Survey was designed to measure the levels and trends of employment, unemployment and labour force in Sri Lanka. This survey is being conducted quarterly, since the first quarter of 1990.

This quarterly survey of households is conducted through a scientifically selected sample designed to represent the civilian non-institutional population. Respondents are interviewed to obtain information about the employment status etc. of each member of the household 15 years of age and older.

The field work of the survey is done during the third week of each month, Monday through Sunday. This is known as the "survey week". The inquiry relates to activity or status are referred in the preceding week of the survey week; referred to as the "reference week".

The concepts and definitions underlying labour force data are as follows.

Concepts & Definitions

1. **Labour force** : The labour force is composed of the economically active population 15 years of age and over.
2. **The Economically Active Population** : is defined as those persons who are/were employed or unemployed during the reference period of the survey.
3. **Employed** : Persons, who during the reference period, worked as paid employees, employers, own account workers (self employed), or unpaid family workers are said to be employed. This includes persons with a job but not at work during the reference period.
4. **Unemployed** : Persons who are seeking and available for work, but had no employment during the reference period.
5. **Currently Economically Active** : A person who was employed or unemployed during the current reference period is considered to be currently economically active.
6. **Not in the Labour Force (not economically active)** : Persons who were neither working nor available/looking for work are classified as "not in the labour force". Persons are not in the labour force for such reasons as: full time care of the household, full – time students, retired or old age, infirmed or disabled, or are not interested in working for one reason or another. Current and Usual definitions apply.
7. **Criteria for classification of underemployment**: In order to classify an employed persons as visibly underemployed,

(i) If the person has worked less than the normal duration in his/her main activity

In Sri Lanka scenario, 35 hours per week is taken as the cut-off point applicable to all workers, except government teachers. As in practice, though teachers do have a normal duration of work which is below the general cut-off point, they should be on a full time schedule according to the nature of their job. Further, those who do have a secondary job, or those who are employers, were considered as having worked the normal duration in their respective activity.

Therefore, if the person has worked less than the normal duration in his/her activity (as described above), then the person is further questioned to ascertain whether he/She is prepared and available for further work if provided. Such persons are considered underemployed in their respective employment.

(ii) If the person has worked more than the normal duration in his/her activity

If the person has worked even more than 35 hours as usually, but he has worked less than 35 hours actually in the reference period, only due to the off season or bad weather, such persons were also further questioned to check their underemployment situation, considering them as a special category.

8. Informal Sector Employment

In order to classify a person to be employed in informal sector employment, following information were used.

- (i) Registration of the organization
- (ii) Accounts keeping practices of the organization
- (iii) Total number of regular employees of the organization.

Reliability of the estimates

Statistics based on the quarterly labour force data are subject to both sampling and non - sampling errors. When a sample rather than the entire population is surveyed, there is a chance that the sample estimates may differ from the "true" population values they represent.

The exact differences or sampling error, varies depending on the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 95 percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.96 standard errors from the " true" population value, because of sampling error. Analyses relating to the Labour Force Survey are generally conducted at the 95 percent level of confidence.

For example, the confidence interval for the quarterly unemployment rate is on the order of

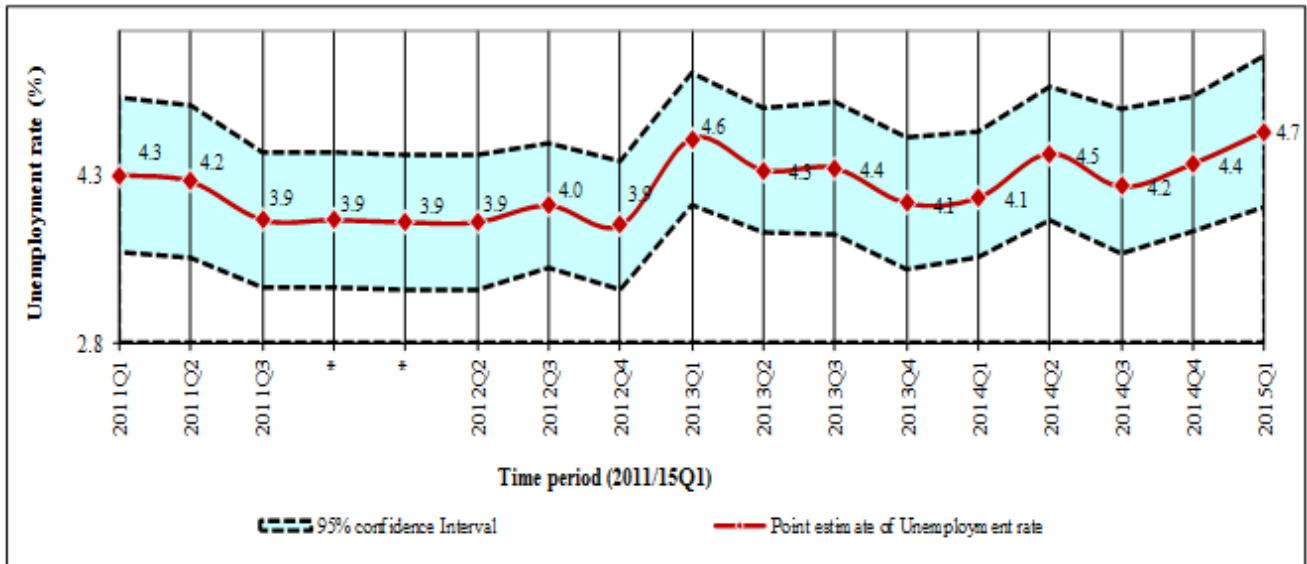

Estimated value *(of the unemployment rate)* \pm (standard error) * (1.96)

$$6.4 \pm (0.4) * (1.96)$$
$$(6.4 \pm 0.784)$$

This means, the 95 percent confidence interval on the quarterly unemployment rate could range from (5.6 to 7.2) . This implies that there is about 95 percent chance that the "true" unemployment rate lies within this interval. This range includes all the values range from 5.6 to 7.2. When the comparison of this estimate is done between two quarters, if any of the value within the 95 percent confidence interval of one quarter overlaps with the confidence interval of the other , it means that the estimates of this two quarters *are not significantly different*.

Therefore, in each quarterly labour force report, a separate table is given including approximate standard errors for some selected variables, so that users could understand this statistical scenario clearly.

Distribution of unemployment rates and 95% confidence intervals (2011Q1 - 2015Q1)

Note:

- * Survey was not conducted in the fourth quarter 2011 & first quarter 2012 due to activities of population census.
- Excluding Northern Province

As seen in figure 2, it is very important to note that, there were no statistically significant differences between the unemployment rates reported in different time periods of 2011/2014, when sampling error was considered.

Change in survey schedule

Current survey concepts and methods are very similar to those introduced at the beginning of the survey in 1990. However, some changes have been made over the years to improve the accuracy and usefulness of the data. In January 2006, some improvements were made to the labour force survey schedule in order to fulfill the requirements of data users and also to provide additional information for planning purposes. The revision was made focusing on literacy, household economic activities, and informal sector employment and under employment etc.

From January , 2013 onwards, the lower bound of working age populations is considered as age 15, hence age 15 and over population is considered as working age population .The survey schedule is updated to obtain more precise information on following age, informal employment, informal sector, secondary occupation, wages & income , unemployment & trainings.

New Industry & Occupation classifications

From January 2013 onward the survey uses new industry & occupation classifications, such as

SLIC Rev 4:- Sri Lanka Standard Industry Classification based on International Standard Industry classification - Rev.4 (ISIC Rev 4)

SLSCO 08:- Sri Lanka Standard Classification of Occupation -2008 based on International Standard Classification of Occupation-2008 (ISCO 2008)

Note :

It is important to note that, all the data published here are the estimates based on a sample survey and these are subject to sampling errors. These sampling errors can be statistically evaluated from the survey results. Therefore, sampling error is normally measured in terms of the standard error of the particular variable. Standard error could be used to calculate the confidence limits with a prescribed accuracy where the true value of the estimates lies.

Further reliability of the estimates can be expressed in terms of Coefficient of Variation (CV). The CV is a relative measure of the sampling error and is calculated as sampling error divided by the expected value of the given characteristic.

In view of this, following table is given to show the estimates for some selected variables, its standard error, CV and 95% Confidence interval.

It is also important to note that all the estimates we publish in this report are subject to sampling error and one should be cautious in the interpretation of results, especially with respect to the trends over time.

Estimate of Confidence Intervals for some selected characteristics

ALTERNATIVE ESTIMATES

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

Official employment, unemployment and labour force characteristics are estimated at the Sri Lanka Labour Force Survey, based on the internationally comparable concepts and definitions recommended by the ILO. However the validity of the concepts and definitions used at the survey is questioned very often in some forums, for the appropriateness of these concepts and definitions in the Sri Lankan context.

The concepts and definitions, which were found to be controversial, are as below.

- (1) **Number of Hours of Work** : A person who work **at least one hour** during the reference week, is considered **employed**, under these definitions.
- (2) **Working Age Population** : All persons of **age 10 years and over** are considered to be in the working age, before 2013. However, this was changed as age 15 and over from 2013 onward.
- (3) **Employment Status** : All,
 - a) Paid employees, (those who work for wages/salaries).
 - b) Employers (who have at least one paid employee under them).
 - c) Own account workers (who carry out the economic activity without having any paid employees).
 - d) Contributing family workers (who make their contribution to the economic activities carried out by their own household, without wages/salaries).

The validity of the above concepts and definitions is raised due to the following reasons.

- (1) **Number of Hours of Work** : Some pointed out that one hour per week is too low, to consider a person to be employed.
- (2) **Working Age Population** : Some pointed out those persons in the age group 10-14 yrs. are too young to be considered in the working age. (From 2013 onward the working age population is considered as age 15 and over).
- (3) **Employment Status** : Some pointed out that 'contributing family workers' may work in the family enterprise without payment because they have no other work, and so it is not appropriate to consider them as employed.

An attempt has been made to produce '**Alternative estimates of Employment, Unemployment and Labour Force Characteristics,**' by revising the original concepts and definitions so that the above issues are addressed as explained below.

The revisions made are,

- (1) **Number of Hours of Work** : Persons who work **20 hours or more per week only** are considered to be employed.
- (2) **Contributing Family Worker** : Contributing family workers are **not** considered as employed. Those contributing family workers who were reported to be seeking some other work are considered as **unemployed** and the rest of the unpaid family workers are considered as **economically inactive** (not in the labour force) so only, **a) paid employees b) employers and c) own account workers are considered to be employed.**

Following tables are based on the above alternative concepts and definitions.

Alternative Estimates of Employment, Unemployment and Labour Force Characteristics

TABLE 1 - LABOUR FORCE STATUS OF HOUSEHOLD POPULATION 15 YEARS & OVER (ALTERNATIVE ESTIMATES)

Note: The tabulation groups based on ISIC (Rev.4) are indicated as A,B,C.....U. Due to the limitations on reliability (based on CV),some of these groups have been combined.

Industry Group

1 Agriculture, forestry and fishing (A)

2 Mining & quarrying (B)

3 Manufacturing (C)

6 Construction, Electricity, gas, steam and air conditioning supply, Water supply, sewerage, waste r and remediation activities (D, E,F)

7 Wholesale and retail trade, repair of motor vehicles and motor cycles(G)

8 Transportation and storage (H)

9 Accommodation and food services activities (I)

10 Information and communication (J)

11 Financial and insurance activities (K)

13 Professional, scientific and technical activities (M)

14 Administrative and support service activities (N)

15 Public administration and defence compulsory social security (O)

16 Education (P)

17 Human health and social work activities (Q)

19 Other service activities (S)

20 Activities of households as employers; undifferentiated goods and services - producing activities of households for own use (T)

Other

Other

12 Real estate activities (L)

18 Arts, entertainment and recreation (R)

21 Activities of extra territorial organizations & bodies (U)
